

PRE-LECTURE ANALYSIS SHEET

Stomach & Spleen Channels

Zu Yang Ming / Zu Tai Yin

Prof. (Dr.) Vivian Zhang, Ph.D. | ST (45 pts) + SP (21 pts) = 66 Points

BEFORE lecture: Complete Sections A-D and pre-lecture case questions. Rate confidence and expectancy honestly.
 DURING lecture: Annotate directly on this sheet as Dr. Zhang covers material.
 AFTER lecture: Complete Section F within 24 hours. Update confidence, finish the case, run the Inter-Quiz.
 NEW IN v2: growth-mindset framing (Sec. A) and a faster-feedback, checkpointed Inter-Quiz structure.

A

Learning Targets -- I Can Statements

Pre/post confidence ratings 1-5 for 9 learning outcomes

B

Activate -- Connect to What You Know

Bridge from Week 2 LU/LI to ST/SP; fill-in prompts

C

Vocabulary Pre-Load

14 key terms: Pinyin, English, space for your definition

D

Anticipatory Questions

11 questions (ST + SP); starred = high-challenge / high-yield

IQ

Inter-Quiz: Mid-Study Probe

16 items in 4 checkpoint blocks; mastery $\geq$ 14/16 across 3 sessions

E

Clinical Case -- Ms. Li

Pre-lecture guessing + post-lecture treatment protocol

F

After-Lecture Synthesis

Concept map fill-in + synthesis columns + review notes

A LEARNING TARGETS -- I CAN STATEMENTS

Purpose: These outcomes define exactly what you are expected to do after this lecture -- not just know, but perform.

How to use: Before lecture: circle your Pre score honestly. After lecture: circle Post score.

Goal: All 9 targets at 4-5 by end of your Week 3 review session. Below 3 = highest review priority.

Mindset: Every target below has 3 sessions to reach mastery. A low Pre score or a rough first attempt isn't a failing grade -- it's just today's starting point. Track your Pre-to-Post movement, not a single number.

Trace the Stomach meridian (ST1-ST45) from the lateral nose to the 2nd toe, naming all 6 branches.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Describe the Stomach meridian's 11 crossing points and explain why ST has more than any other channel.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Trace the Spleen meridian (SP1-SP21) from the big toe to the lateral chest, including the tongue branch.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Explain why SP crosses in front of the Liver meridian and name the specific point and measurement.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Apply the ST-SP interior-exterior paired relationship: give 2 clinical examples in each direction.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Distinguish ST and SP symptoms (external course vs. internal organ dysfunction) for both channels.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Explain how foot-yang (ST) and foot-yin (SP) fit into the 4-part circulation order.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Identify high-yield ST points: ST1, ST25, ST36, ST40, ST44, ST45 -- categories and key indications.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Identify high-yield SP points: SP1, SP3, SP4, SP6, SP9, SP10, SP21 -- categories and key indications.

Pre-Lecture	1	2	3	4	5	Post	1	2	3	4	5
-------------	---	---	---	---	---	------	---	---	---	---	---

Quiz 3 covers ST & SP: same 5-question format + 1 bonus (20 pts). Targets at 4-5 = quiz-ready.

B ACTIVATE -- CONNECT TO WHAT YOU KNOW

Purpose: Activating prior knowledge before new input improves encoding. This section bridges Week 2 to Week 3.
B1: Write whatever you already know -- no wrong answers. B2: Complete each fill-in before lecture.

B1 . From Week 2 to Today

Week 2 established LU and LI -- the Hand Metal pair. Today adds ST and SP, the Foot Earth pair. LI ends at the lateral nose (LI20) -- and ST BEGINS there. This is the exact relay point between them. Both pairs belong to the Anterior circuit.

What do you already know about ST and SP? Write whatever comes to mind:

B2 . Connect the Dots -- complete before lecture

LI20 (Yingxiang) ends at the nose -> ST begins at the _____, located _____.

ST is Foot Yangming (Yang, head->foot) -> SP is Foot _____ (Yin, _____ -> _____).

Metal (LU/LI) governs skin & descending -> Earth (ST/SP) governs _____ & _____.

LI4 treats lower teeth/gums -> ST channel treats _____ teeth/gums (different channel!).

LU/LI paired via interior-exterior -> ST/SP are paired: ST (Fu) <-> SP (_____ organ).

C VOCABULARY PRE-LOAD -- DEFINE BEFORE CLASS

*Purpose: Pre-loading key terms primes semantic memory so lecture content attaches to existing scaffolding.
Before lecture: fill in 'My Definition' with whatever you know or can infer. Blank = learn live.*

PINYIN	ENGLISH	MY DEFINITION / CLINICAL NOTE
Zu Yang Ming	Foot Yangming (ST)	
Zu Tai Yin	Foot Taiyin (SP)	
Cheng Qi . ST1	Tear Container	
Tian Shu . ST25	Heavenly Pivot	
Zu San Li . ST36	Leg Three Miles	
Feng Long . ST40	Abundant Bulge	
Li Dui . ST45	Severe Mouth	
Yin Bai . SP1	Hidden White	
Tai Bai . SP3	Supreme White	
Gong Sun . SP4	Yellow Emperor	
San Yin Jiao . SP6	3-Yin Intersection	
Yin Ling Quan . SP9	Yin Mound Spring	
Xue Hai . SP10	Sea of Blood	
Da Bao . SP21	Great Embrace	

D ANTICIPATORY QUESTIONS | * = HIGH-CHALLENGE / HIGH-YIELD

Purpose: Generating answers before instruction improves retention. Starred items are matched to your growing skill level -- they're harder because they're the ones most worth the stretch, not just exam bait.

Stomach Meridian -- ST1 to ST45 (45 points | Foot Yangming | 7-9 AM)

Q1* ORIGIN & STARTING POINT

ST starts at the lateral side of the nose. Describe the relay from LI20 through BL1.

Q2* FACIAL PATHWAY

Trace ST through the face from nose to forehead -- name 5 key structures/points.

Q3* THE 11 CROSSING POINTS

ST has 11 crossing points. Name as many as you can; group by vessel.

Q4 TIBIAL BRANCH & CONNECTION TO SP

Where does the tibial branch start, and where does the foot branch link to SP?

Q5* ST25 TIANSHU -- CLINICAL SIGNIFICANCE

ST25 is the Front-Mu of which organ? Give 3 clinical conditions it treats.

Section D (continued)

Spleen Meridian -- SP1 to SP21 (21 points | Foot Taiyin | 9-11 AM)

Q6* STARTING POINT & RELAY

SP1 (Yinbai) -- which branch of ST connects to it?

Q7* THE LIVER MERIDIAN CROSSING

At what measurement above the medial malleolus does SP cross in front of LR?

Q8* THE THREE-YIN MEETING

Which 3 meridians converge at SP6? Why is SP6 forbidden in pregnancy?

Q9 SP4 & THE CHONG MAI

SP4 opens which extraordinary vessel, and what does it treat?

Q10* ST-SP PAIRED RELATIONSHIP

Give one clinical treatment example in each direction of the ST<->SP pairing.

IQ INTER-QUIZ -- MID-STUDY PROBE (checkpoint format)

Purpose: Spaced retrieval is the single most evidence-based study technique. Flow theory addition: you self-check after every 4 items instead of waiting until the end -- a tighter feedback loop keeps difficulty matched to skill. Mastery: $\geq 14/16$ across 3 separate sessions on different days.

Date: _____ Start: _____ End: _____ Session score: ____/16

CHECKPOINT 1 (items 1-4)

- 1 ACQ ST has ____ acupoints; SP has ____ acupoints.
- 2 MAINT LU has ____ pts; LI has ____ pts.
- 3 ACQ First point of ST: name + location.
- 4 ACQ First point of SP: name + location.

Self-check now (answers below) -- score this block: ____/4 before moving on.

CHECKPOINT 2 (items 5-8)

- 5 ACQ ST25 (Tianshu): category + primary use.
- 6 ACQ ST36 (Zusanli): category + why 'master' point.
- 7 ACQ ST40 (Fenglong): category + primary function.
- 8 ACQ SP6 (Sanyinjiao): which 3 meridians meet here?

Self-check now (answers below) -- score this block: ____/4 before moving on.

CHECKPOINT 3 (items 9-12)

- 9 ACQ SP4 (Gongsun): opens which extraordinary vessel?
- 10 ACQ SP crosses in front of which meridian? At what measurement?
- 11 ACQ ST has ____ crossing points. Name any 3.
- 12 ACQ SP21 (Dabao): type of point + what it treats.

Self-check now (answers below) -- score this block: ____/4 before moving on.

CHECKPOINT 4 (items 13-16)

- 13 MAINT LI4 is forbidden in pregnancy. Name the SP point also forbidden.
- 14 MAINT Direction of qi in foot-yang (ST) meridians?
- 15 MAINT Direction of qi in foot-yin (SP) meridians?
- 16 MAINT ST clock: ____AM-____AM. SP clock: ____AM-____AM.

Self-check now (answers below) -- score this block: ____/4 before moving on.

IQ INTER-QUIZ ANSWER KEY -- check each block right after attempting it

1. 45; 21
2. 11; 20
3. ST1 Chengqi - below the pupil, in the orbit
4. SP1 Yinbai - medial big toe nail corner
5. Front-Mu of LI; abdominal pain, diarrhea, constipation
6. He-Sea; command abdomen; master tonification point
7. Luo-connecting; transforms phlegm-damp
8. SP + Liver + Kidney
9. Chong Mai (Penetrating Vessel)
10. Liver; 8 cun above medial malleolus
11. 11; e.g. LI20, BL1, GB3
12. Great Luo-collateral; musculoskeletal pain/fatigue
13. SP6 (Sanyinjiao)
14. Head -> Foot
15. Foot -> Chest / Abdomen
16. ST 7-9 AM; SP 9-11 AM

Session 1: ____/16 Session 2: ____/16 Session 3: ____/16 Criterion met ($\geq 14/16 \times 3$): []

E CLINICAL CASE -- APPLY IT BEFORE & AFTER

Purpose: Case-based reasoning bridges textbook knowledge to clinical reality. Struggling before lecture is the point.

Case Vignette: Ms. Li, 38 years old

Ms. Li is a 38-year-old elementary school teacher presenting with a 6-week history of persistent bloating and epigastric fullness that worsens after eating. She reports loose stools 2-3x daily, significant fatigue, and limb heaviness. Little appetite, persistent sweet craving, mild facial puffiness, slight ankle swelling by evening. Feels worst 9-11 AM. Tongue pale with thick white greasy coating. Pulse soggy (Ru Mai), moderate.

Pre-Lecture Questions

PRE Q1: Which channel(s) are most likely involved? List the specific signs that led you there.

PRE Q2: Ms. Li feels worst at 9-11 AM. What is the diagnostic significance of this time window?

PRE Q3: The coating/pulse suggest what pattern? Which ST or SP point is your first choice? (Hint: phlegm-damp)

Post-Lecture Questions (within 24 hrs)

POST Q1: Name 3 ST/SP points for Ms. Li's protocol -- code, category, one-sentence justification each.

POST Q2: Include points from the paired organ? Apply interior-exterior logic with specific points.

F AFTER-LECTURE SYNTHESIS & SELF-MONITORING

When: Complete within 24 hrs -- optimal consolidation window. Fill without notes first; gaps are data, not failure.

I Can Now Confidently...

Still Unclear -- Review...

Connected to Other Learning...

Concept Map -- ST & SP Quick Review

ST - Stomach (Fu/Yang): ___ pts Clock ___-___ AM Dir ___ -> ___

SP - Spleen (Zang/Yin): ___ pts Clock ___-___ AM Dir ___ -> ___

ST start: ST1 Chengqi (_____) ST end: ST45 Lidui (_____)

ST25: Front-Mu of _____ ST36: Command _____; He-Sea

SP crosses in front of LR at ___ cun above ___ SP21: Great _____ point

SP6 = 3-yin meeting: SP + ___ + ___ Forbidden in pregnancy: [] SP4 opens: _____ Vessel

Review Notes -- Insights, Connections & Questions for Dr. Zhang
