

Week 7 Quiz Kit

The Eight Extraordinary Vessels

Standalone practice quiz -- pairs with the Week 7 Study Guide

This Kit Covers:

- 12-Question MCQ Section – vessel identity, sea titles, point counts, structural traits
- Confluent Point Matching – all 4 master-couple pairs (8 points)
- Fill-in-the-Blank – coalescent points, Luo-Connecting overlaps, first/last points
- Short Answer – pathology recognition tied to specific vessels
- MAINT Review – pulled directly from Dr. Zhang's live Quiz 5 review (PC/SJ/GB/LR)
- Crossing-Point Review – Dr. Zhang's own Q1/Q2/Q3 (GV14 intersections, supraclavicular fossa, periocular meridians)
- Full Answer Key with explanations for every question

QUIZ 6 (next week) covers: the Eight Extraordinary Vessels + cumulative Middle Circuit review.

Study first from the Week 7 Study Guide, then self-test here before class.

Answer key begins after the final question block – no peeking until you've answered!

Section A: Multiple Choice — Q1-9 (of 12)

Vessel identity, sea titles, structure

1 Which vessel is described as the “sea of the yang meridians”?

- A. Ren Mai (CV)
- B. Du Mai (GV)
- C. Chong Mai
- D. Dai Mai

2 Which vessel is described as the “sea of the yin meridians”?

- A. Ren Mai (CV)
- B. Du Mai (GV)
- C. Yin Qiao Mai
- D. Yin Wei Mai

3 Chong Mai carries three “sea of...” titles. Which of the following is NOT one of them?

- A. Sea of the 12 meridians
- B. Sea of blood
- C. Sea of the zang-fu organs
- D. Sea of the yang meridians

4 How many acupuncture points does the Governor Vessel have?

- A. 24
- B. 28
- C. 23
- D. 44

5 How many acupuncture points does the Conception Vessel have?

- A. 28
- B. 22
- C. 24
- D. 20

6 Which TWO vessels are the only ones with their own dedicated acupuncture points?

- A. Chong Mai and Dai Mai
- B. GV and CV
- C. Yang Qiao and Yin Qiao
- D. Yang Wei and Yin Wei

7 What is the ONE structural feature all 8 Extraordinary Vessels share, distinguishing them from the 12 primary meridians?

- A. They all run vertically
- B. None pertains to a zang or fu organ
- C. They all have 12 points
- D. They all start at the fingertips

8 Which vessel is the ONLY one of the 8 that runs horizontally rather than vertically?

- A. Chong Mai
- B. Dai Mai
- C. Yang Wei Mai
- D. Ren Mai

9 “One source, three branches” (Yi Yuan San Qi) refers to which three vessels?

- A. GV, CV, Dai Mai
- B. GV, CV, Chong Mai
- C. Chong, Dai, Wei
- D. Qiao, Wei, Dai

Section A: Multiple Choice — Q10-12 (of 12)*Vessel identity, sea titles, structure*

10 Which vessel governs sleep/wake balance by keeping the body alert and active (as opposed to promoting rest)?

- A. Yin Qiao Mai
- C. Yin Wei Mai

- B. Yang Qiao Mai
- D. Dai Mai

11 Which vessel dominates the EXTERIOR of the whole body and connects to all yang meridians?

- A. Yang Wei Mai
- C. Yang Qiao Mai

- B. Yin Wei Mai
- D. Chong Mai

12 Which vessel dominates the INTERIOR of the whole body and connects to all yin meridians?

- A. Yin Qiao Mai
- C. Ren Mai

- B. Yin Wei Mai
- D. Chong Mai

Section B: Confluent Point Matching

Match each vessel to its confluent point

Match each vessel (left) to its confluent/opening point (right). Each letter is used exactly once.

1. Du Mai

Answer: _____

2. Ren Mai

Answer: _____

3. Chong Mai

Answer: _____

4. Dai Mai

Answer: _____

5. Yang Qiao Mai

Answer: _____

6. Yin Qiao Mai

Answer: _____

7. Yang Wei Mai

Answer: _____

8. Yin Wei Mai

Answer: _____

A. SP 4 Gongsun

B. SI 3 Houxi

C. LU 7 Lieque

D. GB 41 Zulinqi

E. BL 62 Shenmai

F. KI 6 Zhaohai

G. SJ 5 Waiguan

H. PC 6 Neiguan

Bonus: name the shared clinical indication for each pair (from the Study Guide/Cram Sheet).

Section C: Fill in the Blank

1. The Belt Vessel's confluent point is _____, on the Gallbladder meridian.
2. The confluent point pairing for Du Mai + Yang Qiao Mai is Houxi (SI 3) with _____.
3. Ren Mai's confluent point Lieque (LU 7) is also the _____ point of the Lung meridian.
4. Chong Mai's confluent point Gongsun (SP 4) is also the _____ point of the Spleen meridian.
5. The coalescent points of the Governor Vessel are Fengmen (BL 12) and _____.
6. The coalescent points of the Conception Vessel are Chengqi (ST 1) and _____.
7. Yin Wei Mai's confluent point is Neiguan, _____.
8. The first point of the Governor Vessel is _____, midway between the coccyx tip and the anus.

Section D: Short Answer — Pathology Recognition

1. A patient presents with spinal stiffness, a heavy sensation in the head, and low-grade fever. Which vessel's pathology pattern does this most resemble, and what is its confluent point?

2. A patient presents with irregular menstruation, fullness in the abdomen, and lumbar pain, with no clear up/down directionality to the pain. Which vessel should you consider, and why is the “no clear direction” detail significant?

3. A patient reports chest pain, waist pain, and hard lumps in the upper abdomen. Which vessel's pathology best fits, and what is its confluent point?

4. Explain why GV and CV are the only two Extraordinary Vessels that can be point-prescribed independently of a primary meridian.

Section E: MAINT Review — PC/SJ/GB/LR*From Dr. Zhang's live Quiz 5 review*

1. What is the pertaining organ of the Pericardium meridian, and what is its connecting organ?

2. The Pericardium meridian has three branches. Name them.

3. Which primary meridian is the only one that runs across/connects with the external genitalia?

4. In the 12-meridian circulation sequence, which meridian does the Liver meridian connect to, closing the cycle?

5. Both Hand-Shaoyang and Foot-Shaoyang meridians share a common anatomical pathway. What is it, and why is this clinically useful?

6. Where does the Gallbladder meridian of Foot-Shaoyang start and end?

Section F: Crossing-Point Review

Dr. Zhang's own end-of-lecture questions (2026 deck)

Q1. Which meridians intersect with the Governor Vessel at GV 14 (Dazhui)?

Q2. Which meridians pass through the supraclavicular fossa?

Q3. Which meridians pass through the area surrounding the eyes, and how does each relate to the eye?

Answer Key — Section A (Multiple Choice)

1. **Q1: B. Du Mai (GV)**
Du Mai (GV) governs the qi of all yang meridians and is the sea of the yang meridians.
2. **Q2: A. Ren Mai (CV)**
Ren Mai (CV) receives and bears the qi of all yin meridians.
3. **Q3: D. Sea of the yang meridians**
Chong Mai's three titles are sea of the 12 meridians, sea of blood, and sea of the zang-fu organs -- "sea of the yang meridians" belongs to GV.
4. **Q4: B. 28**
GV runs GV1 Changqiang to GV28 Yinjiao -- 28 points total.
5. **Q5: C. 24**
CV runs CV1 Huiyin to CV24 Chengjiang -- 24 points total.
6. **Q6: B. GV and CV**
Only Du Mai (GV) and Ren Mai (CV) have their own points; the other six share points with primary meridians (coalescent points).
7. **Q7: B. None pertains to a zang or fu organ**
None of the 8 Extraordinary Vessels pertains to a zang/fu organ, and none has an interior-exterior paired relationship.
8. **Q8: B. Dai Mai**
Dai Mai (Belt Vessel) wraps horizontally around the waist -- structurally unique among the 8.
9. **Q9: B. GV, CV, Chong Mai**
Du, Ren, and Chong Mai all arise from the lower abdomen and emerge together at the perineum before diverging.
10. **Q10: B. Yang Qiao Mai**
Yang Qiao Mai keeps the body awake/active; Yin Qiao Mai promotes calm and restful sleep.
11. **Q11: A. Yang Wei Mai**
Yang Wei Mai connects to all yang meridians (esp. Du) and dominates the exterior of the body.
12. **Q12: B. Yin Wei Mai**
Yin Wei Mai connects to all yin meridians (esp. Ren) and dominates the interior of the body.

Answer Key — Sections B-E

Section B: Confluent Point Matching

1-B 2-C 3-A 4-D 5-E 6-F 7-G 8-H

Section C: Fill in the Blank

1. GB 41 Zulinqi

2. Shenmai (BL 62)

3. Luo-Connecting

4. Luo-Connecting

5. Huiyin (CV 1)

6. Yinjiao (GV 28)

7. PC 6

8. GV 1 Changqiang

Section D: Short Answer

Governor Vessel (GV/Du Mai) pathology. Confluent point: SI 3 Houxi.

Dai Mai (Belt Vessel) -- it is the only vessel that runs horizontally, so its pathology characteristically lacks the vertical/longitudinal directionality typical of the 12 primary meridians.

Yin Wei Mai pathology. Confluent point: PC 6 Neiguan.

GV and CV are the only two vessels with their own dedicated acupuncture points (28 and 24 respectively); the other six vessels have no points of their own and must be accessed via coalescent points they share with primary meridians, or via their confluent (opening) point.

Section E: MAINT Review

Pertaining organ: Pericardium. Connecting organ: San Jiao (Triple Energizer) -- an interior-exterior (yin-yang) paired relationship.

Internal branch, superficial branch, and an upper (arm/hand) branch; the meridian starts at the chest and runs to the hand.

The Liver meridian (LR).

The Lung meridian (LU) -- closing the full 12-meridian circulation sequence.

Both SJ (Hand-Shaoyang) and GB (Foot-Shaoyang) run across the ear and the lateral side of the head -- combine points from both meridians to treat lateral (Shaoyang-type) headache.

Starts at the outer canthus (GB 1 Tongziliao); ends at the tip of the 4th toe (GB 44 Zuqiaoyin).

Section F: Crossing-Point Review

Q1: Large Intestine (Hand-Yangming), Small Intestine (Hand-Taiyang), Bladder (Foot-Taiyang), Triple Energizer/San Jiao (Hand-Shaoyang), and Gallbladder (Foot-Shaoyang).

Q2: Large Intestine (Hand-Yangming), Stomach (Foot-Yangming), Small Intestine (Hand-Taiyang), Triple Energizer/San Jiao (Hand-Shaoyang), and Gallbladder (Foot-Shaoyang).

Answer Key — Sections B-F (continued)

Q3: Stomach (ascends to the inner corner of the eye), Heart (connects to the “Eye System” via the throat), Small Intestine (reaches both inner and outer canthus), Bladder (starts at the inner canthus, BL 1), Triple Energizer/San Jiao (terminates at the outer canthus), Gallbladder (starts at the outer canthus, GB 1), Liver (connects to the “Eye System,” mu xi).
