Exam Traps - read these last

- ST BEGINS at LI20, not at ST1. ST1 is the first numbered point only.
- UPPER teeth/gums = ST. LOWER teeth/gums = LI. Dr. Zhang tests this.
- ST25 is Front-Mu of the LARGE INTESTINE. CV12 is Front-Mu of STOMACH.
- ONLY ST passes through the NIPPLE. Nipple pain/numbness -> ST.
- LI connects to ST, NOT to SP. Classic circuit-continuity trap.
- ST17 Ruzhong = center of nipple, landmark ONLY - never needed.

- ONLY SP spreads over the LOWER SURFACE of the tongue.
- SP connects to HT, NOT to LI. Second half of the circuit trap.
- SP4 opens Chong Mai - not Ren, not Du. Paired with PC6.
- Front-Mu of SP is LR13 Zhangmen - it sits on the LIVER channel.

Rapid Recall - ST & SP

Read this one last, on the way in

The "ONLY" List - guaranteed points

ONLY channel on the LOWER TONGUE surface	SP
ONLY exception to the 3-yin distribution rule	SP at 8 cun
MOST crossing points of any single channel	ST - 11
2nd largest meridian (only BL is bigger)	ST - 45 pts

Last 60 Seconds

- ST = 45 pts, 7-9 AM, Yang Earth, head to foot, 11 crossings, THROUGH THE NIPPLE.
- SP = 21 pts, 9-11 AM, Yin Earth, foot to chest, 6 crossings, LOWER TONGUE.
- ST descends. SP ascends. Broken ST = vomiting. Broken SP = diarrhea.
- ST36 tonic. ST40 phlegm. ST25 Front-Mu LI. ST44 upper teeth.
- SP6 three-yin (no pregnancy). SP9 damp. SP10 blood. SP4 Chong Mai.

Commonly Confused - know both sides

Pair	The distinction
ST25 vs CV12	ST25 = Front-Mu of LARGE INTESTINE. CV12 = Front-Mu of STOMACH.
ST36 vs SP6	ST36 = He-Sea + Command Abdomen, master tonic. SP6 = 3-Yin crossing, gynae, FORBIDDEN in pregnancy.
ST40 vs SP9	ST40 resolves PHLEGM (anywhere). SP9 resolves DAMPNESS (edema, urinary).
ST44 vs LI4	ST44 for UPPER toothache (Yangming heat). LI4 for LOWER toothache.
SP4 vs SP3	SP4 = Luo + Confluent (Chong Mai). SP3 = Shu-Stream + Yuan-Source.
ST34 vs SP8	Both Xi-Cleft = ACUTE. ST34 acute stomach pain. SP8 acute dysmenorrhea.
LR13 vs LR14	LR13 Zhangmen = Front-Mu of SPLEEN. LR14 Qimen = Front-Mu of LIVER.
Circuit hand-offs	LU->LI (at LI1). LI->ST (at LI20). ST->SP (at SP1). SP->HT (internal).
