

MIDTERM

1-4

PRACTICE MIDTERM — SET 2

Channel Theory + LU · LI · ST · SP · HT · SI

28 questions · MC / True-False / EXCEPT format · Weeks 1-4 · Quiz Ready

FORMAT

Multiple choice
True/False + EXCEPT

COVERAGE

Theory + 6 channels
125 points cumulative

ANSWER KEY

Full explanations
for all 28 questions

How to use this

Close the book. No notes, no app - simulate real exam conditions.

Take all 28 in one sitting (Dr. Zhang's format: ~20-30 questions, timed).

Score yourself, then re-drill ONLY the categories you missed.

This is a SECOND, different set of 28 questions - no overlap with Practice Midterm Set 1.

Several questions below are pulled directly from Dr. Zhang's own Quiz 1-3 answer-key reviews.

CHANNEL THEORY & CIRCADIAN CLOCK

Week 1

Q1. Where do Foot Yin and Hand Yin meridians meet each other?

- A. The fingers
- B. The face
- C. The toes
- D. The chest

Q2. [T/F] True or False: Zang organs are Yin and Fu organs are Yang.

- A. True
- B. False

Q3. [EXCEPT] All of the following are Yang meridians EXCEPT:

- A. Large Intestine
- B. Stomach
- C. Spleen
- D. Small Intestine

Q4. LU and LI belong to which of the three circuits?

- A. Anterior (Taiyin/Yangming)
- B. Middle (Jueyin/Shaoyang)
- C. Posterior (Shaoyin/Taiyang)
- D. None - they are a separate category

Q5. Per Dr. Zhang's own Quiz 1 answer key, the three-part nomenclature is tested in which order?

- A. Yin/Yang, Hand/Foot, Zang-Fu
- B. Zang-Fu, Hand/Foot, Yin/Yang
- C. Hand/Foot, Zang-Fu, Yin/Yang
- D. Order does not matter

Q6. How many total primary meridians make up the full 24-hour circadian clock?

- A. 10
- B. 12
- C. 14
- D. 15

LUNG & LARGE INTESTINE

Week 2

Q7. Per Dr. Zhang's own Quiz 2 review, what is the pertaining organ of the Large Intestine channel?

- A. Lung
- B. Stomach
- C. Large Intestine itself
- D. Small Intestine

Q8. Per Dr. Zhang's own Quiz 2 review, where does the Large Intestine channel's running course end?

- A. The index finger
- B. The opposite side of the nose (LI20)
- C. The corner of the mouth
- D. The ear

Q9. Per Dr. Zhang's own Quiz 2 review, what is the connecting organ of the Large Intestine channel?

- A. Lung
- B. Stomach
- C. Spleen
- D. Heart

Q10. Per Dr. Zhang's own Quiz 2 review, which meridian passes along the lateral-anterior aspect of the forearm?

- A. Lung (Hand Taiyin)
- B. Large Intestine (Hand Yangming)
- C. Heart (Hand Shaoyin)
- D. Small Intestine (Hand Taiyang)

Q11. [T/F] True or False: The Lung channel's pathway runs along the medial-anterior border of the upper limb.

- A. True
- B. False

Q12. [EXCEPT] All of the following are true about LI's crossing points EXCEPT:

- A. LI crosses GV14 Dazhui
- B. LI crosses GV26 Shuigou
- C. LI crosses ST4 Dicang
- D. LI has only 1 total crossing point

STOMACH & SPLEEN

Week 3

Q13. Per Dr. Zhang's own Quiz 3 review, does the Stomach meridian connect with the Lung?

- A. Yes, via a minor branch
- B. No - ST connects with the Spleen, not the Lung
- C. Yes, they share a crossing point
- D. The connection is only internal, not external

Q14. What is the pertaining organ of the Stomach channel?

- A. Spleen
- B. Stomach itself
- C. Large Intestine
- D. Small Intestine

Q15. [T/F] True or False: ST and SP both belong to the Earth element.

- A. True
- B. False

Q16. Where does the Stomach channel's pathway begin?

- A. ST1 Chengqi, below the eye
- B. LI20 Yingxiang, beside the nose (a crossing point)
- C. GV14 Dazhui
- D. ST36 Zusanli

Q17. Where does the Stomach channel's pathway end?

- A. ST36 at the knee
- B. ST45, at the lateral side of the 2nd toe
- C. ST25 at the umbilicus
- D. ST1 below the eye

Q18. [EXCEPT] All of the following are true of the Spleen channel EXCEPT:

- A. It has 21 acupoints
- B. It is a Foot Taiyin channel
- C. It connects to the Stomach
- D. It has 11 crossing points, the most of any channel

HEART & SMALL INTESTINE

Week 4

Q19. At which finger do the Heart and Small Intestine channels meet?

- A. The middle finger
- B. The ring finger
- C. The little finger
- D. The index finger

Q20. What is the pertaining organ of the Small Intestine channel?

- A. Heart
- B. Small Intestine itself
- C. Bladder
- D. Stomach

Q21. What is the connecting organ of the Heart channel?

- A. Small Intestine
- B. Bladder
- C. Pericardium
- D. San Jiao

Q22. [T/F] True or False: The Heart channel has zero crossing points.

- A. True
- B. False

Q23. SI's Lower He-Sea point sits on which channel?

- A. SI itself
- B. The Bladder channel
- C. The Stomach channel
- D. The Gallbladder channel

Q24. [EXCEPT] All of the following are true about HT and SI EXCEPT:

- A. HT has 9 points, SI has 19
- B. Both belong to the Fire element
- C. SI3 is a Confluent point
- D. SI3 opens the Ren Mai

CUMULATIVE / CROSS-CHANNEL

Weeks 1-4

Q25. Following the circadian clock, what comes immediately after Stomach and Spleen (7-11 AM)?

- A. Heart and Small Intestine (11 AM-3 PM)
- B. Bladder and Kidney (3-7 PM)
- C. Lung and Large Intestine (3-7 AM)
- D. Pericardium and San Jiao (7-11 PM)

Q26. Where do Foot Yang and Foot Yin meridians meet each other?

- A. The chest
- B. The face
- C. The toes
- D. The fingers

Q27. [T/F] True or False: LI4 and SP6 are both forbidden in pregnancy.

- A. True
- B. False

Q28. LI's Front-Mu point is ST25, located on which channel?

- A. LI's own channel
- B. The Stomach channel
- C. The Bladder channel
- D. The Spleen channel

SCORING GUIDE

25-28 correct	Exam ready. Do a final pass on the Special Points Decoder for each channel.
21-24 correct	Solid. Re-drill the specific sections you missed (see section headers above).
16-20 correct	Re-read the Cumulative Cram Sheet and Study Guide before the midterm.
Below 16	Full re-study needed - work back through each week's Study Guide in order.

Note: several ST/SP questions above are adapted from your verified Week 3 Quiz Kit, since Dr. Zhang confirmed the midterm reuses a number of quiz questions - review that kit's Set A/B once more too.

ANSWER KEY – FULL EXPLANATIONS

Score yourself first, then read explanations only for questions you missed or guessed on.

CHANNEL THEORY & CIRCADIAN CLOCK (Week 1)

Q1 D Where do Foot Yin and Hand Yin meridians meet each other?

Foot Yin meets Hand Yin at the chest – completing the full 12-channel loop. (Hand Yin meets Hand Yang at the fingers; Hand Yang meets Foot Yang at the face; Foot Yang meets Foot Yin at the toes.)

Q2 A True or False: Zang organs are Yin and Fu organs are Yang.

Zang (Lung, Heart, Spleen, Liver, Kidney, Pericardium) are the Yin/solid organs. Fu (Large Intestine, Small Intestine, Stomach, Gallbladder, Bladder, San Jiao) are the Yang/hollow organs.

Q3 C All of the following are Yang meridians EXCEPT:

Spleen (SP) is a Yin/Zang channel (Foot Taiyin). LI, ST, and SI are all Yang/Fu channels.

Q4 A LU and LI belong to which of the three circuits?

LU (Taiyin) and LI (Yangming) form the Anterior circuit, alongside ST and SP.

Q5 B Per Dr. Zhang's own Quiz 1 answer key, the three-part nomenclature is tested in which order?

Dr. Zhang's own confirmed answer key lists the three nomenclature features as Zang-Fu, Hand/Foot, Yin/Yang – a guaranteed-format question directly from her Quiz 1 review.

Q6 B How many total primary meridians make up the full 24-hour circadian clock?

12 Primary Meridians (3 Hand Yin + 3 Hand Yang + 3 Foot Yin + 3 Foot Yang), confirmed repeatedly across Dr. Zhang's quiz reviews as a guaranteed topic.

LUNG & LARGE INTESTINE (Week 2)

Q7 C Per Dr. Zhang's own Quiz 2 review, what is the pertaining organ of the Large Intestine channel?

Confirmed directly from the Quiz 2 review: the pertaining organ of a channel is its own organ – for LI, that is the Large Intestine itself. 'Pertains' and 'connects' are often confused; pertains = own organ, connects = paired organ.

Q8 B Per Dr. Zhang's own Quiz 2 review, where does the Large Intestine channel's running course end?

Confirmed directly from lecture: LI's pathway ends at LI20 Yingxiang, beside the nostril – on the OPPOSITE side of the body from where the branch crossed at the philtrum.

Q9 A Per Dr. Zhang's own Quiz 2 review, what is the connecting organ of the Large Intestine channel?

Confirmed directly from lecture: LI's connecting organ is the Lung – its interior-exterior paired organ.

Q10 B Per Dr. Zhang's own Quiz 2 review, which meridian passes along the lateral-anterior aspect of the forearm?

Confirmed directly from lecture: the Large Intestine (Hand Yangming) channel runs along the lateral-anterior forearm. LU runs the MEDIAL-anterior forearm – the two are easy to swap on an exam.

Q11 A True or False: The Lung channel's pathway runs along the medial-anterior border of the upper limb.

Confirmed directly from lecture: LU's exterior course runs the medial-anterior border of the arm – anterior because it's part of the Anterior circuit, medial because it's a Yin channel.

Q12 D All of the following are true about LI's crossing points EXCEPT:

Confirmed directly from lecture: LI has FOUR crossing points (GV14, GV26, ST4, and a Small Intestine channel point near the face) – not just one. This is more crossing points than any other channel covered so far except ST.

STOMACH & SPLEEN (Week 3)

Q13 B Per Dr. Zhang's own Quiz 3 review, does the Stomach meridian connect with the Lung?

Dr. Zhang specifically flagged this as a common misconception during the Quiz 3 review: the Stomach channel does NOT connect with the Lung. ST's connecting organ is the Spleen (its interior-exterior pair).

Q14 B What is the pertaining organ of the Stomach channel?

Following the same pattern as LI: the pertaining organ is always the channel's own organ. For ST, that's the Stomach itself; the Spleen is only the connecting (paired) organ.

Q15 A True or False: ST and SP both belong to the Earth element.

ST (Foot Yangming) and SP (Foot Taiyin) form the Earth-element interior-exterior pair, active mid-morning (ST 7-9 AM, SP 9-11 AM).

Q16 B Where does the Stomach channel's pathway begin?

The ST pathway actually originates at LI20, a crossing point of the LI channel on the face - ST1 is simply the first numbered point along the pathway that follows, not the true starting point.

Q17 B Where does the Stomach channel's pathway end?

ST45 Lidui, at the lateral side of the tip of the 2nd toe, is the last point of the Stomach channel - handing off to the Spleen channel, which begins at the big toe (SP1).

Q18 D All of the following are true of the Spleen channel EXCEPT:

SP has 6 crossing points, not 11 - the ST channel is the one with 11 crossing points (the most of any primary channel). Don't confuse the two Earth-element partners' crossing-point counts.

HEART & SMALL INTESTINE (Week 4)**Q19 C At which finger do the Heart and Small Intestine channels meet?**

HT9 and SI1 meet at the LITTLE finger - the correct, verified answer (a lecture transcript passage that seemed to say 'middle finger' was a transcription error; the little-finger meeting point is independently confirmed in the existing Midterm Cram Sheet).

Q20 B What is the pertaining organ of the Small Intestine channel?

Same pattern as every other channel: the pertaining organ is always the channel's own organ. The Heart is only SI's connecting (paired) organ.

Q21 A What is the connecting organ of the Heart channel?

HT's connecting organ is the Small Intestine - its Fire-element interior-exterior pair.

Q22 A True or False: The Heart channel has zero crossing points.

Confirmed and unique: HT is the only one of the 12 primary channels with no crossing points on its external pathway.

Q23 C SI's Lower He-Sea point sits on which channel?

SI's Lower He-Sea is ST39 Xiajuxu, located on the Stomach channel - not on SI itself. Lower He-Sea points for the six Fu organs all sit on the leg-Yang channels.

Q24 D All of the following are true about HT and SI EXCEPT:

SI3 Houxi opens the DU MAI, not the Ren Mai. This is a frequently confused pairing - remember SI3 pairs with BL62 to open the Du Mai.

CUMULATIVE / CROSS-CHANNEL (Weeks 1-4)**Q25 A Following the circadian clock, what comes immediately after Stomach and Spleen (7-11 AM)?**

The full sequence is LU-LI-ST-SP-HT-SI-BL-KI-PC-SJ-GB-LR. After SP (9-11 AM) comes HT (11 AM-1 PM), then SI (1-3 PM) - the Fire pair opening the Posterior Circuit.

Q26 C Where do Foot Yang and Foot Yin meridians meet each other?

Foot Yang meets Foot Yin at the toes (e.g., ST45 to SP1). Foot Yin then continues to meet Hand Yin at the chest, completing the loop.

Q27 A True or False: LI4 and SP6 are both forbidden in pregnancy.

Within the Weeks 1-4 scope, these are the only two points carrying a pregnancy-forbidden flag: LI4 (Hegu) and SP6 (Sanyinjiao) - both have strong Qi/Blood-moving, descending actions.

Q28 B LI's Front-Mu point is ST25, located on which channel?

LI's Front-Mu is ST25 Tianshu, on the STOMACH channel - not on LI itself. Contrast this with LU, which has its OWN Front-Mu at LU1.
