

TODAY / TOMORROW

One Study Roadmap, Two Different Modes

BL/KI quiz tonight -> PC/SJ/GB/LR loading begins tomorrow

TODAY - THROUGH 9 AM QUIZ

- Mode: retrieval-first, narrow, cold
- Subject: BL + KI only
- Goal: pass tomorrow's 9 AM quiz
- Tool: Retrieval Drill + Quiz Kit
- Ends: 10:00 PM sharp, then sleep

TOMORROW - AFTER THE QUIZ

- Mode: reference-first, broad, unhurried
- Subject: PC, SJ, GB, LR (Week 6)
- Goal: load new material with real runway
- Tool: Week 6 Prep Guide + Study Guide
- Starts: once the quiz is behind you

WHY THE MODE SWITCHES:

Today is retrieval-first, narrow, and cold - you're locking in BL/KI under time pressure. Tomorrow shifts to reference-first and broad - you're loading new PC/SJ/GB/LR material with normal runway, not cramming it. Don't try to do tomorrow's work tonight; the two days call for different modes.

TODAY - THROUGH THE 9 AM QUIZ

Wk5 -> Wk6

Retrieval-first, cold, BL/KI only

Print Edition

6:25-7:15 PM

Orient - Reload Context

Use: Study Guide + Special Points Decoder

Skim once. Reactivate what you already know - don't try to learn new material yet.

7:15-8:15 PM

BL Retrieval, Cold

Use: Retrieval Drill p.2-3 -> check p.7

Cover the answers. Write from memory first. Extra time on gold-dot points + full Back-Shu spinal order.

8:15-8:50 PM

KI Retrieval, Cold

Use: Retrieval Drill p.4 -> check p.8

Same cold-first process. KI is smaller - should move faster.

8:50-9:20 PM

Trap Drill + Command Points + Confluent Pairs

Use: Retrieval Drill p.5-6 -> check p.9

BL62 vs KI6, forbidden-in-pregnancy list, command points - the classic quiz trip-ups.

9:20-9:50 PM

Re-Drill Only Your Misses

Use: Whatever you got wrong above

Don't redo everything. This 30 min is the highest-yield block of the night.

9:50-10:00 PM

Circadian Clock, One Cold Pass

Use: Retrieval Drill p.6

BL 3-5pm, KI 5-7pm, anchored against the full 12-organ clock.

10:00 PM

STOP. Sleep.

Use: -

Memory consolidates during sleep. This is not optional if you want tomorrow's recall to work.

7:00-7:30 AM

Light Final Pass

Use: Only remaining weak points from last night

No new material - confidence calibration only.

9:00 AM

QUIZ - BL/KI

Use: -

Trust the prep. Read each question fully before answering.

TOMORROW - AFTER THE QUIZ

Wk5 -> Wk6

Reference-first, unhurried, PC/SJ/GB/LR begins

Print Edition

Quiz debrief (same day, once graded)

Use: Review any missed questions against Retrieval Drill Answer Key p.7-9

Same principle as your Wk2/Wk4 debriefs - a miss now is exactly where a gap still exists.

PC overview - 9 points, HIGH yield

Use: Week 6 Prep Guide (already built) + Study Guide once available

PC has zero crossing points - a known exam trap mirroring HT's pattern. PC6 (confluent+nausea), PC7 (yuan/ghost), PC8.

SJ overview - 23 points

Use: Week 6 Prep Guide

SJ5 (confluent Yang Wei, exterior wind-heat), SJ17, SJ21, SJ23.

GB overview begins - 44 points, complex pathway

Use: Week 6 Prep Guide

GB20 (wind gate), GB21 (FORBIDDEN in pregnancy - add to your cumulative list). Note: GB crossing-points slide has an unresolved 12-pts/6-meridians vs 9-named discrepancy - flag with Dr. Zhang before treating as settled.

LR overview - 14 points

Use: Week 6 Prep Guide

LR3 (yuan, smooths qi), LR8 (he-sea), LR13 (front-mu SP, hui-meeting Zang).

Cumulative 40-question mixed drill

Use: Master Comparison thru Week 5 + Quiz Kit format

All channels open through GB/LR - run a full cross-channel drill before Quiz 4/Week 6 class.

FILE INDEX - WHICH DOCUMENT, WHICH DAY

Wk5 -> Wk6

Everything you have, sorted by when to open it

Print Edition

OPEN TODAY

- AC300_Week5_RetrievalDrill (primary tool tonight)
- AC300_Week5_QuizNightPlan (hour-by-hour + theory)
- AC300_Week5_StudyGuide (reference, orient block only)
- AC300_Week5_SpecialPointsDecoder (reference, orient block only)
- AC300_Week5_QuizKit (optional - timed practice run if time allows)

OPEN TOMORROW (POST-QUIZ)

- AC300_Week6_PrepGuide (already built - PC/SJ/GB/LR Sections A-F)
- AC300_Week5_MasterComparison_ThruWeek5 (cumulative cross-week reference)
- AC300_Week5_Flashcards / Anki set (fold PC/SJ/GB/LR in as it's built)
- AC300_Week5_ClassMuddiestPointPool (log anything still unclear post-quiz)

DON'T OPEN UNTIL LATER THIS WEEK

- AC300_Week5_PracticeDraw (pathway drawing - after core recall is solid, not during cram)
- AC300_Week5_PrepGuide Inter-Quiz (best used earlier in the week, not night-before)
