THREE CIRCUITS -- exam-safety naming

This week completes the THIRD and final circuit: the Middle Circuit = PC + SJ + GB + LR, all four of this week's channels (transcript, describing GB/LR: 'it's a totally middle circuit'). This matches the pattern from earlier weeks: Anterior Circuit = LU+LI+ST+SP (Weeks 2-3); Posterior Circuit (also called Inner Circuit on earlier slide versions) = HT+SI+BL+KI (Weeks 4-5, already complete). Exam safety: GB/LR belong to the MIDDLE circuit, not the Posterior one -- do not confuse with BL/KI's circuit.

Reminder: a Crossing/Meeting Point is a point where two channels' pathways physically cross or touch -- a topographical fact, not one of the 14 special-point categories. Full definition on the PC page.

Point Combinations -- GB · LR (this week) + PC (carried forward)

PC

PC6 + SP4

The linked-vessel pair -- both are Luo + Confluent points opening related Extraordinary Vessels (Yin Wei Mai + Chong Mai). Classic combination for chest, heart, stomach, and epigastric disorders.

PC7 + HT7

Shu-Stream/Yuan-Source points of the two Fire-family Yin hand channels -- combined to calm the Shen; anxiety, insomnia, palpitations.

PC3 + LU5

He-Sea points of neighboring Yin hand channels at the elbow -- combined to clear heat and descend rebellious Qi from the chest.

PC8 Laogong

One of the classical 13 Ghost Points (Sun Simiao) -- used alone or with other Ghost Points for severe mental-emotional disturbance.

GB

GB34 + LR3

He-Sea/Hui-Meeting of Sinews + Yuan-Source of the paired Liver channel -- combined for tendon/sinew disorders with a Liver-Qi component, e.g. tight/spasming muscles.

GB20 + GB21

Two of the most-used GB points together -- head/neck tension and headache with shoulder involvement.

GB41 + SJ5

The confluent-point pair that opens the Dai Mai + Yang Wei Mai -- treats conditions along the flank/waist and alternating chills and fever together.

GB34 + BL18

Hui-Meeting of Sinews + Liver's Back-Shu -- classic combination for hypochondriac pain and jaundice-type presentations.

LR

LR3 + LI4

The 'Four Gates' (Si Guan) -- pairs the Yuan-Source points of LR and LI. Smooths Liver Qi, moves Qi and Blood broadly; used for pain of many origins.

LR3 + SP6

Both regulate Liver Blood and the lower jiao -- common combination for menstrual and gynecological disorders.

LR14 + LR13

LR's own Front-Mu plus SP's Front-Mu (which LR13 also serves, as Hui-Meeting of Zang) -- used together for Liver-Spleen disharmony.

LR8 + KI10

He-Sea points of neighboring Yin foot channels at the knee -- nourish Liver and Kidney Yin/Blood together ('Liver and Kidney share the same source').

PC and HT are the ONLY 2 primary channels with ZERO crossing points.

PC6 Neiguan opens Yin Wei Mai (pairs SP4); SJ5 Waiguan opens Yang Wei Mai (pairs GB41) -- do not swap these.

SJ5 (Yang Wei) and GB41 (Dai Mai) are BOTH confluent points introduced this week -- 4 of the 8 total confluent points are now covered (SP4/PC6, SI3/BL62 from earlier weeks + SJ5, GB41).

GB is the 3rd largest channel (44 pts) -- after BL (67) and ST (45). Don't confuse with SJ (23).

GB21 is FORBIDDEN in pregnancy -- same trap category as LI4 and SP6.

GB34 = He-Sea AND Hui-Meeting for Sinews/Tendons -- dual designation, easy to under-count on an exam.

GB crossing point count is UNRESOLVED (12 vs 9 named) -- if tested, defer to what Dr. Zhang confirms in class.

LR is the ONLY primary channel reaching the VERTEX (GV20) -- vertex headache = Liver channel.

LR crosses IN FRONT of SP at 8 cun above the medial malleolus -- the one exception to the normal leg-Yin channel order.

LR3 + LI4 = 'Four Gates' -- classic pairing to move Qi/Blood, taught this week.

SJ crosses IN FRONT of GB at the neck/shoulder, then crosses BEHIND GB again before the supraclavicular fossa -- they cross each other TWICE in that region.

LR13 Zhangmen has a DOUBLE special-point status: Front-Mu of SPLEEN + Hui-Meeting of all 5 ZANG. Common exam mix-up.

Active-hours clock this week: PC 7-9PM, SJ 9-11PM, GB 11PM-1AM, LR 1-3AM -- consecutive 2-hour blocks moving toward dawn.

Quiz 4 (in-class this week) tested BL/KI (last week's material) -- Quiz 5 (next week) tests THIS week's PC/SJ/GB/LR.
