

Master Channel Comparison

All 12 Primary Channels -- Through Week 6 (COMPLETE)

LU+LI+ST+SP+HT+SI+BL+KI+PC+SJ+GB+LR = 361 points

This is a CUMULATIVE reference -- it grows every week. Use it to keep the whole map straight once individual weekly Study Guides start blurring together. As of Week 6, all three circuits and all 12 primary channels are complete.

This Document Covers

- Full attribute table -- all 12 channels, side by side (element, peak, points, special points)
- Anterior (LU-LI-ST-SP), Posterior/Inner (HT-SI-BL-KI), and Middle (PC-SJ-GB-LR) circuit maps -- all 3 now complete
- Cross-week trap notes -- recurring connection/circuit errors across all 12 channels
- Forbidden-in-pregnancy points, consolidated across all channels taught
- All 8 Confluent points (Eight Extraordinary Vessels) -- now fully paired and finalized

Content verified against AC300 Channel Workbook v28, Weeks 2-6 lecture transcripts/slides, and this project's own Study Guide data. Nothing here is guessed -- flag any discrepancy for Dr. Zhang.

Full Attribute Table -- All 12 Channels

	LU	LI	ST	SP	HT	SI	BL	KI	PC	SJ	GB	LR

Circuits Mapped -- All 3 Complete

Anterior Circuit (Weeks 2-3)

LU -> LI -> ST -> SP — chest->hand->head->foot->chest

Posterior (Inner) Circuit (Weeks 4-5)

HT -> SI -> BL -> KI — chest->hand->head->foot->chest

Middle Circuit (Week 6) -- NEW, completes all 12 channels

PC -> SJ -> GB -> LR — chest->hand->head->foot->chest (transcript: 'a totally middle circuit')

Cross-Week Trap Notes & Forbidden-in-Pregnancy

Recurring Connection Traps

! LI connects to STOMACH (not Spleen) -- LI's branch ends beside the nose (LI20) where ST begins.
 ! SP connects to HEART (not LI) -- SP's internal branch goes stomach->diaphragm->heart, linking HT.
 ! BL connects to KIDNEY (not Lung) -- confirmed exam trap; do not confuse with the Metal-element pathway.
 ! KI connects to PERICARDIUM (not Lung) -- KI's branch from the Lung joins the Heart then links PC, opening Week 6.
 ! Only ST passes through the NIPPLE. Only SP spreads over the LOWER surface of the tongue. Only KI reaches the tongue ROOT via a re-emerging branch.
 ! UPPER teeth/gums = ST channel. LOWER teeth/gums = LI channel. Reversing these is a classic trap.
 ! SP is the ONLY channel with a distribution exception (crosses in front of LR above 8 cun from medial malleolus).
 ! PC and HT are the ONLY 2 primary channels with ZERO crossing points.
 ! GB and SJ (both Shaoyang) cross each other TWICE at the shoulder -- GB in front, then behind.
 ! GB and LR belong to the MIDDLE Circuit (Week 6) -- NOT the Posterior Circuit (HT/SI/BL/KI). Easy to mix up.
 ! Yuan-Source = Shu-Stream on every YIN channel (LU9, SP3, HT7, KI3, PC7, LR3) -- never true on Yang channels.

Forbidden in Pregnancy -- All Channels Taught So Far

LI4	Hegu	Command point face/mouth; strong descending/moving action
SP6	Sanyinjiao	3-Yin meeting point; strong descending/moving action on the uterus
BL60	Kunlun	Historically listed forbidden; strong distal action
BL67	Zhiyin	Used deliberately to correct fetal malposition/induce labor -- forbidden otherwise
GB21	Jianjing	Strong descending action, can induce labor -- new this week (Wk6)

Confluent Points -- Eight Extraordinary Vessels -- ALL 8 NOW COMPLETE

LU7 Lieque	Ren Mai (Conception Vessel)	Paired with KI6
KI6 Zhaohai	Yin Qiao Mai (Yin Heel Vessel)	Paired with LU7
SI3 Houxi	Du Mai (Governing Vessel)	Paired with BL62
BL62 Shenmai	Yang Qiao Mai (Yang Heel Vessel)	Paired with SI3
SP4 Gongsun	Chong Mai (Penetrating Vessel)	Paired with PC6
PC6 Neiguan	Yin Wei Mai (Yin Linking Vessel)	Paired with SP4
SJ5 Waiguan	Yang Wei Mai (Yang Linking Vessel)	Paired with GB41
GB41 Zulinqi	Dai Mai (Belt Vessel)	Paired with SJ5
