

Practice Draw

Pericardium, San Jiao, Gallbladder & Liver Channels — Week 6

Production recall — draw it cold, then check

Recognizing the right MCQ answer and producing a pathway from memory are different skills. Dr. Zhang's homework rule: draw BOTH the internal AND external pathways for every meridian -- most students only draw the external. Use the faint figure as a guide only: trace it once to build muscle memory, then try the blank version from memory and check yourself against the Study Guide.

"PC/SJ/GB/LR each get a full practice pass this week."

Two passes per channel: (1) trace the faint figure, (2) redraw from memory on blank paper.

Practice Draw — The Pericardium Meridian of Hand-Jueyin 9 points | 2 branches | chest to hand

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.

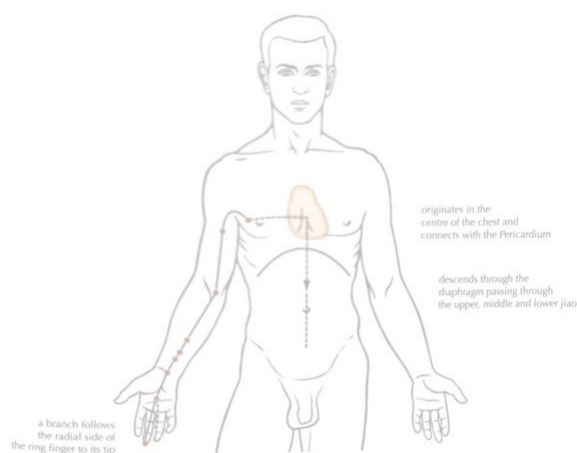

The faint figure is a guide only – trace, then check against the Study Guide overview pages.

CHECKLIST

1. Draw the INTERNAL pathway (dotted): chest -> Pericardium -> San Jiao (upper/middle/lower)
2. Draw the EXTERNAL pathway (solid): PC1 (chest) -> axilla -> PC3 (elbow) -> PC7 (wrist) -> PC8 (palm) -> PC9 (fingertip)
3. Mark the branch: PC8 -> ring finger tip -> links with SJ
4. Label special points: PC7 (Yuan+Shu), PC6 (Luo+Confluent), PC3 (He-Sea), PC4 (Xi-Cleft)
5. Note: ZERO crossing points -- nothing else to mark on this channel

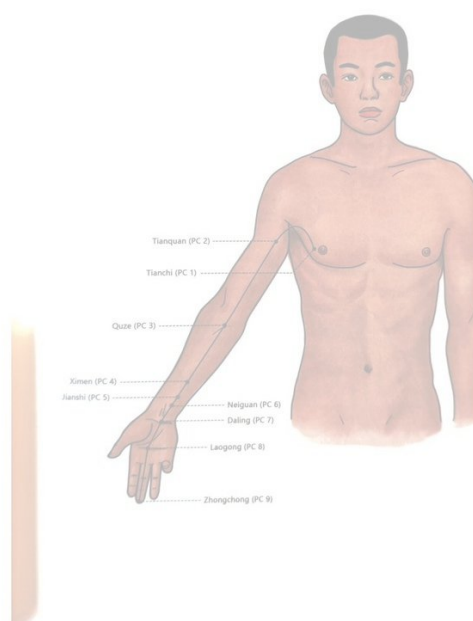

Pericardium Channel

THE PERICARDIUM CHANNEL OF HAND JUEYIN

The Pericardium primary channel

Col. Fig. 10 The Pericardium Meridian of Hand Jueyin

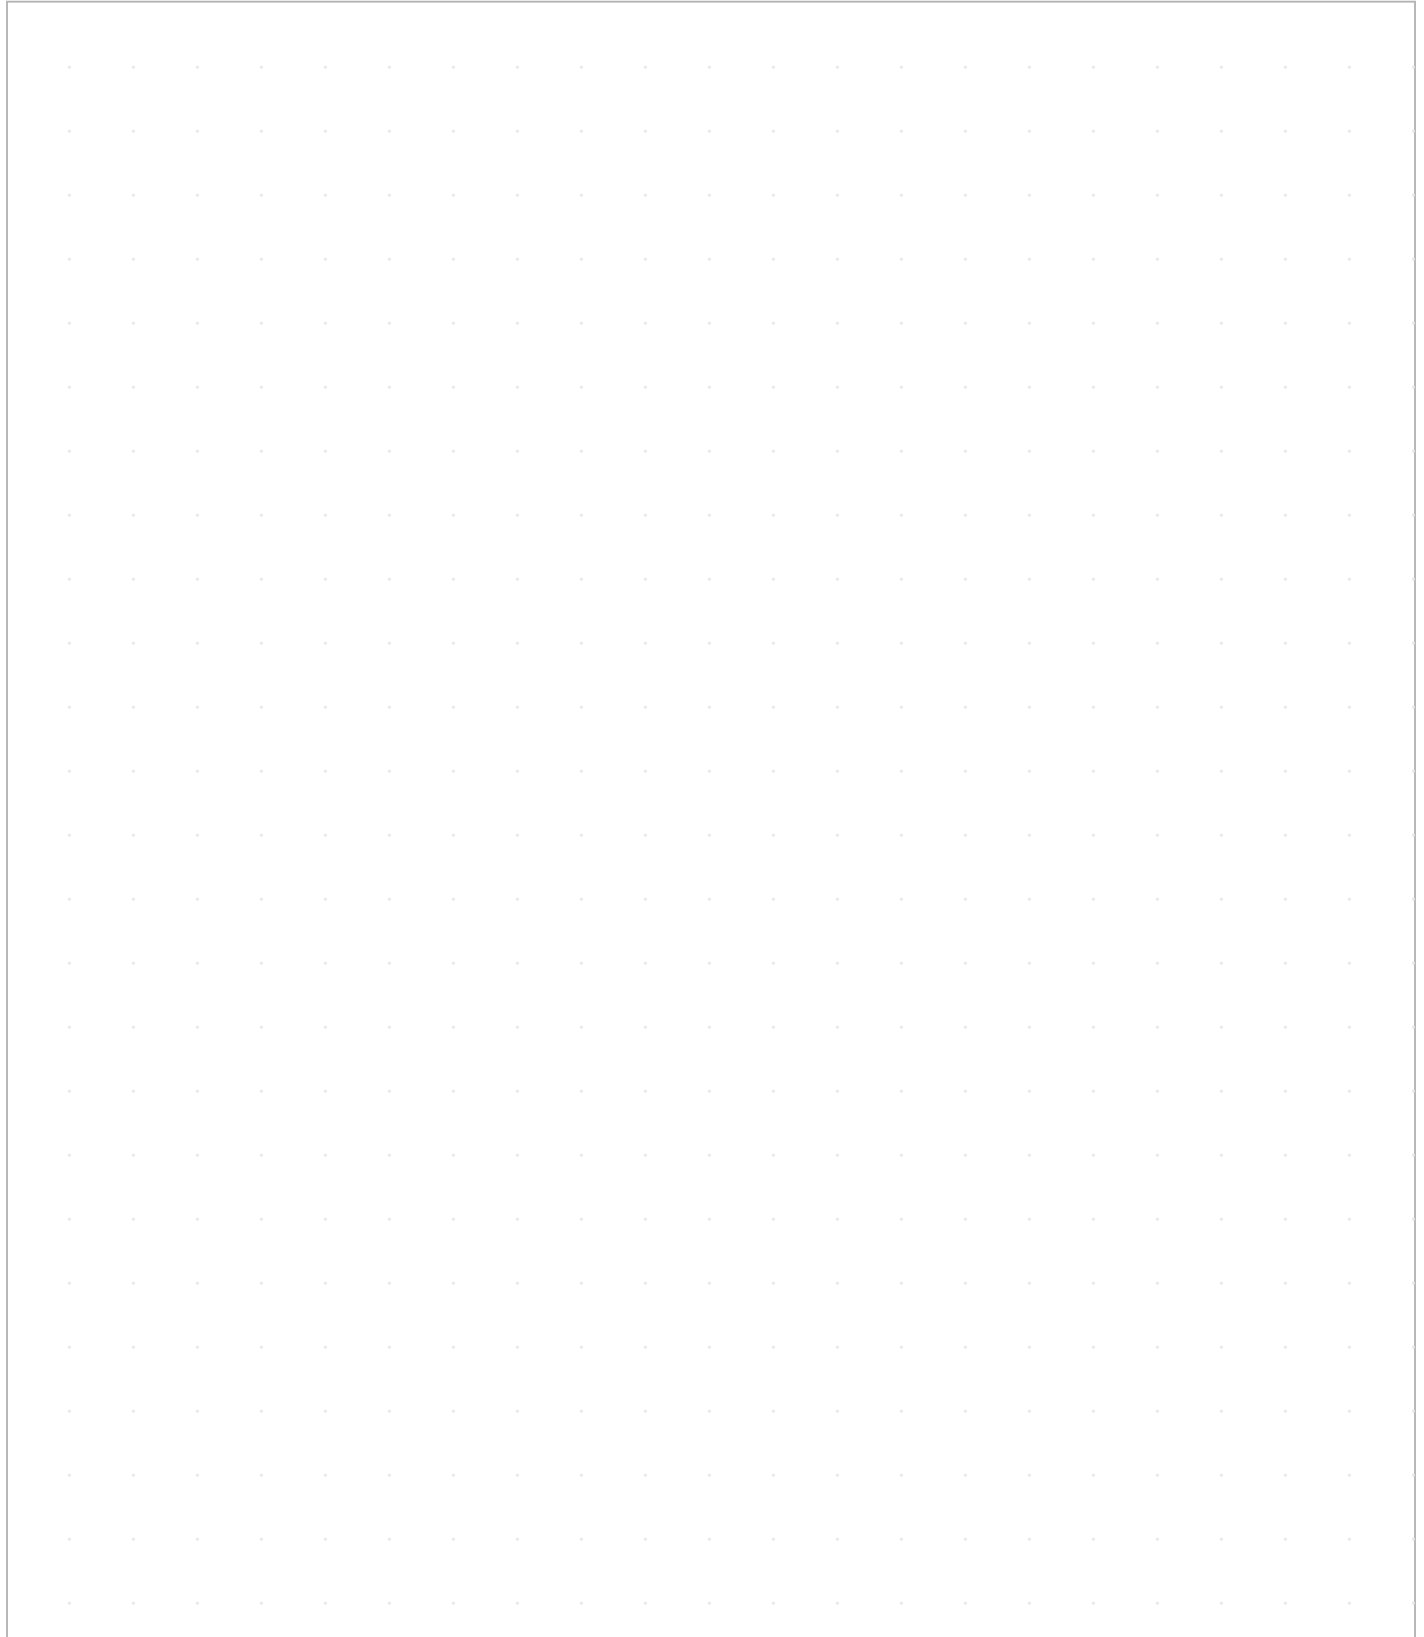

TOP: MOA (internal) | BOTTOM: CAM (external) – trace, label, check

Blank Recall — The Pericardium Meridian of Hand-Jueyin

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.
The faint figure is a guide only – trace, then check against the Study Guide overview pages.

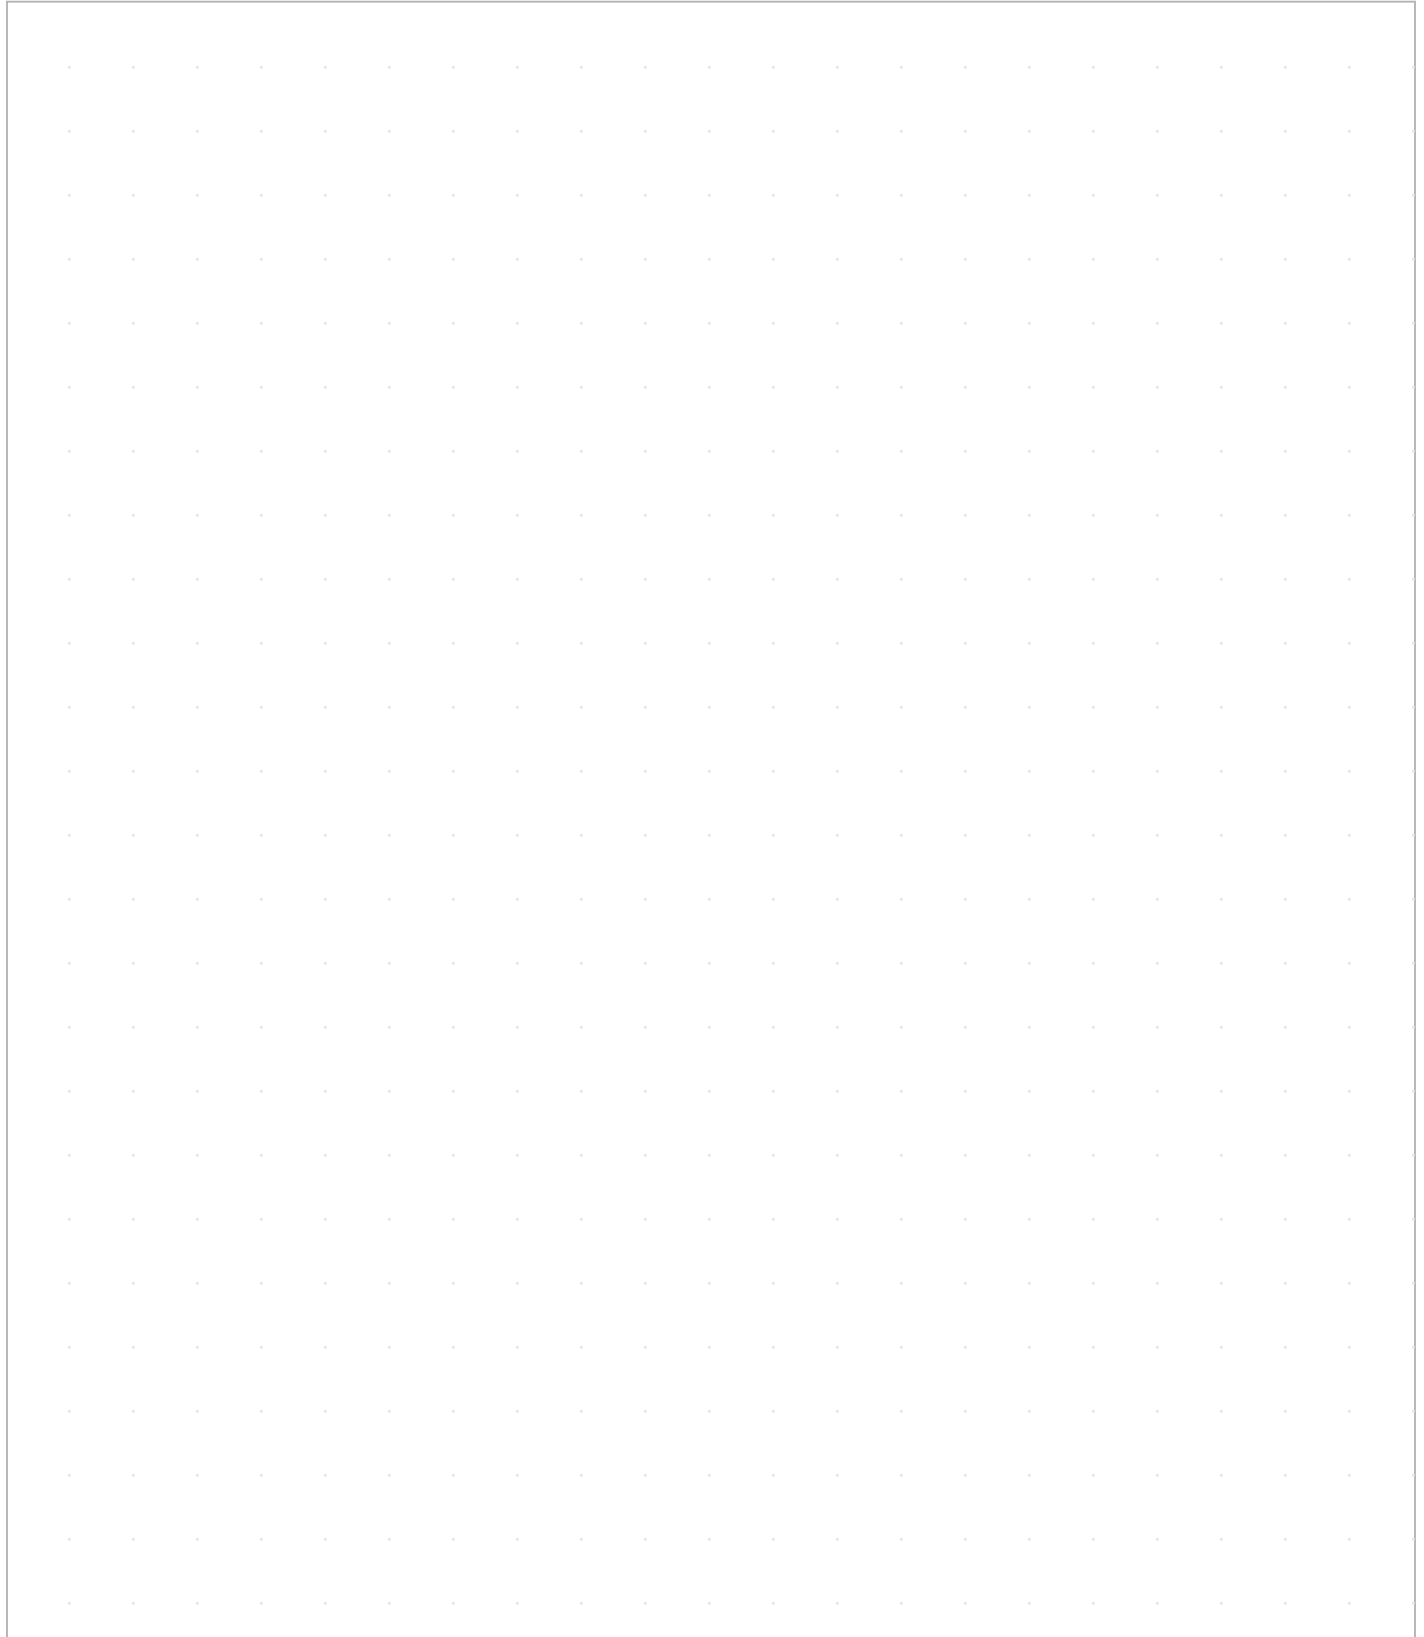

1. Draw the INTERNAL pathway: chest -> San Jiao (upper/middle/lower) -> connects with Pericardium
2. Draw the EXTERNAL pathway: SJ1 (ring finger) -> wrist -> elbow -> shoulder (crosses behind GB) -> SJ17/21 (ear) -> SJ23 (eyebrow)
3. Mark where SJ crosses GB TWICE at the shoulder region
4. Label special points: SJ4 (Yuan), SJ5 (Luo+Confluent, opens Yang Wei Mai), SJ10 (He-Sea)
5. Mark the branch to the outer canthus, linking with GB

Blank Recall — The San Jiao Meridian of Hand-Shaoyang

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).

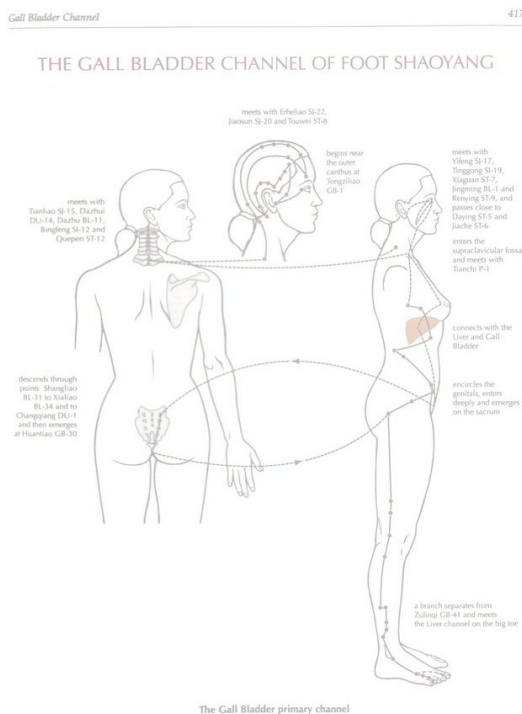

Practice Draw — The Gallbladder Meridian of Foot-Shaoyang 44 points | 5 branches | head to foot

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.

The faint figure is a guide only – trace, then check against the Study Guide overview pages.

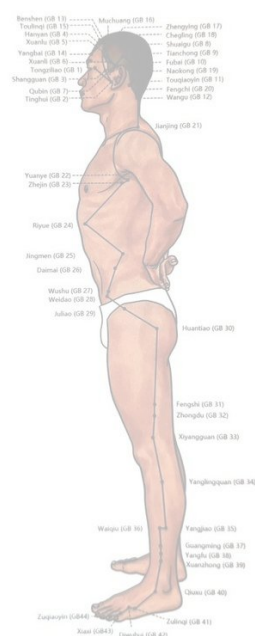

CHECKLIST

1. Draw the zigzag HEAD course first (GB1 -> GB4 -> GB20) -- this is GB's signature feature
2. Draw the INTERNAL pathway: supraclavicular fossa -> diaphragm -> Liver -> Gallbladder -> hip (GB30)
3. Draw the EXTERNAL/straight pathway: shoulder -> axilla -> floating ribs (GB24-25) -> hip -> knee -> GB34 -> GB40 -> GB44
4. Mark GB21 with a warning symbol (FORBIDDEN in pregnancy)
5. Label special points: GB34 (He-Sea + Hui-Meeting Sinews), GB40 (Yuan), GB41 (Confluent, opens Dai Mai)
6. Mark the branch: dorsum of foot -> great toe -> links with LR

The Gall Bladder primary channel

Col. Fig. 12 The Gallbladder Meridian of Foot-Shaoyang

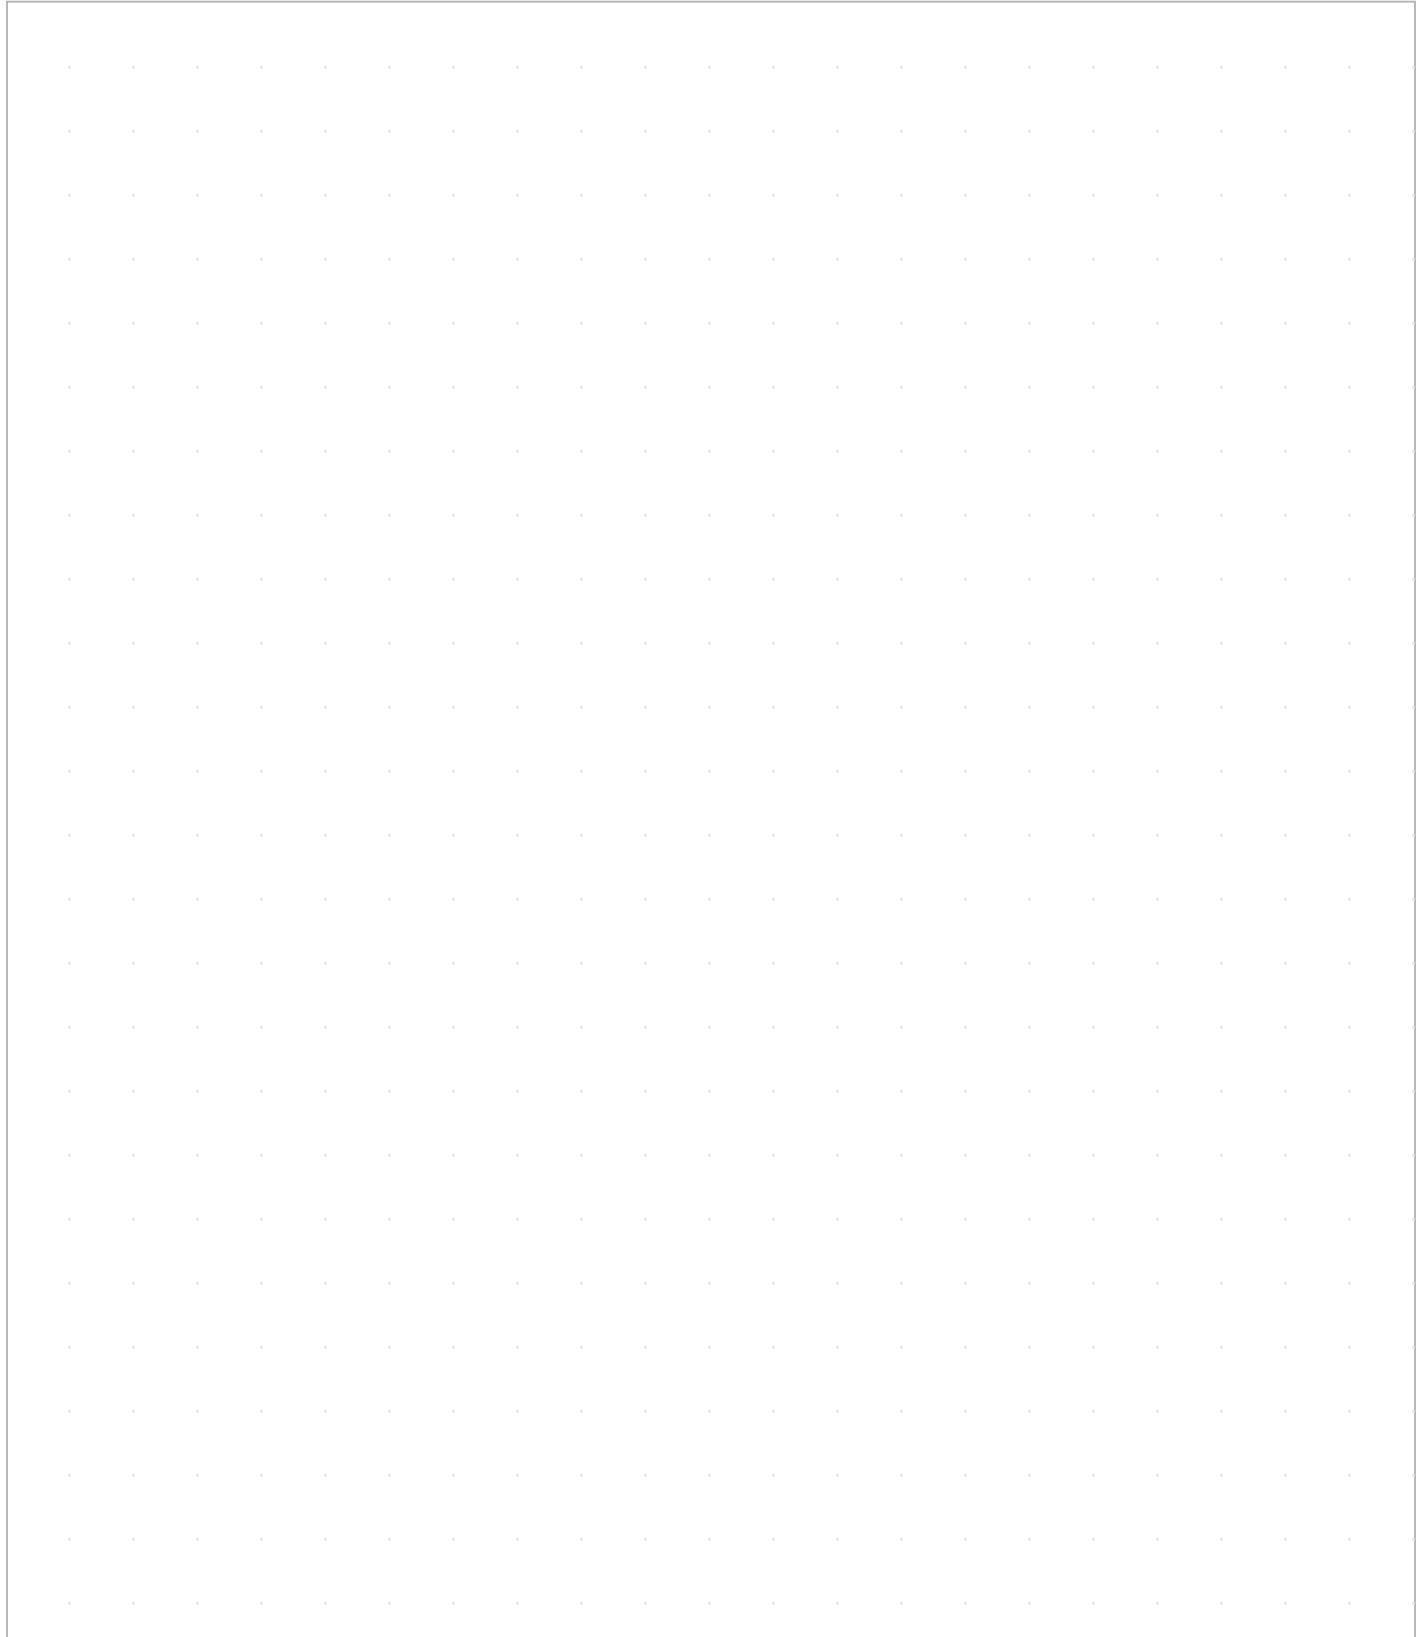

TOP: MOA (internal) | BOTTOM: CAM (external) – trace, label, check

Blank Recall — The Gallbladder Meridian of Foot-Shaoyang

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).

Practice Draw — The Liver Meridian of Foot-Jueyin

14 points | 3 branches | foot to chest

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.

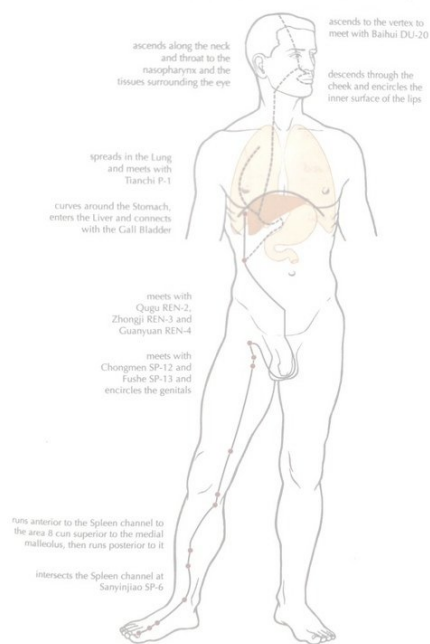

The faint figure is a guide only – trace, then check against the Study Guide overview pages.

CHECKLIST

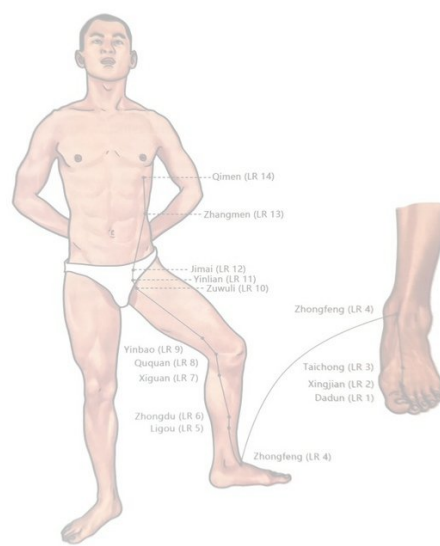

1. Draw the INTERNAL pathway: foot -> 8 cun above medial malleolus (crosses IN FRONT of SP here) -> genitals -> Liver -> Gallbladder
2. Draw the EXTERNAL pathway: LR1 (great toe) -> ankle -> knee (LR8) -> genital region -> LR13/LR14 (ribs)
3. Draw the VERTEX branch: eye system -> forehead -> GV20 (vertex) -- the only channel that reaches here
4. Label special points: LR3 (Yuan+Shu), LR8 (He-Sea), LR13 (Front-Mu SP + Hui-Meeting Zang), LR14 (Front-Mu LR)
5. Mark the final internal branch: Liver -> diaphragm -> Lung, completing the 12-channel cycle

Liver Channel

THE LIVER CHANNEL OF FOOT JUEYIN

Col. Fig. 13 The Liver Meridian of Foot Jueyin

TOP: MOA (internal) | BOTTOM: CAM (external) – trace, label, check

Blank Recall — The Liver Meridian of Foot-Jueyin

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).
