CHANNEL THEORY – CORE RULES

Nomenclature (3 parts)

Hand/Foot (location) + Yin/Yang (medial/lateral, nature) + Zang/Fu (pertaining organ, function)

Qi circulation direction

Hand Yin: chest -> hand | Hand Yang: hand -> head | Foot Yang: head -> foot | Foot Yin: foot -> abdomen/chest

Hand Yin / Hand Yang meet

At the fingers (e.g. LU7 -> LI1 branch meets at index finger)

12 Primary Meridians

3 Hand Yin + 3 Hand Yang + 3 Foot Yin + 3 Foot Yang = 12. Plus 8 Extraordinary Vessels, 15 Luo-connecting, divergent + sinew + cutaneous channels.

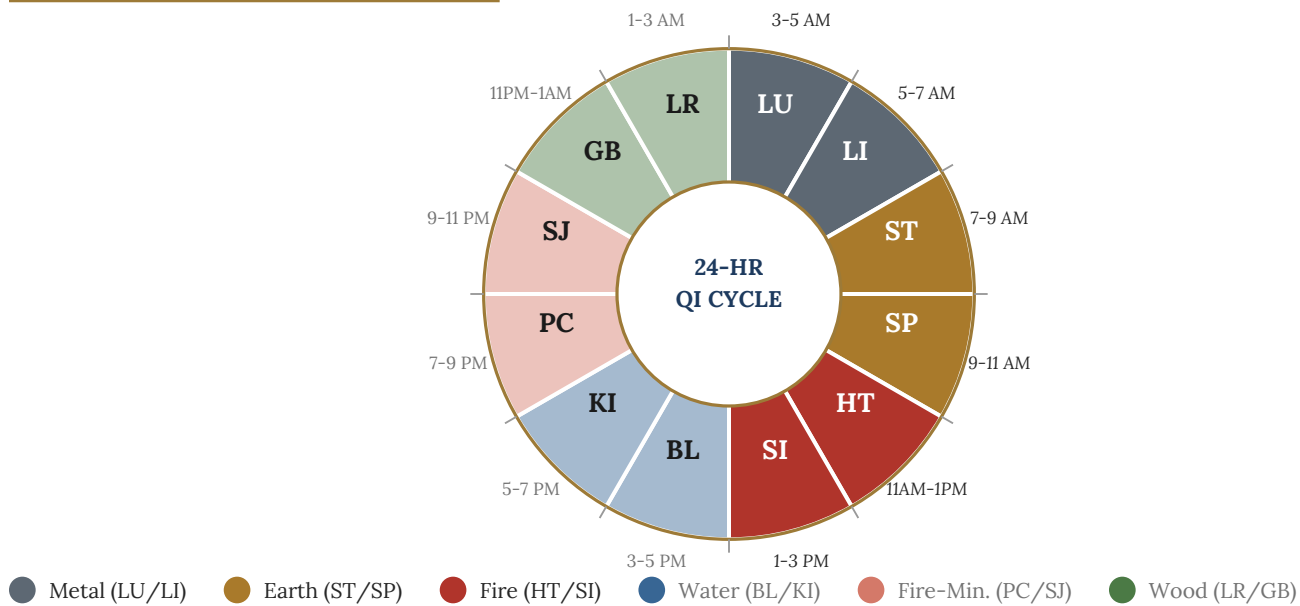

Zang-Fu pairing logic

Each Yin (zang) channel pairs with one Yang (fu) channel; paired channels treat each other's organ symptoms (e.g. LU constipation -> use LI points).

Hand Yang distribution

Anterior = Yangming, Middle = Shaoyang, Posterior = Taiyang (also applies conceptually to Foot Yang).

CIRCADIAN CLOCK – 24-HOUR QI CYCLE

Paired organs sit in adjacent clock slots (LU/LI, ST/SP, HT/SI) – the Qi circulation chain flows straight from one into the next. Muted wedges (BL/KI/PC/SJ/GB/LR) are covered in later weeks.

TAIYIN, YANGMING, SHAOYIN, TAIYANG, JUEYIN, SHAOYANG

The 3 circuits from Week 1, and where Weeks 1-4 sit inside the full 12-channel picture.

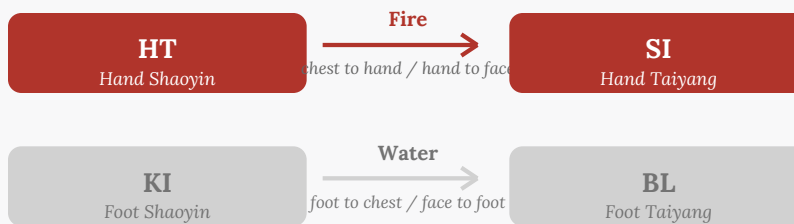

Posterior Circuit = also called Inner Circuit

Dr. Zhang's slides use "Anterior/Posterior/Middle Circuit" as the primary names, but the Posterior Circuit has also been labeled "Inner Circuit" on earlier slide versions – both terms may come up verbally or on the exam, so know both.

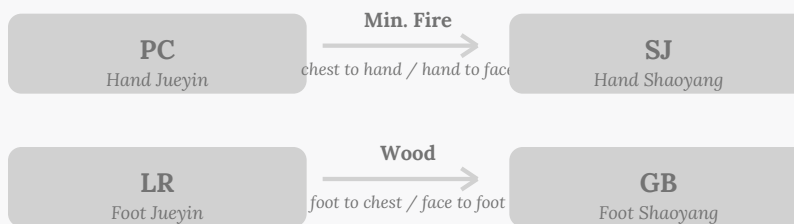

ANTERIOR CIRCUIT (Taiyin / Yangming) – fully covered, Weeks 1-4

POSTERIOR CIRCUIT (Shaoyin / Taiyang) – half covered: HT/SI now, BL/KI Week 5

MIDDLE CIRCUIT (Jueyin / Shaoyang) – not yet covered, Week 6

WHAT EACH NAME MEANS

Term	Literal meaning	Circuit	Hand/Foot organs
Taiyin	Greater Yin	Anterior	LU / SP
Yangming	Yang Brightness	Anterior	LI / ST
Shaoyin	Lesser Yin	Posterior	HT / KI
Taiyang	Greater Yang	Posterior	SI / BL
Jueyin	Terminal / Reverting Yin	Middle	PC / LR
Shaoyang	Lesser Yang	Middle	SJ / GB

SPECIAL POINT CATEGORIES

What each category means, and where you've already seen it in Weeks 1-4.

The Five Shu Points – Jing-Well through He-Sea below – are their own named group per Dr. Zhang's slides.

Category	What it means	Examples (Wk 1-4)
Jing-Well	"Where it emerges" – distal-most point (fingertip/toenail); channel's start/end; first aid, clears heat, relieves pain	LU11, HT9, LI1, ST45, SP1, SI1
Ying-Spring	"Where it flows" – before the MCP/MTP joint; treats feverish diseases, heat-related disorders	LU10, LI2, ST44, SP2, HT8, SI2
Shu-Stream	"Where it pours" – after the MCP/MTP joint; treats heaviness in the body, joint pain, pain syndromes	LU9(Yuan), LI3, ST43, SP3(Yuan), HT7(Yuan), SI3(Confluent)
Jing-River	"Where it travels" – on the forearm/lower leg; treats externally contracted disease (colds, flu), cough, asthma	LU8, LI5, ST41, SP5, HT4, SI5
He-Sea	"Where it enters" – near elbow/knee joints; where Qi enters deepest; treats organ-level / six Fu-organ disorders	LU5, LI11, ST36, SP9, HT3, SI8
Yuan-Source	Reflects and regulates the organ's original Qi; primary diagnostic + treatment point for that organ	LU9, LI4, ST42, SP3, HT7, SI4
Luo-Connecting	Links each paired Yin/Yang channel; treats symptoms of both channels in the pair	LU7, LI6, ST40, SP4, HT5, SI7
Xi-Cleft	Accumulation point; treats acute pain, bleeding, or crisis flare of that channel	LU6, LI7, ST34, SP8, HT6, SI6
Front-Mu	Diagnostic/treatment point on the chest or abdomen for the paired organ	LU1, ST25(LI), CV12(ST), LR13(SP), CV14(HT), CV4(SI)
Back-Shu	Diagnostic/treatment point on the back for the paired organ	BL13(LU), BL25(LI), BL21(ST), BL20(SP), BL15(HT), BL27(SI)
Confluent	Opens one of the 8 Extraordinary Vessels	LU7(Ren Mai), SP4(Chong Mai), SI3(Du Mai)
Command	Broad regional treatment authority over a body area	LU7(head/neck), LI4(face/mouth), ST36(abdomen)

Study tip

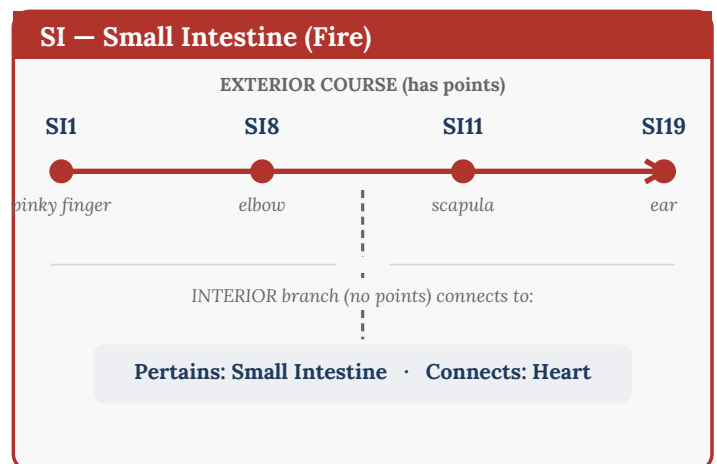

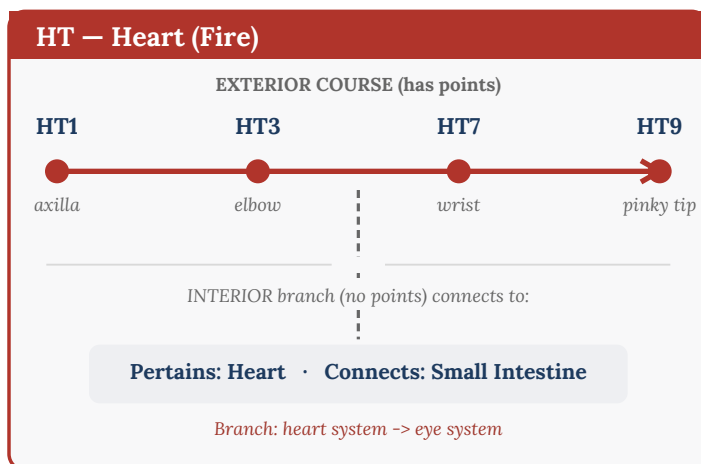

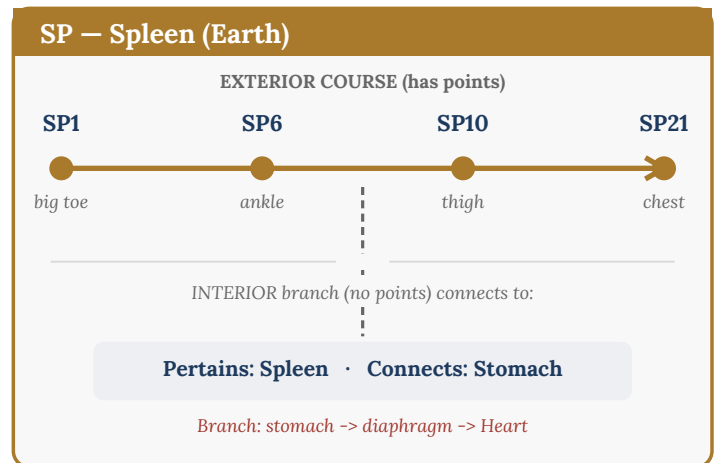

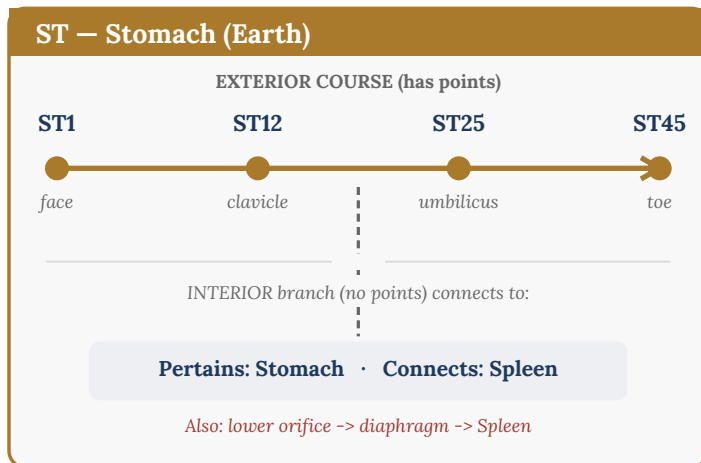

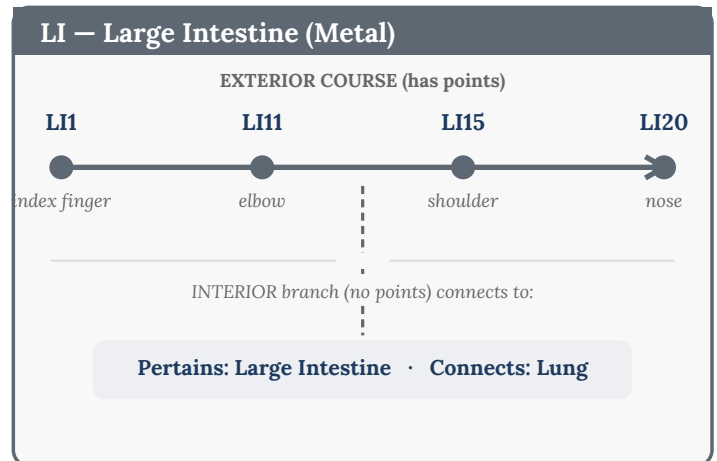

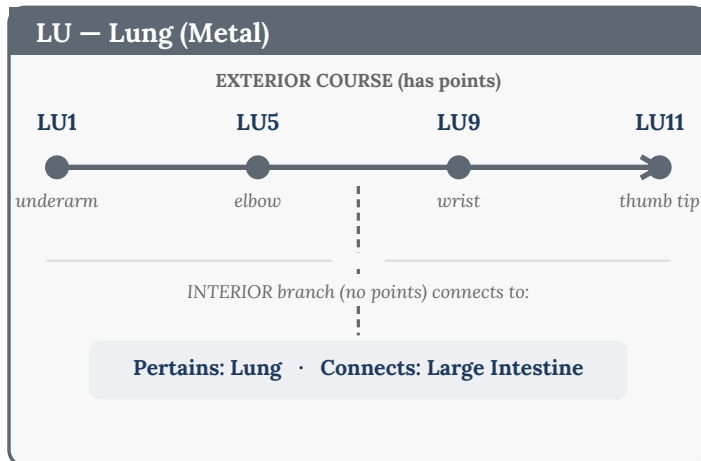

Front-Mu and Back-Shu points are especially high-yield for the midterm since they cross-reference organs you haven't studied yet (e.g. SP's Front-Mu is LR13, LU/LI/ST/SP/HT/SI's Back-Shu points are all on BL) – know the pairing, not just the point code.

Looking ahead

All 6 channels' Back-Shu points live on the Bladder channel in spinal order (BL13 LU, BL15 HT, BL18 LR, BL20 SP, BL21 ST, BL25 LI, BL27 SI) – you'll meet BL properly in Week 5, but recognizing this row now makes that channel far easier to learn.

WHERE THE POINTS ARE vs. WHERE THE CHANNEL JUST CONNECTS

Every channel has an EXTERIOR course (solid line) running along the limb/trunk/face where the acupuncture points actually sit, and an INTERIOR branch (dashed line) that dives into the body to reach the Zang-Fu organs – the interior branch has no points on it.
