

CRAM SHEET

Lung & Large Intestine Channels

LU (11 pts) + LI (20 pts) = 31 Points · Quiz 2 Ready

SPECIAL PTS

LU7, LI4
and all categories

FIVE-SHU

Both channels
Well to Sea sequences

CROSSING PTS

Minimal (LU) /
4 pts, incl. GV14 (LI)

How to use this

Read once the night before. Skim once more the morning of the quiz.

The Channel ID Cards (next pages) have everything the exam tests.

'Exam Traps' at the end of each channel section are Dr. Zhang's own warnings.

Jonathan Centeno · D.AcHM Candidate · Sourced from Dr. Zhang's lectures, CAM 4th Ed., MOA (Deadman 3rd)

LUNG – Hand Taiyin

11 points · Yin · Metal · 3-5 AM · Chest to Hand (anteromedial)

Channel ID Card

Full name	Lung Meridian of Hand-Taiyin
Points / Clock	11 pts 3-5 AM
Element / Polarity	Metal Yin
Direction	Chest -> Hand (anteromedial)
Pertains / Connects	Lung / Large Intestine
Back-Shu / Front-Mu	BL13 Feishu / LU1 Zhongfu (own)
Yuan-Source	LU9 Taiyuan
Luo-Connecting	LU7 Lieque
Xi-Cleft	LU6 Kongzui
He-Sea	LU5 Chize
Confluent + Command	LU7 – opens Ren Mai + commands head/neck
First / Last	LU1 Zhongfu / LU11 Shaoshang

Pathway in 8 Beats

1. Originates in the Middle Burner (stomach region), descends to connect with the Large Intestine (interior-exterior pairing)
2. Turns back, encircles the cardia (stomach opening), ascends through the diaphragm, enters the LUNG (pertaining organ)
3. From the throat/lung system, emerges transversely below the clavicle at LU1 Zhongfu (own Front-Mu) – surface pathway begins here
4. Descends along the antero-lateral (radial) aspect of the upper arm, anterior to the HT and PC channels
5. Crosses the elbow crease at LU5 Chize (He-Sea), continues along the radial border of the forearm
6. Enters the 'inch opening' at the wrist (radial pulse-taking site), passes LU9 Taiyuan (Yuan-Source)
7. Along the thenar eminence, ends at the radial side of the thumb tip, LU11 Shaoshang
8. BRANCH: from LU7 Lieque near the wrist, splits to the radial tip of the index finger -> LI1 Shangyang, handing off to LARGE INTESTINE

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Wood	LU11
Ying-Spring	Fire	LU10
Shu-Stream	Earth	LU9
Jing-River	Metal	LU8
He-Sea	Water	LU5

Crossing Points (minimal)

(none clearly enumerated) – LU's surface pathway begins independently at LU1 – unlike LI/ST, it is not commonly taught with a numbered list of external crossing points. Confirm with Dr. Zhang if tested.

Highest-Yield Points

LU7	Luo + Confluent + Command	Opens Ren Mai; commands head/neck; classic point for cough, headache, stiff neck
LU9	Yuan-Source + Shu-Stream	Radial pulse site; tonifies Lung Qi, chronic cough/asthma
LU5	He-Sea	Clears heat, descends rebellious Lung Qi; cough, asthma, acute throat
LU1	Front-Mu (own)	Chest fullness, grief/sadness, cough – diagnostic point for Lung
LU11	Jing-Well	Sore throat, fever, loss of consciousness – emergency point

Exam Traps – read these last

LU1 is the Lung's OWN Front-Mu point – unusual, since most Front-Mu points sit on the Ren Mai or another channel.
 LU9 doubles as both Shu-Stream AND Yuan-Source – true for every Yin channel's Shu-Stream point.
 LU7 carries THREE special categories at once (Luo, Confluent, Command) – the most loaded point in the Weeks 1-4 scope alongside SI3.
 LU connects to LI, NOT to any other channel – sets up the Anterior Circuit's first hand-off.

LARGE INTESTINE — Hand Yangming

20 points · Yang · Metal · 5-7 AM · Hand to Head (lateral anterior)

Channel ID Card

Full name	Large Intestine Meridian of Hand-Yangming
Points / Clock	20 pts 5-7 AM
Element / Polarity	Metal Yang
Direction	Hand -> Head (lateral anterior)
Pertains / Connects	Large Intestine / Lung
Back-Shu / Front-Mu	BL25 Dachangshu / ST25 Tianshu (on ST channel)
Yuan-Source	LI4 Hegu — FORBIDDEN in pregnancy
Luo-Connecting	LI6 Pianli
Xi-Cleft	LI7 Wenliu
He-Sea	LI11 Quchi
Command	LI4 — commands face/mouth
First / Last	LI1 Shangyang / LI20 Yingxiang

Pathway in 8 Beats

1. Begins at the radial side of the tip of the index finger, LI1 Shangyang - the same finger where LU's branch terminates
2. Runs along the back of the hand, wrist, and forearm (radial side) through LI4 Hegu
3. Crosses the elbow at LI11 Quchi (He-Sea), up the antero-lateral upper arm to the shoulder (LI15)
4. Meets GV14 Dazhui at the top of the shoulder - the meeting point of ALL SIX Yang channels
5. Enters the supraclavicular fossa, descends internally to connect with the LUNG, through the diaphragm, PERTAINS Large Intestine
6. BRANCH: from the supraclavicular fossa, ascends the neck, crosses the cheek, enters the LOWER GUM
7. Curves around the upper lip, crosses to the OPPOSITE side at the philtrum (GV26 area)
8. Ends beside the nostril at LI20 Yingxiang, handing off to the STOMACH channel (ST begins here)

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Metal	LI1
Ying-Spring	Water	LI2
Shu-Stream	Wood	LI3
Jing-River	Fire	LI5
He-Sea	Earth	LI11

Crossing Points (4)

GV14 Dazhui — meeting point of all 6 Yang channels; fever, neck stiffness
 GV26 Shuigou — philtrum; LI's facial branch curves around the lip and crosses the Du Mai here before reaching LI20
 ST4 Dicang — near the corner of the mouth; treats both Stomach and LI symptoms together
 SI19 (near SI11 region) — small intestine crossing point on the face/shoulder area; used clinically alongside LI points

Highest-Yield Points

LI4	Yuan-Source + Command (face/mouth)	FORBIDDEN in pregnancy; face/mouth disorders, headache, general analgesic point
LI11	He-Sea	Clears heat, especially heat in the Blood; fever, skin disorders, hypertension
LI20	Crossing to ST	Nasal congestion, loss of smell, facial paralysis
LI1	Jing-Well	Sore throat, fever, loss of consciousness

Exam Traps — read these last

LI has nearly DOUBLE the points of its paired LU channel (20 vs. 11) - point count doesn't track Yin/Yang status consistently.
 LI4 is FORBIDDEN in pregnancy - one of only two forbidden points in the Weeks 1-4 scope (with SP6).
 LI's Front-Mu is ST25 (on the STOMACH channel, not its own) - unlike LU, which has its own Front-Mu.
 LOWER teeth/gums = LI. UPPER teeth/gums = ST. A classic exam-trap pair.
 LI connects to STOMACH, not Spleen - a common circuit-continuity trap.
 LI has 4 crossing points (GV14, GV26, ST4, SI19 area) - not just GV14. Dr. Zhang covered all 4 explicitly in lecture.
 Dr. Zhang: PubMed-indexed studies show LI4 can relieve toothache pain almost immediately - a direct lecture citation, parallel to ST36's Nature studies.

Rapid Recall — LU & LI

Read this one last, on the way in

The “ONLY” List — guaranteed points

Point that is Lung's OWN Front-Mu (unusual)
 Point carrying 3 special categories at once (Wk 2)
 LOWER teeth/gums meridian
 Meeting point of ALL 6 Yang channels
 LI has how many more points than LU?

LU1 Zhongfu
LU7 Lieque
LI
GV14 Dazhui (on LI's pathway)
9 more (20 vs. 11)

Forbidden in Pregnancy (cumulative)

LI4 Hegu — moves Qi and Blood downward, strong descending action.
 (SP6 Sanyinjiao is also forbidden — taught in Week 3, cumulative through the midterm.)

Limb Distribution Rule

Anterior: Taiyin (yin) / Yangming (yang)
 Middle: Jueyin (yin) / Shaoyang (yang)
 Posterior: Shaoyin (yin) / Taiyang (yang)

Meridian Clock — full 24 hours

LU: 3-5 AM
LI: 5-7 AM
 ST: 7-9 AM
 SP: 9-11 AM
 HT: 11-1 PM
 SI: 1-3 PM
 BL: 3-5 PM
 KI: 5-7 PM
 PC: 7-9 PM
 SJ: 9-11 PM
 GB: 11-1 AM
 LR: 1-3 AM

Last 60 Seconds

LU = 11 pts, 3-5 AM, Yin Metal, chest to hand, LU1 own Front-Mu, LU7 triple-loaded.
 LI = 20 pts, 5-7 AM, Yang Metal, hand to head, LI4 forbidden in pregnancy, LOWER teeth.
 LU connects to LI. LI connects to ST (NOT Spleen) — first hand-off of the Anterior Circuit.
 LI4 and LU7 are the two most commonly tested points in this pair — know both cold.

Commonly Confused — know both sides

LU7 vs LI4

LU7 = command HEAD/NECK + opens Ren Mai. LI4 = command FACE/MOUTH, FORBIDDEN in pregnancy.

LU1 vs ST25

LU1 = Lung's OWN Front-Mu. ST25 = Front-Mu of LI, sits on the STOMACH channel.

Upper vs Lower teeth

UPPER teeth = ST channel. LOWER teeth = LI channel.
