

PRE-LECTURE ANALYSIS SHEET

Pericardium, San Jiao, Gallbladder & Liver Channels

Shou Jueyin / Shou Shaoyang / Zu Shaoyang / Zu Jueyin

Prof. (Dr.) Vivian Zhang, Ph.D. | PC (9) + SJ (23) + GB (44) + LR (14) = 90 Points

BEFORE lecture: Complete Sections A–D and pre-lecture case questions. Rate confidence and expectancy honestly.

DURING lecture: Annotate directly on this sheet as Dr. Zhang covers material.

AFTER lecture: Complete Section F within 24 hours. Update confidence, finish the case, run the Inter-Quiz.

NEW THIS WEEK: this lecture completes ALL 12 primary channels – Section B bridges the full-circuit picture.

A

Learning Targets — I Can Statements

Pre/post confidence ratings 1-5 for 10 learning outcomes

B

Activate — Connect to What You Know

Bridge from Week 5 BL/KI to PC/SJ/GB/LR; fill-in prompts

C

Vocabulary Pre-Load

17 key terms: Pinyin, English, space for your definition

D

Anticipatory Questions

10 questions (PC+SJ+GB+LR); starred = high-challenge/high-yield

IQ

Inter-Quiz: Mid-Study Probe

16 items, 4 checkpoints; mastery $\geq 14/16$ x3

E

Clinical Case — Mr. Alvarez

Pre-lecture guessing + post-lecture treatment protocol

F

After-Lecture Synthesis

Concept map fill-in + synthesis columns + review notes

LEARNING TARGETS -- I CAN STATEMENTS

Purpose: These outcomes define exactly what you are expected to do after this lecture – not just know, but perform.

How to use: Before lecture: circle your Pre score honestly. After lecture: circle Post score.

Goal: All 10 targets at 4-5 by end of your Week 6 review session. Below 3 = highest review priority.

Mindset: Every target below has 3 sessions to reach mastery. A low Pre score or a rough first attempt isn't a failing grade – it's today's starting point. Track your Pre-to-Post movement, not a single number.

Trace the Pericardium meridian (PC1-PC9) from the chest to the tip of the middle finger, naming all 3 branches.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Trace the San Jiao meridian (TE1-TE23) from the ring finger to the outer canthus, naming all 3 branches.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Trace the Gallbladder meridian (GB1-GB44) from the outer canthus to the 4th toe, naming all 5 branches/segments.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Trace the Liver meridian (LR1-LR14) from the great toe to the chest, naming all 4 branches.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Explain the Three Main Circuits framework and state which two circuits are completed by today's lecture (Outer via Shaoyang, Middle via Jueyin).

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

State the element, polarity, and peak two-hour window for all four channels covered this week.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Identify high-yield PC/SJ points: PC6, PC7, PC8, TE5, TE17, TE23 -- categories and key indications.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Identify high-yield GB/LR points: GB20, GB21, GB34, GB41, LR3, LR8, LR14 -- categories and key indications.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Apply the PC-SJ and GB-LR interior-exterior paired relationships: give one clinical example in each direction.

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Distinguish Ministerial Fire (PC/SJ) from Sovereign Fire (HT/SI, Week 4), and state each channel's crossing-point count -- flagging PC's trap (zero).

Pre-Lecture 1 2 3 4 5

Post 1 2 3 4 5

Quiz 5 covers PC/SJ/GB/LR: same 5-question format + 1 bonus (20 pts). Targets at 4-5 = quiz-ready.

ACTIVATE -- CONNECT TO WHAT YOU KNOW

Purpose: Activating prior knowledge before new input improves encoding. This section bridges Week 5 to Week 6.

B1: Write whatever you already know – no wrong answers. B2: Complete each fill-in before lecture.

B1 . From Week 5 to Today

Week 5 completed BL/KI – finishing the Inner Circuit (Taiyin+Shaoyin) and bringing the Outer Circuit to 2 of its 3 yang stages (Yangming, Taiyang) already done. Today adds the final piece of each remaining circuit: Shaoyang (SJ/GB) completes the Outer Circuit, and Jueyin (PC/LR) completes the Middle Circuit. After today, all 12 primary channels have been introduced.

What do you already know about PC, SJ, GB, and LR? Write whatever comes to mind:

B2 . Connect the Dots -- complete before lecture

BL/KI (Week 5) completed the Inner Circuit -> today's SJ/GB completes the _____ Circuit.

PC and LR share the Jueyin stage, making them together the _____ Circuit.

HT/SI (Week 4) is Sovereign Fire -> PC/SJ (this week) is _____ Fire.

LR3 pairs with LI4 (Week 2) to form the classic _____ combination.

SP crosses in front of LR at _____ cun above the medial malleolus (Week 3 recall).

GB41 opens the Dai Mai -> PC6 (this week's PC point) opens the _____ Mai.

Notes -- other connections you're noticing

VOCABULARY PRE-LOAD -- DEFINE BEFORE CLASS

Purpose: Pre-loading key terms primes semantic memory so lecture content attaches to existing scaffolding.
Before lecture: fill in 'My Definition' with whatever you know or can infer. Blank = learn live.

PINYIN	ENGLISH	MY DEFINITION / CLINICAL NOTE
Shou Jueyin	Hand Jueyin (PC)	
Shou Shaoyang	Hand Shaoyang (SJ)	
Zu Shaoyang	Foot Shaoyang (GB)	
Zu Jueyin	Foot Jueyin (LR)	
Tian Chi · PC1	Celestial Pool	
Nei Guan · PC6	Inner Pass	
Zhong Chong · PC9	Middle Rushing	
Guan Chong · TE1	Gate Rushing	
Wai Guan · TE5	Outer Pass	
Si Zhu Kong · TE23	Silk Bamboo Hollow	
Tong Zi Liao · GB1	Pupil Bone-Hole	
Feng Shi · GB31	Wind Market	
Yang Ling Quan · GB34	Yang Mound Spring	
Zu Qiao Yin · GB44	Foot Portal Yin	
Da Dun · LR1	Great Mound	
Tai Chong · LR3	Supreme Rushing	
Qi Men · LR14	Cycle Gate	

Blank rows below: add any extra terms Dr. Zhang emphasizes in lecture.

D ANTICIPATORY QUESTIONS

* = high-challenge / high-yield

Purpose: Generating answers before instruction improves retention. Starred items are matched to your growing skill level – they're harder because they're the ones most worth the stretch, not just exam bait.

Pericardium Meridian -- PC1 to PC9 (9 points | Hand Jueyin | 7-9 PM)

Q1* ORIGIN & BRANCHES

PC starts at the chest, connecting successively with the upper, middle, and lower jiao. Describe all 3 branches in order.

Q2 FIRST & LAST POINT

Name PC1 and PC9 with their locations.

Q3* PC6 -- THE KEY POINT

What extraordinary vessel does PC6 open, and what 3 clinical presentations is it used for?

San Jiao Meridian -- TE1 to TE23 (23 points | Hand Shaoyang | 9-11 PM)

Q4* THE THREE BRANCHES

Sketch all 3 branches of SJ. Which branch links SJ to the Gallbladder channel, and at which point?

Notes / Sketch Space

ANTICIPATORY QUESTIONS (CONTINUED)

Q5* CROSSING POINTS

SJ has 10 crossing points across 3 meridians. Name at least 4 of the actual points.

Q6 SJ5 -- THE CONFLUENT POINT

What extraordinary vessel does SJ5 open?

Gallbladder Meridian -- GB1 to GB44 (44 points | Foot Shaoyang | 11 PM-1 AM)

Q7* THE FIVE BRANCHES

Sketch all 5 segments of GB's pathway. Which is the 'straight portion' that carries most of the numbered points?

Q8 GB21 CAUTION

What explicit clinical caution applies to GB21, and what is the point otherwise used for?

Q9* GB34 -- THE INFLUENTIAL POINT

What tissue is GB34 Influential for, and what 2 conditions does it treat?

Liver Meridian -- LR1 to LR14 (14 points | Foot Jueyin | 1-3 AM)

Q10* LR3 -- THE MOST IMPORTANT LR POINT

What does LR3 treat, and what classic 2-point combination pairs it with LI4?

Notes / Sketch Space

IQ INTER-QUIZ -- MID-STUDY PROBE

(checkpoint format)

Purpose: Spaced retrieval is the single most evidence-based study technique. Flow theory addition: you self-check after every 4 items instead of waiting until the end – a tighter feedback loop keeps difficulty matched to skill.
Mastery: $\geq 14/16$ across 3 separate sessions on different days.

Date: _____ Start: _____ End: _____ Session score: ____/16

CHECKPOINT 1 (items 1-4)

- 1 ACQ PC has ____ points; SJ has ____ points.
- 2 MAINT HT has ____ pts; SI has ____ pts. (Week 4)
- 3 ACQ First point of PC: name + location.
- 4 ACQ First point of SJ: name + location.

Self-check now (answers below) – score this block: ____/4 before moving on.

CHECKPOINT 2 (items 5-8)

- 5 ACQ PC6 (Neiguan): category + primary use.
- 6 ACQ SJ5 (Waiguan): category + why it treats exterior wind-heat.
- 7 ACQ GB34 (Yanglingquan): category + primary function.
- 8 ACQ LR3 (Taichong): which 2 special-point categories does it hold?

Self-check now (answers below) – score this block: ____/4 before moving on.

CHECKPOINT 3 (items 9-12)

- 9 ACQ GB41 opens which extraordinary vessel?
- 10 ACQ SJ has ____ crossing points across ____ meridians.
- 11 ACQ GB's crossing-point slide states ____ points / ____ meridians, but only ____ are actually named.
- 12 ACQ LR14 (Qimen): type of point + what it treats.

Self-check now (answers below) – score this block: ____/4 before moving on.

CHECKPOINT 4 (items 13-16)

- 13 MAINT Direction of qi flow in hand-yin meridians (Week 1 rule)?
- 14 MAINT Direction of qi flow in foot-yang meridians (Week 1 rule)?
- 15 MAINT PC clock: ____PM-____PM. LR clock: ____AM-____AM.
- 16 MAINT Name the Confluent point of KI and the extraordinary vessel it opens. (Week 5)

Self-check now (answers below) – score this block: ____/4 before moving on.

Prediction Notes -- jot your answers before checking the key

IQ INTER-QUIZ ANSWER KEY

check each block right after attempting it

1. 9; 23
2. 9; 19
3. PC1 Tianchi — 4th ICS, 1 cun lateral to the nipple
4. TE1 Guanchong — lateral side of the ring finger
5. Luo point; opens Yinwei Mai; nausea, vomiting, cardiac-type chest pain
6. Xi-Cleft; treats acute exterior wind-heat / fever with chills
7. He-Sea + Influential (sinews); knee/hip pain, sinew disorders
8. Yuan-Source + Shu-Stream
9. Dai Mai (Girdle Vessel)
10. 10 crossing points; 3 meridians
11. 12 points / 6 meridians stated on slide; only 9 actually named — unresolved, confirm with Dr. Zhang
12. Front-Mu of the Liver; hypochondriac pain, emotional disorders
13. Chest to hand
14. Head to foot
15. PC 7-9 PM; LR 1-3 AM
16. KI6 — opens Yinqiao Mai

Session 1: ____/16 Session 2: ____/16 Session 3: ____/16 Criterion met ($\geq 14/16 \times 3$): []

CLINICAL CASE -- APPLY IT BEFORE & AFTER

Purpose: Case-based reasoning bridges textbook knowledge to clinical reality. Struggling before lecture is the point.

Case Vignette: Mr. Alvarez, 45 years old

Mr. Alvarez is a 45-year-old accountant presenting with a 3-week history of irritability and one-sided (temporal) headache. He reports a bitter taste in the mouth, rib-side/hypochondriac distention that worsens with stress, and occasional dizziness. In the days before tax deadlines he also notices mild chest tightness and anxious palpitations. Tongue red on the sides with a thin yellow coating. Pulse wiry.

Pre-Lecture Questions

PRE Q1: Which channel(s) are most likely involved? List the specific signs that led you there.

PRE Q2: The bitter taste and rib-side distention point to internal-organ dysfunction of which Fu organ?

PRE Q3: The pre-deadline chest tightness and palpitations suggest involvement of which additional channel from this week?

Post-Lecture Questions (within 24 hrs)

POST Q1: Name 3 GB/LR points for Mr. Alvarez's protocol -- code, category, one-sentence justification each.

POST Q2: Include a PC point for the stress-related chest tightness. Apply the paired PC-SJ logic with a specific point.

AFTER-LECTURE SYNTHESIS & SELF-MONITORING

When: Complete within 24 hrs – optimal consolidation window. Fill without notes first; gaps are data, not failure.

I Can Now Confidently...

Still Unclear -- Review...
