

Master Channel Comparison

All 8 Channels Covered So Far – Through Week 5

$LU + LI + ST + SP + HT + SI + BL + KI = 219 \text{ points}$

This is a CUMULATIVE reference – it grows every week. Use it to keep the whole map straight once individual weekly Study Guides start blurring together. Update pattern: add each new channel's row after its week is taught.

This Document Covers
• Full attribute table – all 8 channels, side by side (element, peak, points, special points)
• Anterior Circuit (LU-LI-ST-SP) and Posterior Circuit (HT-SI-BL-KI) circuit maps
• Cross-week trap notes – the 'X connects to Y, NOT Z' errors that recur across channels
• Forbidden-in-pregnancy points, consolidated across all channels taught so far
• Confluent point pairs (Eight Extraordinary Vessels) – the ones taught, plus what's coming Week 6

Content verified against AC300 Channel Workbook v28, Weeks 2-5 lecture transcripts/slides, and this project's own Study Guide data. Nothing here is guessed – flag any discrepancy for Dr. Zhang.

Circuits Mapped So Far

Anterior Circuit (Weeks 2-3)

LU -> LI -> ST -> SP — chest->hand->head->foot->chest

Posterior (Inner) Circuit (Weeks 4-5)

HT -> SI -> BL -> KI — chest->hand->head->foot->chest

Cross-Week Trap Notes & Forbidden-in-Pregnancy

Recurring Connection Traps

! LI connects to STOMACH (not Spleen) – LI's branch ends beside the nose (LI20) where ST begins.
 ! SP connects to HEART (not LI) – SP's internal branch goes stomach->diaphragm->heart, linking HT.
 ! BL connects to KIDNEY (not Lung) – confirmed exam trap; do not confuse with the Metal-element pathway.
 ! KI connects to PERICARDIUM (not Lung) – KI's branch from the Lung joins the Heart then links PC, opening Week 6.
 ! Only ST passes through the NIPPLE. Only SP spreads over the LOWER surface of the tongue. Only KI reaches the tongue ROOT via a re-emerging branch. These three 'only' facts are frequently confused with each other.
 ! UPPER teeth/gums = ST channel. LOWER teeth/gums = LI channel. Reversing these is a classic trap.
 ! SP is the ONLY channel with a distribution exception (crosses in front of LR above 8 cun from medial malleolus).
 ! Yuan-Source = Shu-Stream on every YIN channel (LU9, SP3, HT7, KI3) – never true on Yang channels.
