Bladder & Kidney Channels – Week 5

210 cards · spaced-repetition ready

Two ways to use this set:

For real spaced repetition (recommended)

Import AC300_Week5_Flashcards_Anki.txt into Anki (File > Import, tab-separated, 3 fields: Front / Back / Tags). This is the format proven to actually build long-term retention — the PDF below is a reference copy, not a substitute.

For quick paper review

This PDF shows every card as a Q | A row, organized by type. Cover the answer column with a sheet of paper and self-test down the page.

Card types included: (1) Point ID from location clue, (2) Special-category lookup (Yuan-Source/Luo/He-Sea/etc.), (3) Pure point-number -> name recall.
