

Practice Draw

Bladder & Kidney Channels – Week 5

Production recall – draw it cold, then check

Recognizing the right MCQ answer and producing a pathway from memory are different skills. Dr. Zhang's homework rule: draw BOTH the internal AND external pathways for every meridian – most students only draw the external. Use the faint figure as a guide only: trace it once to build muscle memory, then try the blank version from memory and check yourself against the Study Guide.

"Some students only draw external – the internal pathway is also important." – Dr. Zhang
Two passes per channel: (1) trace the faint figure, (2) redraw from memory on blank paper.

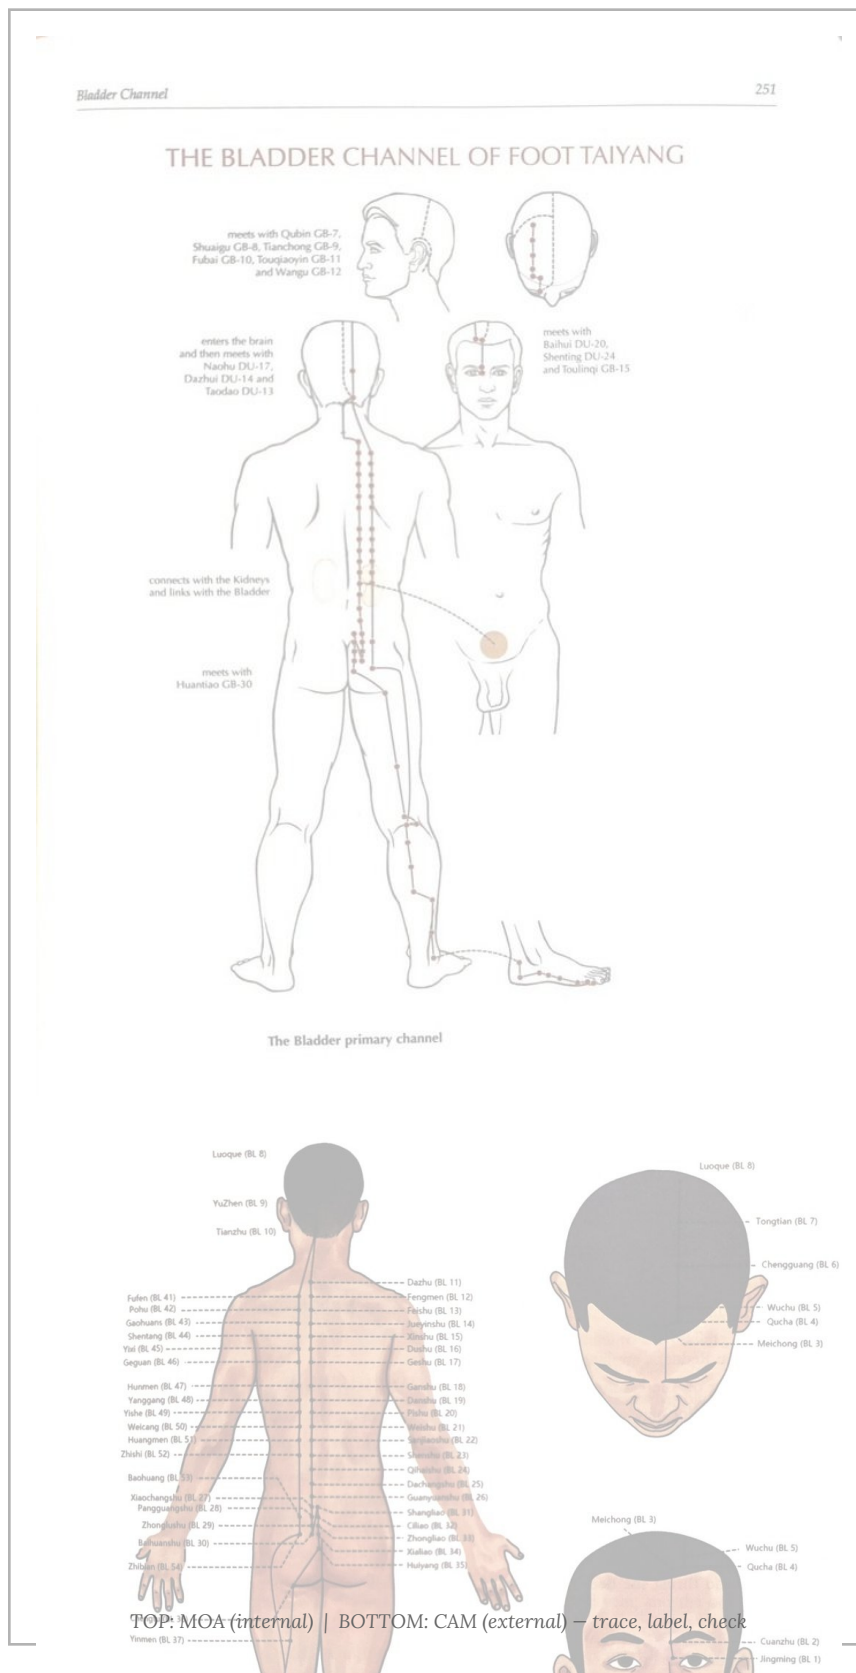

Practice Draw — The Bladder Meridian of Foot-Taiyang 67 points | 5 branches | head to foot

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.

The faint figure is a guide only — trace, then check against the Study Guide overview pages.

CHECKLIST

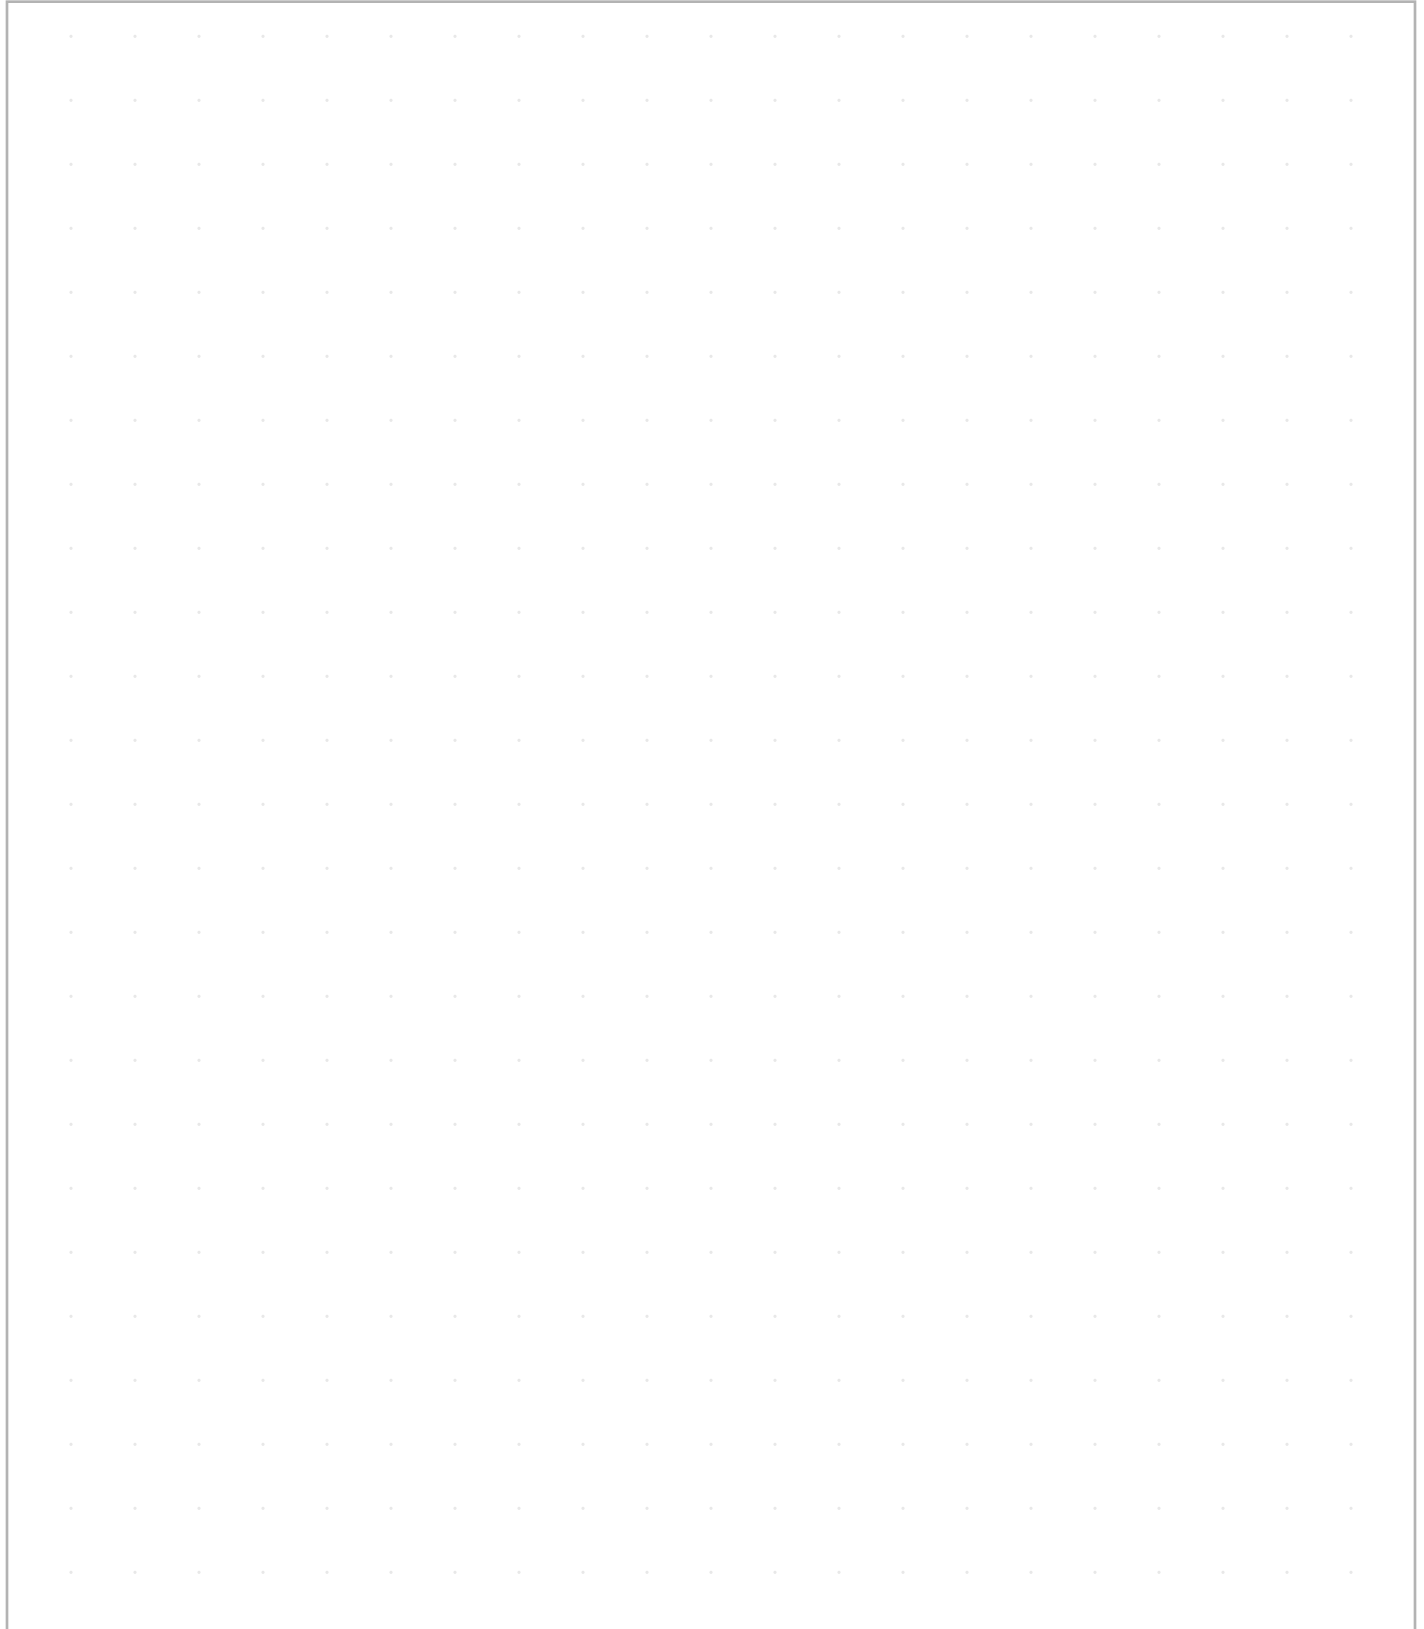

1. Draw the INTERNAL pathway (dotted):
inner canthus -> vertex -> brain -> nape -> spine -> KIDNEY (connects) -> BLADDER (pertains)
2. Draw the EXTERNAL pathway (solid): BL1 (eye) -> BL10 (neck) -> two parallel back lines (BL11-30 and BL41-54) -> BL40 (merge) -> BL60 (ankle) -> BL67 (little toe)
3. Mark the 5 branches: (1) inner canthus->vertex (2) vertex->temple (3) straight/bladder (4) lumbar->popliteal (5) posterior neck->little toe
4. Label special points: BL40 (He-Sea/Command), BL58 (Luo), BL64 (Yuan), BL63 (Xi-Cleft), BL66 (Ying), BL28 (Back-Shu of BL itself)
5. Mark the Back-Shu series landmarks BL13-BL28 along the inner back line

Blank Recall — The Bladder Meridian of Foot-Taiyang

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).

Practice Draw — The Kidney Meridian of Foot-Shaoyin

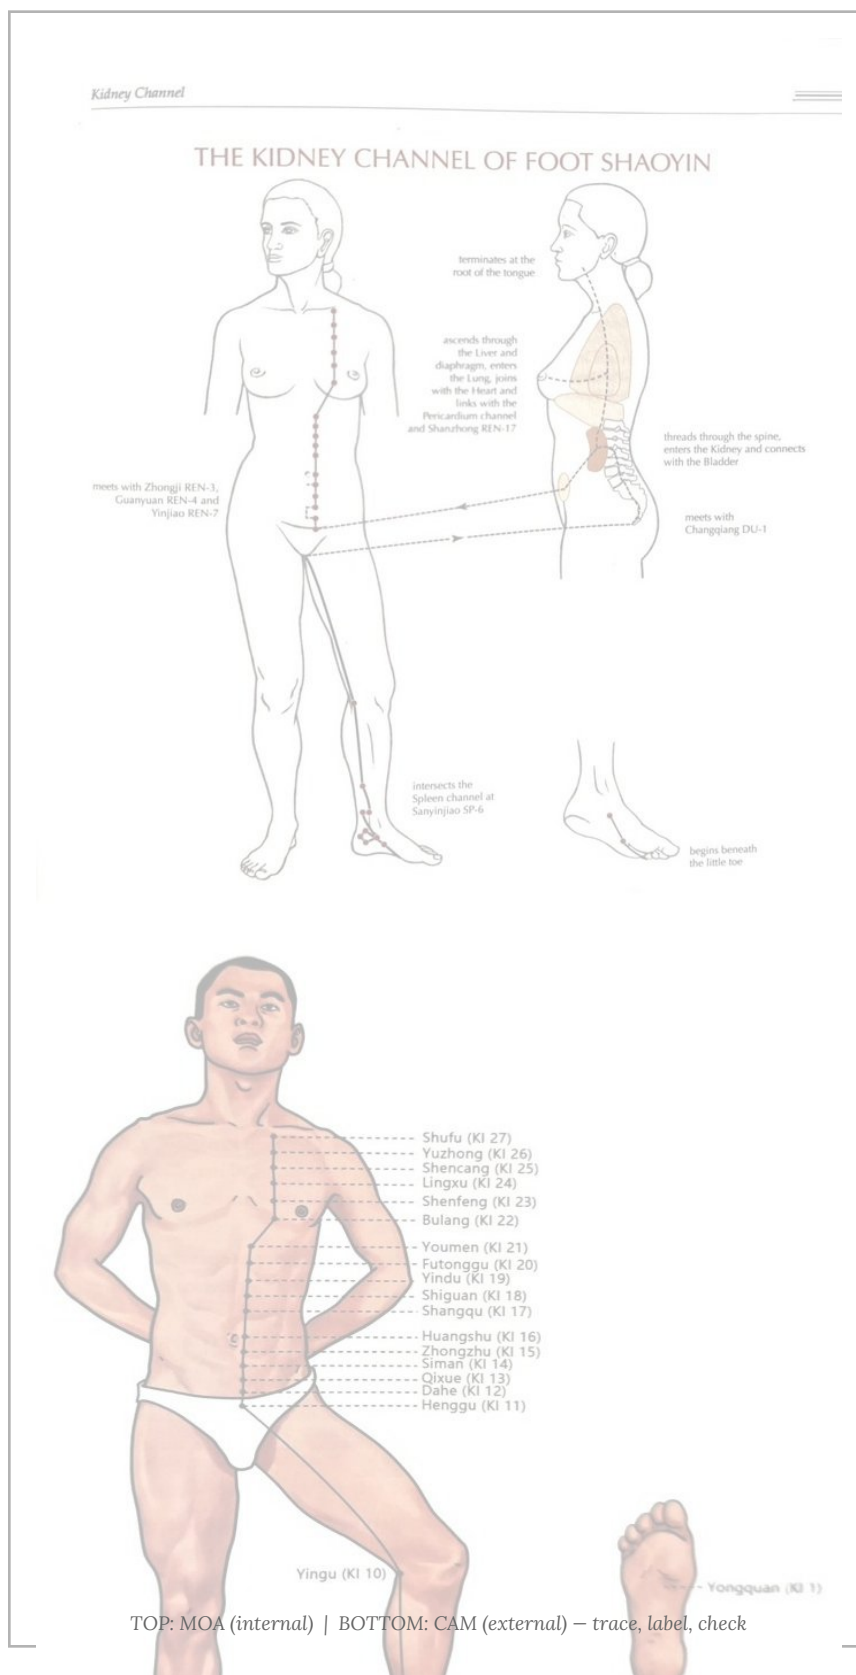

27 points | foot to chest

Dr. Zhang's rule: draw BOTH internal AND external pathways from memory.

The faint figure is a guide only — trace, then check against the Study Guide overview pages.

CHECKLIST

1. Draw the EXTERNAL pathway: KI1 (sole) -> behind medial malleolus -> medial leg -> postero-medial thigh -> spine
2. Draw the INTERNAL pathway: enters spine -> pertains KIDNEY, connects BLADDER -> through diaphragm -> LUNG -> root of TONGUE
3. Draw the BRANCH: from LUNG -> joins HEART -> links PERICARDIUM (Hand-Jueyin, Week 6)
4. Mark the crossing points: SP6 (medial leg), CV3/CV4/CV7 (lower abdomen), CV17 (chest). Label: KI13 (Yuan/Shu), KI16 (Confluent), KI7 (Jing-River), KI27 (last point)

Blank Recall — The Kidney Meridian of Foot-Shaoyin

Pass 2 — from memory

PASS 2: no guide figure. Draw the full pathway from memory, then check yourself against the Study Guide overview pages. Label at least the special points (Yuan-Source, Luo, He-Sea, etc.).

A large rectangular grid of small 'x' marks, intended for drawing the full pathway of the Kidney Meridian of Foot-Shaoyin. The grid is approximately 20 columns wide and 30 rows high, providing a blank space for the student to draw the meridian's course from memory.
