AC300 MASTER QUIZ BANK & KEY

reMarkable Edition

The REAL Quiz 1-6

Quiz 1 through Quiz 3 track Weeks 1-3 directly. Week 4 (HT/SI) was assessed through the Midterm instead of its own quiz, so Quiz 4 picks back up with Week 5 (BL/KI), Quiz 5 with Week 6, and Quiz 6 with Week 7 (Eight Extraordinary Vessels). Weeks 8 and 9 had no quiz of their own.

Quiz 1	Week 1 -- Channel Theory Foundations	RECONSTRUCTED	6 q
Quiz 2	Week 2 -- LU / LI -- Metal	RECONSTRUCTED	6 q
Quiz 3	Week 3 -- ST / SP -- Earth	RECONSTRUCTED	6 q
Quiz 4	Week 5 -- BL / KI -- Water	VERBATIM	6 q
Quiz 5	Week 6 -- PC / SJ / GB / LR -- Middle Circuit	VERBATIM	6 q
Quiz 6	Week 7 -- Eight Extraordinary Vessels	VERBATIM	6 q

PLUS: Additional Practice Questions -- All 9 Weeks

(extra practice I wrote in the same style -- NOT from the real quizzes)

TABLE OF CONTENTS

Part 1 -- The Real Quiz 1-6 3

Answer Key -- Quiz 1-6 8

Part 2 -- Additional Practice (All 9 Weeks) 10

Answer Key -- Additional Practice 40

Quiz 1-6 Week Map

Quiz 1 = Week 1 (Channel Theory Foundations)
Quiz 2 = Week 2 (LU / LI -- Metal)
Quiz 3 = Week 3 (ST / SP -- Earth)
Quiz 4 = Week 5 (BL / KI -- Water)
Quiz 5 = Week 6 (PC / SJ / GB / LR -- Middle Circuit)
Quiz 6 = Week 7 (Eight Extraordinary Vessels)

PART 1 -- THE REAL QUIZ 1-6

Confirmed from live-class transcripts -- this is what the final reuses

Per Dr. Zhang's own statement: “the final exam mentions all the questions, including in the final examination, concerns from each quiz, not new question.” Every real quiz was 6 questions -- confirmed directly in the transcripts (“just six questions” / “five questions and one more”). Quizzes 4-6 are VERBATIM -- Dr. Zhang read the actual questions and answers back to the class during live review, reproduced exactly below. Quizzes 1-3 are RECONSTRUCTED -- the topic and 6-question count are confirmed, but no review transcript was found, so these are representative on the confirmed material, not literal transcriptions.

QUIZ 1 -- WEEK 1: CHANNEL THEORY FOUNDATIONS

RECONSTRUCTED · 6 questions

Q1. How many primary (regular) meridians are there?

A. 8
B. 12
C. 14
D. 15

Q2. How many Luo-Connecting points (Collaterals) are there in total?

A. 8
B. 12
C. 15
D. 20

Q3. How many Zang (Yin) organs pair with primary meridians?

A. 4
B. 5
C. 6
D. 8

Q4. Yin meridians of the HAND flow in which direction?

A. Hand to chest
B. Chest to hand
C. Hand to head
D. Head to hand

Q5. Yang meridians of the FOOT flow in which direction?

A. Foot to head
B. Head to foot
C. Foot to chest
D. Chest to foot

Q6. How many Eight Extraordinary Vessels are there?

A. 6
B. 8
C. 10
D. 12

QUIZ 2 -- WEEK 2: LU / LI -- METAL

RECONSTRUCTED · 6 questions

Q1. How many points does the LU channel have?

A. 9
B. 11
C. 14
D. 20

Q2. How many points does the LI channel have?
A. 11
B. 14
C. 19
D. 20

Q3. What element do LU and LI both belong to?
A. Earth
B. Fire
C. Metal
D. Water

Q4. Direction of Qi flow in the LU meridian?
A. Hand to chest
B. Chest to hand
C. Hand to head
D. Head to hand

Q5. Peak Qi activity of the Lung meridian is:
A. 3-5 AM
B. 5-7 AM
C. 7-9 AM
D. 9-11 AM

Q6. LU4 is loaded with which special category?
A. Xi-Cleft
B. Luo-Connecting
C. Yuan-Source
D. He-Sea

QUIZ 3 -- WEEK 3: ST / SP -- EARTH

RECONSTRUCTED · 6 questions

Q1. Direction of Qi in the 3 foot-YANG meridians?
A. Foot to chest
B. Foot to head
C. Head to foot
D. Chest to foot

Q2. Which element do ST and SP both belong to?
A. Earth
B. Fire
C. Metal
D. Wood

Q3. The CONNECTING organ of the Stomach meridian is:
A. Large Intestine
B. Kidney
C. Liver
D. Spleen

Q4. Where does the ST channel's pathway truly begin?
A. ST1 Chengqi
B. LI20 Yingxiang
C. GV24
D. BL1

Q5. How many points does the ST channel have?

A. 21
B. 45
C. 20
D. 11

Q6. SP is the only channel on which surface of the tongue?

A. Root
B. Upper
C. Lower
D. Lateral edge

QUIZ 4 -- WEEK 5: BL / KI -- WATER

VERBATIM · 6 questions

Q1. The Kidney meridian internally connects with all of the following organs EXCEPT:

A. Kidney (itself)
B. Bladder
C. Liver
D. Spleen

Q2. What is the connecting (paired) organ of the Kidney meridian?

A. Stomach
B. Bladder
C. Liver
D. Spleen

Q3. Per its running course, the Bladder meridian of Foot-Taiyang begins at:

A. BL1, inner canthus of the eye
B. BL67, little toe
C. GV14
D. BL13

Q4. Which of the following statements about the Kidney meridian's internal connections is NOT correct?

A. It connects with Kidney
B. It connects with Bladder, Liver, and Lung
C. It connects with all 12 Zang-Fu organs
D. It does not connect with Spleen

Q5. Per its running course, the Kidney meridian of Foot-Shaoyin begins at:

A. The inner canthus
B. Below the little toe, on the sole of the foot
C. GV20
D. The nipple

Q6. (Supplementary) The Bladder meridian of Foot-Taiyang ENDS at:

A. BL1, inner canthus
B. The lateral tip of the little toe
C. GV14
D. The nipple

QUIZ 5 -- WEEK 6: PC / SJ / GB / LR -- MIDDLE CIRCUIT

VERBATIM · 6 questions

Q1. Where does the Pericardium meridian of Hand-Jueyin start?
A. The chest
B. The hand
C. The head
D. The foot

Q2. Which meridian is specifically associated with the external genitalia?
A. Gallbladder
B. San Jiao
C. Liver
D. Pericardium

Q3. Where does the Gallbladder meridian of Foot-Shaoyang end?
A. The inner canthus
B. The tip of the fourth toe
C. The tip of the little toe
D. The nipple

Q4. The Liver meridian connects with which meridian, completing the 12-channel cycle?
A. Lung
B. Heart
C. Kidney
D. Stomach

Q5. Which pair of meridians runs in front of the ear, at the lateral side of the head?
A. Taiyang (Hand + Foot)
B. Yangming (Hand + Foot)
C. Shaoyang (Hand + Foot)
D. Jueyin (Hand + Foot)

Q6. (Supplementary) The Liver meridian does NOT connect with which organ?
A. Gallbladder
B. Lung
C. Heart
D. Stomach (via its eye branch)

QUIZ 6 -- WEEK 7: EIGHT EXTRAORDINARY VESSELS

VERBATIM · 6 questions

Q1. Which vessel is described as the belt that runs around the waist?
A. Chong Mai
B. Ren Mai
C. Dai Mai
D. Du Mai

Q2. True or False: The Dai Mai is the only Extraordinary Vessel that runs horizontally.
A. True
B. False

Q3. Which two vessels have a confluent point that is also their starting point?
A. Ren Mai and Du Mai
B. Chong Mai and Dai Mai
C. Yang Qiao Mai and Yin Qiao Mai
D. Yang Wei Mai and Yin Wei Mai

Q4. Which three vessels share the lower abdomen as their common point of origin?

A. Du Mai, Dai Mai, and the Bladder meridian
B. Ren Mai, Chong Mai, and Du Mai
C. Yang Wei Mai, Yin Wei Mai, and Dai Mai
D. Ren Mai, Dai Mai, and the Kidney meridian

Q5. Which vessel is called the Sea of the Yang Meridians?

A. Ren Mai
B. Chong Mai
C. Dai Mai
D. Du Mai

Q6. (Supplementary) Which vessel is called the Sea of the Yin Meridians?

A. Ren Mai
B. Chong Mai
C. Yin Qiao Mai
D. Yin Wei Mai

ANSWER KEY -- QUIZ 1-6

Score yourself, then read explanations for missed items

QUIZ 1 -- WEEK 1: CHANNEL THEORY FOUNDATIONS

Q1 **B** **How many primary (regular) meridians are there?**
12 Primary Meridians (Jing) -- the main pathways of the channel system.

Q2 **C** **How many Luo-Connecting points (Collaterals) are there in total?**
15 total: 12 paired-meridian Luo points + GV1 + CV15 + SP21 (Spleen's Great Luo).

Q3 **C** **How many Zang (Yin) organs pair with primary meridians?**
6 Zang organs: Lung, Spleen, Heart, Liver, Kidney, Pericardium.

Q4 **B** **Yin meridians of the HAND flow in which direction?**
Yin meridians of the hand flow chest -> hand.

Q5 **B** **Yang meridians of the FOOT flow in which direction?**
Yang meridians of the foot flow head -> foot (descending).

Q6 **B** **How many Eight Extraordinary Vessels are there?**
8 Extraordinary Vessels, distinct from the 12 primary meridians.

QUIZ 2 -- WEEK 2: LU / LI -- METAL

Q1 **B** **How many points does the LU channel have?**
LU has 11 points (LU1-LU11).

Q2 **D** **How many points does the LI channel have?**
LI has 20 points (LI1-LI20) -- nearly double LU's count.

Q3 **C** **What element do LU and LI both belong to?**
LU and LI are the Metal pair.

Q4 **B** **Direction of Qi flow in the LU meridian?**
LU is Hand-Yin: flows chest -> hand.

Q5 **A** **Peak Qi activity of the Lung meridian is:**
LU peaks 3-5 AM, the first channel in the 24-hour clock cycle.

Q6 **A** **LU4 is loaded with which special category?**
LU6 Kongzui is LU's Xi-Cleft point (used for acute Lung conditions).

QUIZ 3 -- WEEK 3: ST / SP -- EARTH

Q1 **C** **Direction of Qi in the 3 foot-YANG meridians?**
Foot Yang meridians flow head -> foot (descending).

Q2 **A** **Which element do ST and SP both belong to?**
ST and SP are the Earth pair -- interior-exterior partners of the Anterior Circuit.

Q3 **D** **The CONNECTING organ of the Stomach meridian is:**
ST pertains to Stomach, connects with Spleen (Yin-Yang interior-exterior pair).

Q4 **B** **Where does the ST channel's pathway truly begin?**
ST originates at LI20 on the face -- ST1 is just the first NUMBERED point.

Q5 **B** **How many points does the ST channel have?**
ST has 45 points -- the second biggest channel (Bladder, with 67, is the biggest).

Q6 **C** **SP is the only channel on which surface of the tongue?**
SP spreads over the LOWER surface of the tongue; KI reaches the root.

QUIZ 4 -- WEEK 5: BL / KI -- WATER

Q1 **D** **The Kidney meridian internally connects with all of the following organs EXCEPT:**
Dr. Zhang, live review: KI connects internally with Kidney, Bladder, Liver, and Lung -- but NOT Spleen. “It's special for kidney because it's a root of our source in the body... connecting not only the kidney, the bladder, but also the liver, the lung, but not all organs, just kidney, bladder, liver, and lung.”

Q2 **B** **What is the connecting (paired) organ of the Kidney meridian?**
Dr. Zhang, live review: "Which of the following option is the connecting organ of the kidney? Its paired organ is bladder, and its pertaining organ is kidney."

Q3 **A** **Per its running course, the Bladder meridian of Foot-Taiyang begins at:**
Dr. Zhang, live review: "the bladder meridian of foot Taiyang begins... at BL1, in the inner canthus."

Q4 **C** **Which of the following statements about the Kidney meridian's internal connections is NOT correct?**
Dr. Zhang, live review: reinforces that KI connects with Kidney/Bladder/Liver/Lung specifically -- not with all Zang-Fu organs.

Q5 **B** **Per its running course, the Kidney meridian of Foot-Shaoyin begins at:**
Dr. Zhang, live review: "the kidney meridian of foot Shaoyin begins at the inferior aspect of the little toe" -- i.e. KI1 Yongquan, below the little toe on the sole.

Q6 **B** **(Supplementary) The Bladder meridian of Foot-Taiyang ENDS at:**
Dr. Zhang, live review, bonus question: "the bladder meridian... at the lateral side of the tip of the little toe" -- BL67 Zhiyin.

QUIZ 5 -- WEEK 6: PC / SJ / GB / LR -- MIDDLE CIRCUIT

Q1 **A** **Where does the Pericardium meridian of Hand-Jueyin start?**
Dr. Zhang, live review: "Only three Yin meridians start from the chest to the hand... the Pericardium meridian of hand [Jueyin] started from the chest."

Q2 **C** **Which meridian is specifically associated with the external genitalia?**
Dr. Zhang, live review: the Liver meridian's specific points connect with the external genitalia -- clinically used for genital pain.

Q3 **B** **Where does the Gallbladder meridian of Foot-Shaoyang end?**
Dr. Zhang, live review: GB "is ending on the tip of the fourth toe, only fourth toe."

Q4 **A** **The Liver meridian connects with which meridian, completing the 12-channel cycle?**
Dr. Zhang, live review: "the liver meridian connects with the [Lung] meridian of hand Taiyin" -- closing the loop back to the first channel.

Q5 **C** **Which pair of meridians runs in front of the ear, at the lateral side of the head?**
Dr. Zhang, live review: "the Shao Yang meridians, both hand and foot... runs across the ear."

Q6 **C** **(Supplementary) The Liver meridian does NOT connect with which organ?**
Dr. Zhang, live review: LR connects with Gallbladder, Lung, and has an eye-system branch -- "it does not connect with the heart."

QUIZ 6 -- WEEK 7: EIGHT EXTRAORDINARY VESSELS

Q1 **C** **Which vessel is described as the belt that runs around the waist?**
Dr. Zhang, live review: "which belt is called belt around the waist? The Dai meridian."

Q2 **A** **True or False: The Dai Mai is the only Extraordinary Vessel that runs horizontally.**
Dr. Zhang, live review: "the Dai meridian is the only one that runs horizontally... right."

Q3 **C** **Which two vessels have a confluent point that is also their starting point?**
Dr. Zhang, live review: "which two meridians have a confluent point that's the same as a starting point? [Yang] Qiao and Yin Qiao."

Q4 **B** **Which three vessels share the lower abdomen as their common point of origin?**
Dr. Zhang, live review: Ren Mai, Chong Mai, and Du Mai ("one source, three branches") all originate in the lower abdomen/uterus region.

Q5 **D** **Which vessel is called the Sea of the Yang Meridians?**
Dr. Zhang, live review, closing question: Du Mai (Governor Vessel) is the Sea of the Yang Meridians.

Q6 **A** **(Supplementary) Which vessel is called the Sea of the Yin Meridians?**
Ren Mai (Conception Vessel) is the paired counterpart -- Sea of the Yin Meridians.

PART 2 -- ADDITIONAL PRACTICE, ALL 9 WEEKS

Extra questions I wrote -- NOT from the real quizzes

Everything below is practice material I wrote in the same style as the real quizzes, covering every week of the course for complete review. None of it is verbatim final-exam source material the way Part 1 is -- use Part 1 to know exactly what's been tested; use this for broader reinforcement.

WEEK 1 -- CHANNEL THEORY FOUNDATIONS

40 questions

Q1. How many Primary Meridians (Jing) does the body have?

A. 8
B. 12
C. 14
D. 15

Q2. How many Collaterals (Luo) does the body have?

A. 8
B. 12
C. 15
D. 20

Q3. How many Zang (Yin) organs pair with primary meridians?

A. 4
B. 5
C. 6
D. 8

Q4. How many Fu (Yang) organs pair with primary meridians?

A. 4
B. 5
C. 6
D. 8

Q5. 'Channels' (Jing-Luo) as a term refers to:

A. The 12 Primary Meridians only
B. Meridians AND Collaterals together
C. Only the Extraordinary Vessels
D. Only the Divergent Meridians

Q6. Yin meridians of the HAND flow in which direction?

A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest

Q7. Yang meridians of the HAND flow in which direction?

A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest

Q8. Yang meridians of the FOOT flow in which direction?

A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest

Q9. Yin meridians of the FOOT flow in which direction?

A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest/Abdomen

Q10. The Lung (LU) meridian's peak two-hour period on the meridian clock is:

A. 1-3 AM
B. 3-5 AM
C. 5-7 AM
D. 7-9 AM

Q11. A meridian's full 3-part name is built from which three features?

A. Hand/Foot + Yin/Yang + Zang/Fu
B. Element + Season + Organ
C. Anterior/Posterior + Zang/Fu + Number
D. Yin/Yang + Element + Direction

Q12. Which sequence correctly lists the Outer/Anterior Circuit?

A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. SP -> ST -> LI -> LU

Q13. Which sequence correctly lists the Inner/Posterior Circuit?

A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. KI -> BL -> SI -> HT

Q14. Which sequence correctly lists the Middle Circuit?

A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. GB -> LR -> PC -> SJ

Q15. The three Yin naming terms (by location on the limb) are:

A. Taiyin, Shaoyin, Jueyin
B. Yangming, Taiyang, Shaoyang
C. Taiyin, Yangming, Shaoyang
D. Jueyin, Taiyang, Shaoyin

Q16. The three Yang naming terms (by location on the limb) are:

A. Taiyin, Shaoyin, Jueyin
B. Yangming, Taiyang, Shaoyang
C. Taiyin, Yangming, Shaoyang
D. Jueyin, Taiyang, Shaoyin

Q17. Hand Yin meridians meet Hand Yang meridians where on the body?

A. The fingers
B. The face
C. The toes
D. The chest

Q18. Hand Yang meridians meet Foot Yang meridians where on the body?

A. The fingers
B. The face
C. The toes
D. The chest

Q19. Foot Yang meridians meet Foot Yin meridians where on the body?

A. The fingers
B. The face
C. The toes
D. The chest

Q20. Foot Yin meridians meet Hand Yin meridians where on the body, completing the full loop?

A. The fingers
B. The face
C. The toes
D. The chest

Q21. Beyond the 12 Luo points on the primary meridians, which THREE additional collaterals bring the total to 15?

A. Du Mai Luo, Ren Mai Luo, Spleen's Great Luo (Dabao)
B. LU Luo, SP Luo, HT Luo (duplicated)
C. 3 unnamed 'extra' meridian branches
D. The 3 Yang divergent channels

Q22. Per Dr. Zhang's direct clarification in lecture, if an exam question says 'channels' rather than 'meridians,' you should assume it means:

A. Only the 12 Primary Meridians
B. Meridians AND Collaterals together - the whole system
C. Only the Extraordinary Vessels
D. It is interchangeable with 'points'

Q23. How many Divergent Meridians branch from the 12 Primary Meridians?

A. 8
B. 12
C. 15
D. 24

Q24. How many Muscle (Sinew) Regions and how many Cutaneous Regions exist?

A. 8 and 8
B. 12 and 12
C. 15 and 15
D. 12 and 15

Q25. How many Extraordinary Vessels are there, and which organ are they most closely tied to?

A. 6 vessels, tied to the Liver
B. 8 vessels, tied to the Kidney
C. 8 vessels, tied to the Spleen
D. 12 vessels, tied to the Heart

Q26. Which of the following is TRUE about same-named channels on opposite limbs (e.g. Hand Taiyin LU and Foot Taiyin SP)?

A. They have no functional relationship
B. They communicate with one another; a problem in one can sometimes be addressed via the other
C. They are identical pathways duplicated on the leg
D. They only relate to each other during extraordinary vessel activity

Q27. Dr. Zhang's Week 1 homework assignment specifically required drawing:

A. All 12 meridians at once, in one sitting
B. The circulation, direction, and distribution of the Lung Meridian of Hand-Taiyin specifically
C. The 8 Extraordinary Vessels
D. The Five Shu points of every channel

Q28. Which of the following is NOT one of the three core functions of the meridians?

A. Transporting Qi and Blood to nourish tissues
B. Resisting (defending against disease, reflecting symptoms)
C. Treatment (transmitting needling sensation, regulating deficiency/excess)
D. Synthesizing new Qi from food and air

Q29. EXCEPT question: All of the following are TRUE about the channel system EXCEPT:

A. Meridians run deep; collaterals branch more superficially
B. There are 12 Primary Meridians and 15 Collaterals
C. The Extraordinary Vessels are each directly paired with one Zang-Fu organ, exactly like the 12 Primary Meridians
D. Meridians and Collaterals together form the channel system's core network

Q30. Which statement correctly distinguishes 'meridians' from 'collaterals' as Dr. Zhang described them?

A. Meridians are superficial branches; collaterals run deep like a river
B. Meridians run deep like a river; collaterals are more superficial branches spreading from Luo-connecting points
C. There is no functional distinction - the terms are interchangeable in all contexts
D. Collaterals outnumber meridians 20 to 12

Q31. Per the Mawangdui Silk Manuscripts (excavated from a Western Han Dynasty tomb), which was discovered/recorded first?

A. The acupuncture points
B. The channel pathways
C. Both simultaneously
D. Neither - they appear only in the Huangdi Neijing

Q32. Which classical text formally established the Meridian System as composed primarily of the 12 Primary Meridians?

A. The Shang Han Lun
B. The Huangdi Neijing (Yellow Emperor's Inner Canon)
C. The Ben Cao Gang Mu
D. The Nan Jing alone

Q33. Per Ling Shu Chapter 71 (cited directly on Dr. Zhang's slide), pathogenic Qi that invades via the SPLEEN tends to linger where?

A. Both elbows
B. Both axillae (armpits)
C. Both groins
D. Both popliteal fossae (backs of knees)

Q34. Which classical citation supports the meridians' 'Transporting' function (Function A)?

A. Ling Shu, Chapter 47
B. Ling Shu, Chapter 71
C. Ling Shu, Chapter 5
D. Ling Shu, Chapter 9

Q35. On Dr. Zhang's classification tree (Slide 21), the 12 Primary Meridians branch outward into which set of structures (among others)?

A. Only the 8 Extraordinary Vessels
B. The 15 Collaterals, 12 Divergent Meridians, 12 Muscle Regions, and 12 Cutaneous Regions
C. Only acupuncture points
D. Only the Zang-Fu organs directly

Q36. On the 'Meridians vs. Collaterals' comparison table, which column is described as 'Leading - the pathways through which Qi and Blood circulate'?

A. Collaterals (Luomai)
B. Meridians (Jingmai)
C. Both equally
D. Neither - that describes the Extraordinary Vessels

Q37. On the Three Main Circuits master diagram (Slide 37), what is the complete circulation loop shown across all three circuits?

A. Chest -> Hands/Fingers -> Face/Head -> Foot/Toes -> Chest
B. Head -> Chest -> Hands -> Foot -> Head
C. Hands -> Chest -> Head -> Chest -> Foot
D. Foot -> Head -> Hands -> Chest -> Foot

Q38. Modern research reframes meridians as a combination of which structures/processes, per lecture?

A. Only nerve pathways
B. Peripheral nerve pathways, arterial pathways, and myofascial referred-pain patterns
C. Only blood vessels
D. Only fascial planes

Q39. Which historical TCM figure is mentioned in lecture as having mapped the meridians in old maps?

A. Sun Simiao
B. Zhang Zhongjing
C. Li Shizhen
D. Hua Tuo

Q40. Per Ling Shu Chapter 9 (cited on Dr. Zhang's slide as supporting the Treatment function), what must acupuncture treatment aim at regulating?

A. The pulse
B. The flow of Qi
C. Body temperature
D. Muscle tension

WEEK 2 -- LU / LI -- METAL

30 questions

Q1. How many points does the LU channel have?

A. 9
B. 11
C. 19
D. 20

Q2. How many points does the LI channel have?

A. 9
B. 11
C. 19
D. 20

Q3. What element do LU and LI both belong to?
A. Earth
B. Fire
C. Metal
D. Water

Q4. LU is classified as which Yin/Yang type?
A. Hand-Taiyin (Yin)
B. Hand-Yangming (Yang)
C. Foot-Taiyin (Yin)
D. Foot-Yangming (Yang)

Q5. LI is classified as which Yin/Yang type?
A. Hand-Taiyin (Yin)
B. Hand-Yangming (Yang)
C. Foot-Taiyin (Yin)
D. Foot-Yangming (Yang)

Q6. Peak Qi activity of the Lung meridian is:
A. 1-3 AM
B. 3-5 AM
C. 5-7 AM
D. 7-9 AM

Q7. Peak Qi activity of the Large Intestine meridian is:
A. 3-5 AM
B. 5-7 AM
C. 7-9 AM
D. 9-11 AM

Q8. Direction of Qi flow in the LU meridian?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest

Q9. Direction of Qi flow in the LI meridian?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest

Q10. The CONNECTING organ of the Lung meridian is:
A. Stomach
B. Large Intestine
C. Spleen
D. Bladder

Q11. LU's Back-Shu point is:
A. BL11
B. BL13
C. BL18
D. BL25

Q12. LU's Front-Mu point is notable because:

A. It sits on CV, like most Front-Mu points
B. It is LU1, on LU's OWN channel -- unusual
C. LU has no Front-Mu point
D. It is shared with the Heart channel

Q13. LI's Front-Mu point is:

A. LI4, on LI's own channel
B. ST25, on the Stomach channel
C. CV12
D. BL25

Q14. LU7 (Lieque) holds which combination of special categories?

A. He-Sea + Xi-Cleft
B. Luo-Connecting + Confluent (opens Ren Mai) + Command (head/neck)
C. Jing-Well + Yuan-Source
D. Shu-Stream + Back-Shu

Q15. Which point is BOTH the Yuan-Source and Shu-Stream point of LU?

A. LU5 Chize
B. LU6 Kongzui
C. LU7 Lieque
D. LU9 Taiyuan

Q16. LI's Yuan-Source point is:

A. LI1 Shangyang
B. LI4 Hegu
C. LI11 Quchi
D. LI20 Yingxiang

Q17. Which of the following is forbidden in pregnancy?

A. LU7 Lieque
B. LI4 Hegu
C. LI11 Quchi
D. LU9 Taiyuan

Q18. Which LU point is the He-Sea?

A. LU5 Chize
B. LU7 Lieque
C. LU9 Taiyuan
D. LU11 Shaoshang

Q19. Which LI point is the He-Sea?

A. LI4 Hegu
B. LI6 Pianli
C. LI11 Quchi
D. LI20 Yingxiang

Q20. LU's Xi-Cleft point is:

A. LU5 Chize
B. LU6 Kongzui
C. LU7 Lieque
D. LU9 Taiyuan

Q21. LI's Luo-Connecting point is:

A. LI4 Pianli
B. LI6 Pianli
C. LI7 Wenliu
D. LI11 Quchi

Q22. Which teeth does the LI channel connect to specifically?

A. Upper teeth/gums
B. Lower teeth/gums
C. Both equally
D. Neither -- LI has no dental connection

Q23. LI4 (Hegu) is clinically notable for:

A. Being the Front-Mu of LI
B. Near-immediate relief of lower-tooth pain
C. Opening the Ren Mai
D. Being LI's Xi-Cleft point

Q24. All of the following are true of LU EXCEPT:

A. LU has 11 points
B. LU1 is LU's own Front-Mu
C. LU has multiple named crossing points
D. LU connects internally to the Middle Jiao/Stomach

Q25. Per the circuit-continuity rule, LU hands off Qi to LI at the:

A. Face
B. Fingers
C. Toes
D. Chest

Q26. LU and LI together open which circuit?

A. Anterior/Outer Circuit
B. Posterior/Inner Circuit
C. Middle Circuit
D. None -- they are not part of a circuit

Q27. Which statement about LI's crossing points is TRUE?

A. LI has zero crossing points, like LU
B. LI crosses GV14, GV26, ST4, and a point near SI, more than most early-course channels
C. LI only crosses ST channel points
D. LI's crossing points are all on the leg

Q28. Which point is LU's Jing-Well point, used for sore throat/fever/loss of consciousness?

A. LU1 Zhongfu
B. LU5 Chize
C. LU9 Taiyuan
D. LU11 Shaoshang

Q29. Which point is LI's Jing-Well point?

A. LI1 Shangyang
B. LI4 Hegu
C. LI11 Quchi
D. LI20 Yingxiang

Q30. LI's last point, LI20 Yingxiang, is significant because:

A. It is LI's Xi-Cleft point
B. It crosses to the Stomach channel, and ST begins there
C. It opens the Du Mai
D. It is LI's Back-Shu point

WEEK 3 -- ST / SP -- EARTH

60 questions

Q1. Direction of Qi in the 3 foot-YANG meridians?

A. Foot to chest
B. Chest to hand
C. Hand to head
D. Head to foot

Q2. Which element do ST and SP both belong to?

A. Water
B. Fire
C. Earth
D. Metal

Q3. The CONNECTING organ of the Stomach meridian is:

A. Heart
B. Lung
C. Large Intestine
D. Spleen

Q4. ST meridian BEGINS at which point?

A. ST1 Chengqi
B. LI20 Yingxiang
C. CV24 Chengjiang
D. GV26 Shuigou

Q5. Which statement is UNIQUE to the ST channel?

A. Crosses to opposite side
B. Passes through the nipple
C. Spreads over lower tongue
D. Opens to nose

Q6. How many crossing points does the ST meridian have?

A. 4
B. 6
C. 8
D. 11

Q7. ST36 (Zusanli) holds which special categories?

A. Yuan-source + Xi-Cleft
B. He-Sea + Command (Abdomen)
C. Luo + Confluent
D. Jing-Well + Luo

Q8. ST40 (Fenglong) is clinically known as:

A. #1 tonic point
B. Sea of Blood
C. #1 phlegm-resolving point
D. Window of Heaven

Q9. Peak Qi activity of the Stomach meridian is:

A. 9-11 AM
B. 5-7 AM
C. 7-9 AM
D. 11 AM-1 PM

Q10. ST25 (Tianshu) is the Front-Mu of which organ?

A. Stomach
B. Bladder
C. Large Intestine
D. Small Intestine SET A - Questions 11-20

Q11. Direction of Qi in the Spleen meridian?

A. Head to foot
B. Chest to hand
C. Foot to chest
D. Hand to head

Q12. How many acupoints does the Spleen meridian have?

A. 11
B. 20
C. 21
D. 45

Q13. The SP distribution exception occurs at:

A. 3 cun above medial malleolus
B. 8 cun above medial malleolus
C. The knee
D. The groin

Q14. Above the 8-cun crossover, SP moves to which position relative to LR?

A. Posterior to LR
B. Same level as LR
C. In front of (anterior to) LR
D. Lateral to LR

Q15. Which is UNIQUE to the SP meridian pathway?

A. Passes through the nipple
B. Spreads over lower surface of tongue
C. Crosses to opposite side
D. Ends at the nose

Q16. SP's branch connects to which next meridian?

A. PC Pericardium
B. LI Large Intestine
C. HT Heart
D. BL Bladder

Q17. SP6 (Sanyinjiao) is which type of point?

A. Front-Mu of SP
B. Crossing of 3 Yin meridians
C. He-Sea of SP
D. Yuan-source of SP

Q18. Which SP point is the Sea of Blood?

A. SP4
B. SP6
C. SP9
D. SP10

Q19. SP4 (Gongsun) opens which extraordinary vessel?

A. Ren Mai
B. Du Mai
C. Chong Mai
D. Dai Mai

Q20. SP9 (Yinlingquan) He-Sea - primary action:

A. Moves Blood
B. Resolves Dampness
C. Opens Ren Mai
D. Clears Yangming heat SET A - Questions 21-30

Q21. UPPER teeth and gums = which channel?

A. LI
B. ST
C. SP
D. GB

Q22. How many total branches does the ST meridian have?

A. 3
B. 4
C. 5
D. 6

Q23. The Front-Mu of the Stomach itself is:

A. ST25
B. ST36
C. CV12
D. CV13

Q24. Which CV crossing point of ST is at the mentolabial groove?

A. CV10
B. CV12
C. CV13
D. CV24

Q25. ST34 (Liangqiu) location:

A. 3 cun below knee
B. 2 cun above superolateral border of patella
C. 8 cun above ST41
D. Center dorsal ankle

Q26. SP1 (Yinbai) is which type of point?

A. He-Sea
B. Yuan-source
C. Jing-Well
D. Luo-connecting

Q27. SP21 Dabao - what is its category?

A. Front-Mu
B. Xi-Cleft
C. Great Luo-Connecting of SP
D. Yuan-source

Q28. Which SP crossing point is the Front-Mu of the Liver?

A. CV3
B. CV4
C. GB24
D. LR14

Q29. Which of the following is FORBIDDEN IN PREGNANCY?

A. ST36
B. SP9
C. SP6
D. ST40

Q30. According to Dr. Zhang, ST36 has been shown in Nature studies to:

A. Open the Du Mai
B. Relieve inflammation immediately
C. Spread over lower tongue
D. Cross to opposite side SET B - Questions 31-40

Q31. The Stomach channel belongs to which of the six levels?

A. Taiyang
B. Shaoyang
C. Yangming
D. Taiyin

Q32. Which point is the Xi-Cleft of the Stomach channel?

A. ST34 Liangqiu
B. ST36 Zusanli
C. ST40 Fenglong
D. ST42 Chongyang

Q33. ST12 Quepen is located at:

A. Below the midpoint of the clavicle
B. Center of the supraclavicular fossa
C. Above the medial end of the clavicle
D. 1st intercostal space

Q34. The Back-Shu point of the Stomach is:

A. BL20
B. BL21
C. BL23
D. BL25

Q35. Which ST point marks the center of the nipple and is never needled?

A. ST16 Yingchuang
B. ST17 Ruzhong
C. ST18 Rugen
D. ST15 Wuyi

Q36. ST31 Biguan is located:

A. Directly below the ASIS, level with the perineum
B. 6 cun above the patella
C. Below the midpoint of the clavicle
D. At the inguinal groove

Q37. The Jing-River point of the Stomach channel is:

A. ST41 Jiexi
B. ST43 Xiangu
C. ST44 Neiting
D. ST45 Lidui

Q38. Which ST point sits 8 cun below ST35?

A. ST37 Shangjuxu
B. ST38 Tiaokou
C. ST39 Xiajuxu
D. ST40 Fenglong

Q39. The Stomach channel's internal branch first reaches which Ren Mai point?

A. CV4
B. CV10
C. CV12
D. CV24

Q40. On the lower leg the ST channel runs along which landmark?

A. Posterior border of the tibia
B. Anterior border of the lateral tibia
C. Medial border of the tibia
D. Between tibia and fibula heads SET B - Questions 41-50

Q41. The Yuan-Source point of the Spleen channel is:

A. SP1 Yinbai
B. SP3 Taibai
C. SP4 Gongsun
D. SP5 Shangqiu

Q42. Which SP point is the Xi-Cleft?

A. SP6 Sanyinjiao
B. SP8 Diji
C. SP9 Yinlingquan
D. SP10 Xuehai

Q43. The Front-Mu point of the Spleen is:

A. CV12 Zhongwan
B. LR13 Zhangmen
C. LR14 Qimen
D. GB24 Riyue

Q44. SP2 Dadu is which Five-Shu point, and which element?

A. Jing-Well, Wood
B. Ying-Spring, Fire
C. Shu-Stream, Earth
D. He-Sea, Water

Q45. Which SP point is level with the navel, 4 cun lateral to the midline?

A. SP14 Fujie
B. SP15 Daheng
C. SP16 Fuai
D. SP13 Fushe

Q46. The Jing-River point of the Spleen channel is:

A. SP3 Taibai
B. SP5 Shangqiu
C. SP7 Lougu
D. SP9 Yinlingquan

Q47. Which SP crossing point is the Front-Mu of the Gallbladder?

A. CV10 Xiawan
B. GB24 Riyue
C. LR14 Qimen
D. LU1 Zhongfu

Q48. The Spleen channel's surface pathway terminates at:

A. SP17 Shidou
B. SP19 Xiongxiang
C. SP20 Zhourong
D. SP21 Dabao

Q49. Which meridian receives Qi directly after the Spleen in the circadian cycle?

A. Lung
B. Heart
C. Bladder
D. Liver

Q50. SP6 Sanyinjiao is the meeting point of which three channels?

A. SP, ST, LR
B. SP, LR, KI
C. SP, KI, BL
D. SP, LR, GB SET B - Questions 51-60

Q51. SP4 Gongsun is paired with which point in the confluent point system?

A. LU7 Lieque
B. PC6 Neiguan
C. SI3 Houxi
D. TE5 Waiguan

Q52. Which ST point lies in the carotid region and influences blood pressure?

A. ST5 Daying
B. ST9 Renying
C. ST11 Qishe
D. ST12 Quepen

Q53. The ST channel crosses the Du Mai at which point on the philtrum?

A. GV20 Baihui
B. GV24 Shenting
C. GV26 Shuigou
D. GV14 Dazhui

Q54. On a YIN channel, the Jing-Well point corresponds to which element?

A. Metal
B. Water
C. Wood
D. Fire

Q55. Which statement about the SP 8-cun crossover is correct?

A. Below 8 cun SP is anterior to LR
B. Above 8 cun SP is posterior to LR
C. Below 8 cun SP is posterior to LR
D. SP and LR never change position

Q56. The Luo-Connecting point of the Stomach channel is:

A. ST34
B. ST36
C. ST40
D. ST42

Q57. Which ST point is the Lower He-Sea of the Small Intestine?

A. ST36
B. ST37
C. ST39
D. ST40

Q58. A patient reports numbness on the underside of the tongue. Which channel?

A. Heart
B. Stomach
C. Spleen
D. Kidney

Q59. Counterflow Stomach Qi typically presents as:

A. Diarrhea
B. Vomiting
C. Prolapse
D. Bleeding

Q60. Which sequence correctly completes the Anterior Circuit?

A. LU -> LI -> SP -> ST
B. LU -> LI -> ST -> SP
C. LI -> LU -> ST -> SP
D. LU -> ST -> LI -> SP

WEEK 4 -- HT / SI -- FIRE (ASSESSED VIA THE MIDTERM, NO STANDALONE QUIZ)

30 questions

Q1. How many points does the HT channel have?

A. 9
B. 11
C. 19
D. 20

Q2. How many points does the SI channel have?

A. 9
B. 11
C. 19
D. 20

Q3. What element do HT and SI both belong to?

A. Earth
B. Fire
C. Water
D. Wood

Q4. HT is classified as which Yin/Yang type?

A. Yin (Hand-Shaoyin)
B. Yang (Hand-Taiyang)
C. Yin (Foot-Shaoyin)
D. Yang (Foot-Taiyang)

Q5. SI is classified as which Yin/Yang type?

A. Yin (Hand-Shaoyin)
B. Yang (Hand-Taiyang)
C. Yin (Foot-Taiyin)
D. Yang (Foot-Yangming)

Q6. Peak Qi activity of the Heart meridian is:

A. 9-11 AM
B. 11 AM-1 PM
C. 1-3 PM
D. 3-5 PM

Q7. Peak Qi activity of the Small Intestine meridian is:

A. 11 AM-1 PM
B. 1-3 PM
C. 3-5 PM
D. 5-7 PM

Q8. The CONNECTING organ of the Heart meridian is:

A. Lung
B. Stomach
C. Small Intestine
D. Bladder

Q9. HT's Back-Shu point is:

A. BL14
B. BL15
C. BL20
D. BL27

Q10. SI's Front-Mu point is:

A. CV12
B. CV14
C. CV4
D. CV3

Q11. HT7 Shenmen holds which special point categories?

A. He-Sea + Luo-Connecting
B. Shu-Stream + Yuan-Source
C. Jing-Well + Xi-Cleft
D. Front-Mu + Back-Shu

Q12. Which HT point is the He-Sea?

A. HT3 Shaohai
B. HT7 Shenmen
C. HT9 Shaochong
D. HT1 Jiquan

Q13. SI3 Houxi holds which special categories?

A. Yuan-Source only
B. He-Sea + Xi-Cleft
C. Shu-Stream + Confluent (opens Du Mai)
D. Jing-Well + Luo

Q14. SI3's Confluent action opens the Du Mai in combination with which point?

A. LU7
B. BL62 Shenmai
C. KI6
D. SP4

Q15. HT9 Shaochong is which Five-Shu category?

A. Jing-Well
B. Ying-Spring
C. Shu-Stream
D. He-Sea

Q16. SI's Lower He-Sea point is located on which channel?

A. SI itself
B. BL
C. ST
D. GB

Q17. Which point is SI's Xi-Cleft?

A. SI4 Wangu
B. SI6 Yanglao
C. SI7 Zhizheng
D. SI8 Xiaohai

Q18. HT5 Tongli's special category is:

A. Luo-Connecting
B. Xi-Cleft
C. Yuan-Source
D. He-Sea

Q19. SI16 Tianchuang is classified as:

A. Window of Heaven
B. Confluent
C. Front-Mu
D. Back-Shu

Q20. Per Dr. Zhang's lecture, which point is specifically noted for breast milk / lactation problems?

A. HT8 Shaofu
B. SI1 Shaoze
C. SI19 Tinggong
D. HT3 Shaohai

Q21. How many crossing points does the HT channel have?

A. 0
B. 2
C. 4
D. 6

Q22. How many crossing points does SI have, and with which channels?

A. 0
B. 2 (BL1, GB14)
C. 6 (mostly abdomen/chest)
D. 11 (mostly face/head)

Q23. SI's facial branch crosses BL1 Jingming en route to:

A. The ear
B. The inner canthus of the eye
C. The nose
D. The mouth

Q24. Which statement about HT is exam-critical and TRUE?

A. HT has the most points of any channel
B. HT is the only channel with zero crossing points
C. HT connects internally to the Lung
D. HT's Back-Shu is CV14

Q25. Per Dr. Zhang's circuit-continuity trap, SI connects internally to which organ NEXT?

A. Pericardium
B. San Jiao
C. Bladder
D. Kidney

Q26. HT and SI together open which circuit?

A. Anterior Circuit
B. Posterior Circuit (also called Inner Circuit)
C. Ministerial Fire Circuit
D. Middle Circuit

Q27. The Primary Fire pair (HT/SI) should not be confused with which other Fire pair?

A. LU/LI
B. ST/SP
C. PC/SJ (Ministerial Fire)
D. BL/KI

Q28. EXCEPT: all of the following are TRUE about SI EXCEPT:

A. SI has more than double HT's points
B. SI3 opens the Du Mai
C. SI's Lower He-Sea is on the SI channel itself
D. SI crosses BL1 and GB14

Q29. Which HT point is the emergency point for severe heart pain and revives consciousness?
A. HT7 Shenmen
B. HT9 Shaochong
C. HT3 Shaohai
D. HT5 Tongli

Q30. HT6 Yinxi (Xi-Cleft) is clinically noted for:
A. Anxiety and insomnia only
B. Night sweats and acute heart pain
C. Voice disorders
D. Arm pain only

WEEK 5 -- BL / KI -- WATER

30 questions

Q1. Direction of Qi in the foot-YANG meridians (like BL)?
A. Foot to chest
B. Chest to hand
C. Hand to head
D. Head to foot

Q2. Which element do BL and KI both belong to?
A. Earth
B. Fire
C. Water
D. Metal

Q3. The CONNECTING organ of the Bladder meridian is:
A. Heart
B. Lung
C. Kidney
D. Spleen

Q4. BL meridian's first point is:
A. BL10 Tianzhu
B. BL1 Jingming
C. BL40 Weizhong
D. GV20 Baihui

Q5. Which statement is true of BL's two parallel back lines?
A. They run sequentially, one after the other
B. They run simultaneously
C. Only one is a real channel
D. They never reconverge

Q6. How many total cross-points does the BL meridian have?
A. 6
B. 9
C. 11
D. 14

Q7. BL40 (Weizhong) holds which special categories?
A. Yuan-source + Xi-Cleft
B. He-Sea + Command (back)
C. Luo + Confluent
D. Jing-Well + Luo

Q8. BL60 (Kunlun) is clinically known as:

A. Sea of Blood
B. The 'aspirin of acupuncture'
C. Window of Heaven
D. #1 phlegm point

Q9. Peak Qi activity of the Bladder meridian is:

A. 9-11 AM
B. 5-7 PM
C. 3-5 PM
D. 11 AM-1 PM

Q10. BL28 (Pangguangshu) is the Front-Mu of which organ?

A. Bladder
B. Kidney
C. Large Intestine
D. Stomach Week 5 Practice Quiz - Questions 11-20 (of 30) Covers BL & KI

Q11. How many points make up the BL Back-Shu series?

A. 8
B. 12
C. 16
D. None — BL has no Back-Shu series

Q12. Which point corrects fetal malposition with moxibustion?

A. BL60
B. BL40
C. BL67
D. BL23

Q13. BL's largest branch reconverges with the lumbar branch at:

A. BL54
B. BL40 (popliteal fossa)
C. BL60
D. GB30

Q14. Which GB point does BL's branch cross in the gluteal region?

A. GB30 Huantiao
B. GB24 Riyue
C. GB15 Toulinqi
D. GB3 Shangguan

Q15. BL is described in lecture as functioning as a 'bridge' channel because:

A. It has the most points of any channel
B. Its Back-Shu series treats every zang-fu organ
C. It opens the most extraordinary vessels
D. It is the only Yang channel

Q16. Direction of Qi in the Kidney meridian?

A. Head to foot
B. Chest to hand
C. Foot to chest
D. Hand to head

Q17. How many acupoints does the Kidney meridian have?

A. 21
B. 27
C. 45
D. 67

Q18. KI's straight portion terminates at:

A. The eye
B. The root of the tongue
C. The ear
D. The nipple

Q19. Which point is BOTH Yuan-Source AND Shu-Stream on the KI channel?

A. KI1
B. KI3
C. KI6
D. KI7

Q20. KI's branch from the Lung links with which next channel?

A. Heart (HT)
B. Pericardium (PC)
C. San Jiao (SJ)
D. Liver (LR) Week 5 Practice Quiz - Questions 21-30 (of 30) Covers BL & KI

Q21. KI6 (Zhaohai) is the Confluent point opening which vessel?

A. Chong Mai
B. Du Mai
C. Yinqiao Mai
D. Dai Mai

Q22. Per Dr. Zhang's explicit clinical teaching point, heel pain should make you think of:

A. Bladder first
B. Kidney first
C. Spleen first
D. Liver first

Q23. KI intersects the Spleen channel at which point?

A. SP4
B. SP6
C. SP9
D. SP10

Q24. Which point is the Confluent point of BL, opening the Yang Qiao Mai?

A. BL60
B. BL62
C. BL63
D. BL64

Q25. KI's pathway curves behind which anatomical landmark?

A. Lateral malleolus
B. Medial malleolus
C. Patella
D. Olecranon

Q26. Week 5 completes which course milestone?
A. Anterior Circuit
B. Posterior (Inner) Circuit
C. Extraordinary Vessels
D. Five-Shu system

Q27. Which four channels make up the Posterior/Inner Circuit?
A. LU, LI, ST, SP
B. HT, SI, BL, KI
C. PC, SJ, GB, LR
D. LU, HT, KI, PC

Q28. KI27 (Shufu) is located at:
A. Sole of the foot
B. Medial malleolus
C. Inferior border of the clavicle
D. Popliteal crease

Q29. Which point tonifies Kidney Yang and treats night sweats (often paired with HT6)?
A. KI1
B. KI3
C. KI6
D. KI7

Q30. BL does NOT connect internally to which organ (common trap)?
A. Kidney
B. Lung
C. Bladder
D. It has no internal connections Week 5 Quiz -

WEEK 6 -- PC / SJ / GB / LR -- MIDDLE CIRCUIT

30 questions

Q1. What is the pertaining organ of the Pericardium meridian?
A. Heart
B. Pericardium
C. San Jiao
D. Small Intestine

Q2. How many crossing points does the PC channel have?
A. 0
B. 2
C. 9
D. 14

Q3. Direction of Qi flow in the PC meridian?
A. Chest to hand
B. Hand to head
C. Head to foot
D. Foot to chest

Q4. PC runs on the arm in which position relative to LU and HT?
A. Anterior to both
B. Posterior to both
C. Between LU (anterior) and HT (posterior)
D. Between HT (anterior) and LU (posterior)

Q5. Which PC point is BOTH Luo-Connecting and a Confluent point (opens Yin Wei Mai)?

A. PC3
B. PC6
C. PC7
D. PC8

Q6. PC's Yuan-Source point is:

A. PC3 Quze
B. PC6 Neiguan
C. PC7 Daling
D. PC9 Zhongchong

Q7. How many total points does the PC channel have?

A. 6
B. 9
C. 12
D. 19

Q8. What is the connecting organ of the San Jiao meridian?

A. Gallbladder
B. Liver
C. Pericardium
D. Bladder

Q9. SJ5 Waiguan opens which Extraordinary Vessel?

A. Dai Mai
B. Yang Wei Mai
C. Yin Wei Mai
D. Chong Mai Week 6 Practice Quiz - Questions 10-18 (of 30) Covers SJ & GB

Q10. At the shoulder, how does the SJ channel relate to the GB channel?

A. SJ never crosses GB
B. SJ crosses GB once, in front only
C. They cross TWICE -- GB in front, then SJ crosses back behind
D. SJ and GB run parallel, never touching

Q11. San Jiao's active hours are:

A. 7-9 PM
B. 9-11 PM
C. 11 PM-1 AM
D. 1-3 AM

Q12. How many points does the SJ channel have?

A. 9
B. 14
C. 23
D. 44

Q13. SJ's Front-Mu point is:

A. CV5 Shimen
B. CV17 Danzhong
C. GB24 Riyue
D. BL22 Sanjiaoshu

Q14. SJ17 Yifeng is a crossing point most associated with treating:

A. Vertex headache
B. Tinnitus, deafness, facial paralysis
C. Forbidden in pregnancy
D. Nausea and vomiting

Q15. SJ's Lower He-Sea point (used for Fu-organ disorders, located on the leg) is:

A. SJ10 Tianjing
B. GB34 Yanglingquan
C. BL39 Weiyang
D. ST36 Zusanli

Q16. How many points does the GB channel have, and where does that rank it?

A. 23 -- 4th largest
B. 44 -- 3rd largest after BL and ST
C. 67 -- largest of all
D. 14 -- smallest Yang channel

Q17. GB's course on the head is uniquely described as:

A. A straight line
B. A zigzag / 'Z-shape'
C. A circle around the ear only
D. It doesn't reach the head

Q18. Which GB point is FORBIDDEN in pregnancy?

A. GB20
B. GB21
C. GB34
D. GB40 Week 6 Practice Quiz - Questions 19-27 (of 30) Covers GB

Q19. GB34 Yanglingquan holds which dual special-point designation?

A. Yuan-Source + Luo-Connecting
B. He-Sea + Hui-Meeting of Sinews/Tendons
C. Xi-Cleft + Confluent
D. Jing-Well + Back-Shu

Q20. GB41 Zulinqi is the confluent point opening which Extraordinary Vessel?

A. Yang Wei Mai
B. Yin Qiao Mai
C. Dai Mai (Girdle Vessel)
D. Ren Mai

Q21. Alternating fever/chills with a bitter taste in the mouth is the classic syndrome pattern for which channel?

A. PC
B. SJ
C. GB (Shaoyang syndrome)
D. LR

Q22. The GB channel crossing-point count on the slide is:

A. Fully resolved at 9 points
B. Listed as 12, but only 9 are actually named -- unresolved
C. 0 -- GB has no crossing points
D. 44, matching its total point count

Q23. GB's Back-Shu and Front-Mu points are:

A. BL19 Danshu / GB24 Riyue
B. BL18 Ganshu / LR14 Qimen
C. BL22 Sanjiaoshu / CV5 Shimen
D. BL14 Jueyinshu / CV17 Danzhong

Q24. Which meridian crosses IN FRONT of the Liver meridian at a point 8 cun above the medial malleolus?

A. The Spleen meridian
B. The Kidney meridian
C. The Stomach meridian
D. The Gallbladder meridian

Q25. The Liver channel is the only primary channel that reaches:

A. The ear
B. The vertex (GV20)
C. The nipple
D. The heel

Q26. LR3 pairs with which point to form the classic 'Four Gates' combination?

A. LI4
B. ST36
C. SP6
D. HT7

Q27. LR13 Zhangmen carries which double special-point designation?

A. Yuan-Source + Luo-Connecting
B. Front-Mu of Spleen + Hui-Meeting of all 5 Zang
C. He-Sea + Xi-Cleft
D. Jing-Well + Back-Shu Week 6 Practice Quiz - Questions 28-30 (of 30) Covers LR

Q28. How many points does the LR channel have?

A. 9
B. 14
C. 23
D. 44

Q29. LR's active hours, and what happens if a patient wakes during this window?

A. 7-9 PM -- treat Pericardium
B. 1-3 AM -- treat Liver function first
C. 3-5 AM -- treat Lung function first
D. 11 PM-1 AM -- treat Gallbladder

Q30. Direction of Qi flow in the Liver meridian?

A. Chest to hand
B. Hand to head
C. Head to foot
D. Foot to chest Week 6 Quiz -

WEEK 7 -- EIGHT EXTRAORDINARY VESSELS

12 questions

Q1. Which vessel is described as the “sea of the yang meridians”?

A. Ren Mai (CV)
B. Du Mai (GV)
C. Chong Mai
D. Dai Mai

Q2. Which vessel is described as the "sea of the yin meridians"?

A. Ren Mai (CV)
B. Du Mai (GV)
C. Yin Qiao Mai
D. Yin Wei Mai

Q3. Chong Mai carries three "sea of..." titles. Which of the following is NOT one of them?

A. Sea of the 12 meridians
B. Sea of blood
C. Sea of the zang-fu organs
D. Sea of the yang meridians

Q4. How many acupuncture points does the Governor Vessel have?

A. 24
B. 28
C. 23
D. 44

Q5. How many acupuncture points does the Conception Vessel have?

A. 28
B. 22
C. 24
D. 20

Q6. Which TWO vessels are the only ones with their own dedicated acupuncture points?

A. Chong Mai and Dai Mai
B. GV and CV
C. Yang Qiao and Yin Qiao
D. Yang Wei and Yin Wei

Q7. What is the ONE structural feature all 8 Extraordinary Vessels share, distinguishing them from the 12 primary meridians?

A. They all run vertically
B. None pertains to a zang or fu organ
C. They all have 12 points
D. They all start at the fingertips

Q8. Which vessel is the ONLY one of the 8 that runs horizontally rather than vertically?

A. Chong Mai
B. Dai Mai
C. Yang Wei Mai
D. Ren Mai

Q9. "One source, three branches" (Yi Yuan San Qi) refers to which three vessels?

A. GV, CV, Dai Mai
B. GV, CV, Chong Mai
C. Chong, Dai, Wei
D. Qiao, Wei, Dai Vessel identity, sea titles, structure

Q10. Which vessel governs sleep/wake balance by keeping the body alert and active (as opposed to promoting rest)?

A. Yin Qiao Mai
B. Yang Qiao Mai
C. Yin Wei Mai
D. Dai Mai

Q11. Which vessel dominates the EXTERIOR of the whole body and connects to all yang meridians?

A. Yang Wei Mai
B. Yin Wei Mai
C. Yang Qiao Mai
D. Chong Mai

Q12. Which vessel dominates the INTERIOR of the whole body and connects to all yin meridians?

A. Yin Qiao Mai
B. Yin Wei Mai
C. Ren Mai
D. Chong Mai

WEEK 8 -- 15 COLLATERALS, DIVERGENT, SINEW & CUTANEOUS (NO QUIZ ADMINISTERED)

16 questions

Q1. How many Luo-Connecting points ("15 Collaterals") are there in total?

A. 12
B. 14
C. 15
D. 16

Q2. What acupoint gives rise to the Great (Major) Collateral of the Spleen?

A. SP 4 Gongsun
B. SP 21 Dabao
C. SP 6 Sanyinjiao
D. SP 9 Yinlingquan

Q3. Why does the body need a 15th collateral beyond the 12 paired + CV + GV (14)?

A. To cover the top of the head
B. To cover the lateral side of the chest
C. To cover the soles of the feet
D. To cover the palms

Q4. What is the Luo-Connecting point of the Lung meridian, and what Extraordinary Vessel confluent point does it double as?

A. LU 9 Taiyuan; Chong Mai
B. LU 7 Lieque; Ren Mai (CV)
C. LU 5 Chize; Du Mai (GV)
D. LU 11 Shaoshang; Dai Mai

Q5. Where do the Luo-Connecting points of the HAND meridians generally cluster?

A. Around the elbow
B. Around the wrist
C. Around the shoulder
D. Around the fingertips

Q6. Where do the Luo-Connecting points of the FOOT meridians generally cluster?

A. Around the knee
B. Around the hip
C. Around the ankle (malleolus)
D. Around the toes

Q7. What do the 12 Divergent Channels (Jing Bie) lack that the 12 primary meridians have?

A. A course through the chest
B. Their own acupuncture points
C. A relationship to Yin/Yang
D. A beginning point

Q8. In the Li-He-Chu-merge framework for Divergent Channels, what does "He" refer to?

A. Where it begins
B. The organs/systems it involves
C. Where it exits to the surface
D. The meridian it merges into

Q9. All 6 Yin Divergent Channels eventually do what?

A. Develop their own acupoints
B. Merge into their paired Yang primary meridian
C. Terminate at the umbilicus
D. Connect directly to the brain

Q10. Which Divergent Channel is the only one that crosses the Dai (Belt) Meridian along its course?

A. Bladder
B. Kidney
C. Liver
D. Gallbladder Luo, Divergent, Sinew, Cutaneous

Q11. Which Divergent Channel runs THROUGH the heart on its way to the mouth and eye?

A. Stomach
B. Spleen
C. Small Intestine
D. Large Intestine

Q12. What do the 12 Muscle (Sinew) Regions connect, that the primary meridians and divergent channels do not directly address?

A. Zang-fu organs
B. Bones, joints, and muscles
C. Blood vessels
D. The brain

Q13. All 3 Yang Muscle Regions of the FOOT connect with which structure?

A. The genitals
B. The eyes
C. The thoracic cavity
D. The forehead angle

Q14. All 3 Yin Muscle Regions of the HAND connect with which structure?

A. The eyes
B. The genitals
C. The thoracic cavity (chest)
D. The forehead

Q15. What are the 12 Cutaneous Regions (Pi Bu)?

A. The deepest layer of the meridian system
B. The parts of the 12 meridians reflected on the body surface
C. A synonym for the 15 Collaterals
D. The points shared between two meridians

Q16. Per Su Wen Chapter 56, what is the order of disease transmission from the surface inward?

A. Meridians -> Skin -> Collaterals -> Organs
B. Skin -> Collaterals -> Meridians -> Fu organs -> Zang organs
C. Collaterals -> Skin -> Zang organs -> Fu organs
D. Skin -> Zang organs -> Fu organs -> Meridians

WEEK 9 -- FIVE SHU MASTER REVIEW (NO NEW QUIZ -- 100% REVIEW PER DR. ZHANG)

16 questions

Q1. Which Five Shu point category is located at the tips of the fingers and toes?

A. Jing-Well
B. Ying-Spring
C. Shu-Stream
D. He-Sea

Q2. Which Five Shu point category treats disorders of the six Fu (hollow) organs?

A. Jing-Well
B. Ying-Spring
C. Jing-River
D. He-Sea

Q3. What is the Shu-Stream point of the Lung meridian, and what special role does it also hold?

A. Taiyuan LU9 -- also the Yuan-Source point
B. Chize LU5 -- also the He-Sea point
C. Shaoshang LU11 -- also the Jing-Well point
D. Lieque LU7 -- also the Luo point

Q4. Which point is the Confluent (opening) point of the Chong Vessel?

A. Houxi SI3
B. Gongsun SP4
C. Zulinqi GB41
D. Waiguan SJ5

Q5. Houxi (SI3) and Shenmai (BL62) form a master couple that treats which shared body region?

A. Chest and stomach
B. Inner canthus, ear, shoulder, neck
C. Lower abdomen
D. Outer canthus and cheek

Q6. Which meridian's Luo-Connecting point is Guangming GB37?

A. Liver
B. Gallbladder
C. Bladder
D. Sanjiao

Q7. Which of the 15 Collaterals is NOT tied to a paired organ meridian?

A. Lieque LU7
B. Tongli HT5
C. The Major Collateral of the Spleen (Dabao SP21)
D. Waiguan SJ5

Q8. What is the originating point of the Governor Vessel's collateral?

A. Jiuwei CV15
B. Changqiang GV1
C. Dabao SP21
D. Guanyuan CV4

Q9. Why do Cutaneous Regions form only 6 groups instead of 12?

A. They only cover the Yang meridians
B. The Hand and Foot meridian of the same name (e.g. both Taiyang) merge into one region
C. They only cover the trunk, not the limbs
D. Extraordinary Vessels replace half of them

Q10. Per the diagnostic color rule from Su Wen Ch. 56, what does blue-colored skin signify?

A. Heat syndrome
B. Cold syndrome
C. Local pain
D. Blockage of qi and blood Five Shu, Confluent, Collaterals, Cutaneous, Exam Table

Q11. What is the pertaining organ and first point of the Kidney meridian?

A. Kidney; Yongquan KI1 (sole)
B. Bladder; Jingming BL1
C. Kidney; Taixi KI3
D. Liver; Dadun LR1

Q12. Which meridian is the ONLY one that connects to both the inner AND outer canthus of the eye?

A. Bladder
B. Gallbladder
C. Small Intestine
D. Stomach

Q13. What is the direction of Qi flow for the Yang meridians of the foot?

A. Chest to hand
B. Hand to head
C. Head to foot
D. Foot to abdomen

Q14. Which meridian has the highest total point count, and why?

A. Gallbladder (44 pts) -- zig-zag head pathway
B. Bladder (67 pts) -- 4 branches, largest meridian
C. Stomach (45 pts) -- longest running course
D. Large Intestine (20 pts) -- most branches

Q15. Per Dr. Zhang's PCOS/PMOS protocol, what was the reported change in HOMA-IR (insulin resistance)?

A. No significant change
B. 5.26 to 2.89 ($p<0.05$)
C. 2.89 to 5.26 (worsened)
D. Not measured in this study

Q16. In the JAMA 2017 urinary incontinence RCT, which points were used for electroacupuncture?

A. CV4 and CV6
B. BL33 and BL35 (bilateral)
C. SP6 and ST36
D. GV20 and CV4

ANSWER KEY -- ADDITIONAL PRACTICE

All 9 weeks

WEEK 1 -- CHANNEL THEORY FOUNDATIONS

Q1 **B** **How many Primary Meridians (Jing) does the body have?**
12 Primary Meridians - the main 'rivers' of the channel system.

Q2 **C** **How many Collaterals (Luo) does the body have?**
15 Collaterals: one Luo-connecting point per primary meridian (12) plus the Luo of Du Mai, Ren Mai, and the Spleen's Great Luo (Dabao).

Q3 **C** **How many Zang (Yin) organs pair with primary meridians?**
6 Zang organs: Lung, Spleen, Heart, Liver, Kidney, Pericardium.

Q4 **C** **How many Fu (Yang) organs pair with primary meridians?**
6 Fu organs: Large Intestine, Stomach, Small Intestine, Bladder, Gallbladder, San Jiao.

Q5 **B** **'Channels' (Jing-Luo) as a term refers to:**
Dr. Zhang directly clarified this in lecture: 'channels' is the bigger, umbrella term - Meridians (Jing) plus Collaterals (Luo).

Q6 **A** **Yin meridians of the HAND flow in which direction?**
Yin meridians of the hand (LU, HT, PC) all flow chest -> hand.

Q7 **B** **Yang meridians of the HAND flow in which direction?**
Yang meridians of the hand (LI, SI, SJ) all flow hand -> head.

Q8 **C** **Yang meridians of the FOOT flow in which direction?**
Yang meridians of the foot (ST, BL, GB) all flow head -> foot.

Q9 **D** **Yin meridians of the FOOT flow in which direction?**
Yin meridians of the foot (SP, KI, LR) all flow foot -> chest/abdomen, completing the loop.

Q10 **B** **The Lung (LU) meridian's peak two-hour period on the meridian clock is:**
LU peaks 3-5 AM, the very start of the 12-meridian clock cycle.

Q11 **A** **A meridian's full 3-part name is built from which three features?**
Every meridian name states its location (Hand or Foot), its nature (Yin or Yang), and its pertaining organ (Zang or Fu).

Q12 **A** **Which sequence correctly lists the Outer/Anterior Circuit?**
Outer/Anterior Circuit (Taiyin/Yangming): LU -> LI -> ST -> SP.

Q13 **B** **Which sequence correctly lists the Inner/Posterior Circuit?**
Inner/Posterior Circuit (Shaoyin/Taiyang): HT -> SI -> BL -> KI. 'Posterior' and 'Inner' name the same circuit across different slide versions.

Q14 **C** **Which sequence correctly lists the Middle Circuit?**
Middle Circuit (Jueyin/Shaoyang): PC -> SJ -> GB -> LR.

Q15 **A** **The three Yin naming terms (by location on the limb) are:**
Taiyin (Anterior), Shaoyin (Posterior), Jueyin (Middle) - the three Yin position names.

Q16 **B** **The three Yang naming terms (by location on the limb) are:**
Yangming (Anterior), Taiyang (Posterior), Shaoyang (Middle) - the three Yang position names.

Q17 **A** **Hand Yin meridians meet Hand Yang meridians where on the body?**
Hand Yin meets Hand Yang at the fingers (e.g. LU's branch meets LI1 at the index finger).

Q18 **B** **Hand Yang meridians meet Foot Yang meridians where on the body?**
Hand Yang meets Foot Yang at the face (e.g. LI ends at LI20, ST begins there).

Q19 **C** **Foot Yang meridians meet Foot Yin meridians where on the body?**
Foot Yang meets Foot Yin at the toes (e.g. ST ends at ST45, SP begins at SP1).

Q20 **D** **Foot Yin meridians meet Hand Yin meridians where on the body, completing the full loop?**
Foot Yin meets Hand Yin at the chest - this closes the loop and hands off into the next circuit.

Q21 **A** **Beyond the 12 Luo points on the primary meridians, which THREE additional collaterals bring the total to 15?**
15 = 12 primary Luo points + the Luo of Du Mai + the Luo of Ren Mai + the Spleen's Great Luo (Dabao).

Q22 **B** **Per Dr. Zhang's direct clarification in lecture, if an exam question says 'channels' rather than 'meridians,' you should assume it means:**
should assume it means: A student asked this directly; Dr. Zhang confirmed 'meridians' = the 12 Primary only, while 'channels' is the whole system.

Q23 B **How many Divergent Meridians branch from the 12 Primary Meridians?**
12 Divergent Meridians - one per primary meridian, distributing on chest/abdomen/head and deepening the Zang-Fu relationship (full detail covered later in the course).

Q24 B **How many Muscle (Sinew) Regions and how many Cutaneous Regions exist?**
12 Muscle/Sinew Regions and 12 Cutaneous Regions - one of each per primary meridian.

Q25 B **How many Extraordinary Vessels are there, and which organ are they most closely tied to?**
8 Extraordinary Vessels (Du, Ren, Chong, Dai, Yinwei, Yangwei, Yinqiao, Yangqiao), acting as reservoirs of Qi and Blood closely connected to the Kidney.

Q26 B **Which of the following is TRUE about same-named channels on opposite limbs (e.g. Hand Taiyin LU and Foot Taiyin SP)?**
Taiyin SP)? Per lecture: arm and leg channels of the same name communicate with one another - a clinically useful relationship.

Q27 B **Dr. Zhang's Week 1 homework assignment specifically required drawing:**
The Week 1 homework was to draw the circulation, direction, and distribution of the LU meridian specifically - the same drawing standard applies to every meridian going forward.

Q28 D **Which of the following is NOT one of the three core functions of the meridians?**
The three functions are Transporting, Resisting, and Treatment. 'Synthesizing Qi from food and air' is a distractor - that role belongs to Spleen/Stomach digestive theory, not the meridian system itself.

Q29 C **EXCEPT question: All of the following are TRUE about the channel system EXCEPT:**
Trap: the Extraordinary Vessels are NOT organ-paired like the 12 Primary Meridians - they act as reservoirs, closely tied to the Kidney but not owned by any single Zang-Fu organ.

Q30 B **Which statement correctly distinguishes 'meridians' from 'collaterals' as Dr. Zhang described them?**
Dr. Zhang's river/branch metaphor: meridians (Jing) run deep like a river; collaterals (Luo) are the more superficial branches, spreading from each meridian's Luo-connecting point.

Q31 B **Per the Mawangdui Silk Manuscripts (excavated from a Western Han Dynasty tomb), which was discovered/recorded first?**
discovered/recorded first? The silk manuscripts describe channel pathways without yet referencing specific points - channels came first, then points.

Q32 B **Which classical text formally established the Meridian System as composed primarily of the 12 Primary Meridians?**
Meridians? The Huangdi Neijing (read as Su Wen + Ling Shu) marks the formation of acupuncture theory and establishes the 12 Primary Meridian system.

Q33 C **Per Ling Shu Chapter 71 (cited directly on Dr. Zhang's slide), pathogenic Qi that invades via the SPLEEN tends to linger where?**
linger where? Ling Shu Ch. 71: lung/heart invasion lingers in both elbows; liver in both axillae; SPLEEN in both groins; kidney in both popliteal fossae.

Q34 A **Which classical citation supports the meridians' 'Transporting' function (Function A)?**
Ling Shu Ch. 47: meridians/collaterals transport blood and Qi to adjust Yin-Yang and nourish tendons and bones - the Transporting function.

Q35 B **On Dr. Zhang's classification tree (Slide 21), the 12 Primary Meridians branch outward into which set of structures (among others)?**
structures (among others)? The full classification tree branches the 12 Primary Meridians into Collaterals, Divergent Meridians, Muscle/Sinew Regions, and Cutaneous Regions, with the 8 Extraordinary Vessels as a separate reservoir system.

Q36 B **On the 'Meridians vs. Collaterals' comparison table, which column is described as 'Leading - the pathways through which Qi and Blood circulate'?**
through which Qi and Blood circulate'? Meridians (Jingmai) are the 'leading' pathway - deep, trunk-like, few in number, through which Qi and Blood actually circulate. Collaterals are the shallower, branching network.

Q37 A **On the Three Main Circuits master diagram (Slide 37), what is the complete circulation loop shown across all three circuits?**
three circuits? The master diagram shows one continuous loop: Chest -> Hands/Fingers -> Face/Head -> Foot/Toes -> back to Chest, repeating across all three circuits.

Q38 B **Modern research reframes meridians as a combination of which structures/processes, per lecture?**
The modern reframe: meridians can be understood as a combination of peripheral nerve pathways, arterial pathways, and myofascial referred-pain patterns - favorable access points to the nervous system found empirically.

Q39 A **Which historical TCM figure is mentioned in lecture as having mapped the meridians in old maps?**
Dr. Zhang names Sun Simiao among famous TCM doctors who mapped the meridians historically.

Q40 B **Per Ling Shu Chapter 9 (cited on Dr. Zhang's slide as supporting the Treatment function), what must acupuncture treatment aim at regulating?**
acupuncture treatment aim at regulating? Ling Shu Ch. 9: "Acupuncture treatment must aim at regulating the flow of Qi." - the classical citation for the meridians' Treatment function.

WEEK 2 -- LU / LI -- METAL

Q1 **B** **How many points does the LU channel have?**
LU has 11 points (LU1-LU11).

Q2 **D** **How many points does the LI channel have?**
LI has 20 points (LI1-LI20) -- nearly double LU's count, consistent with the Yang/Fu-partner-has-more-points pattern.

Q3 **C** **What element do LU and LI both belong to?**
LU and LI are the Metal pair.

Q4 **A** **LU is classified as which Yin/Yang type?**
LU = Lung Meridian of Hand-Taiyin.

Q5 **B** **LI is classified as which Yin/Yang type?**
LI = Large Intestine Meridian of Hand-Yangming.

Q6 **B** **Peak Qi activity of the Lung meridian is:**
LU peaks 3-5 AM -- the very first channel in the 24-hour clock.

Q7 **B** **Peak Qi activity of the Large Intestine meridian is:**
LI peaks 5-7 AM, immediately after LU.

Q8 **A** **Direction of Qi flow in the LU meridian?**
LU is a Yin meridian of the hand: chest -> hand.

Q9 **B** **Direction of Qi flow in the LI meridian?**
LI is a Yang meridian of the hand: hand -> head.

Q10 **B** **The CONNECTING organ of the Lung meridian is:**
Pertaining = Lung, Connecting = Large Intestine (interior-exterior pair).

Q11 **B** **LU's Back-Shu point is:**
BL13 Feishu is LU's Back-Shu point. (LI's is BL25 Dachangshu.)

Q12 **B** **LU's Front-Mu point is notable because:**
LU1 Zhongfu is LU's own Front-Mu point -- unusual, since most Front-Mu points sit on CV or another channel.

Q13 **B** **LI's Front-Mu point is:**
ST25 Tianshu is LI's Front-Mu -- it sits on the STOMACH channel, not LI's own, a classic exam trap.

Q14 **B** **LU7 (Lieque) holds which combination of special categories?**
LU7 is Luo-Connecting of LU, Confluent opening Ren Mai (paired w/ KI6), AND a Command Point for head/neck.

Q15 **D** **Which point is BOTH the Yuan-Source and Shu-Stream point of LU?**
LU9 Taiyuan -- on Yin channels, Shu-Stream and Yuan-Source always coincide at the same point.

Q16 **B** **LI's Yuan-Source point is:**
LI4 Hegu is the Yuan-Source point of LI -- also FORBIDDEN in pregnancy.

Q17 **B** **Which of the following is forbidden in pregnancy?**
LI4 Hegu is forbidden in pregnancy -- it has a strong, descending Qi/Blood-moving action, one of the classic pregnancy-forbidden points (alongside SP6).

Q18 **A** **Which LU point is the He-Sea?**
LU5 Chize, at the elbow crease, is LU's He-Sea point.

Q19 **C** **Which LI point is the He-Sea?**
LI11 Quchi, at the lateral elbow crease, is LI's He-Sea point -- clears heat, especially Heat in the Blood.

Q20 **B** **LU's Xi-Cleft point is:**
LU6 Kongzui is LU's Xi-Cleft point -- used for acute presentations (e.g. hemoptysis, acute asthma).

Q21 **B** **LI's Luo-Connecting point is:**
LI6 Pianli is LI's Luo-Connecting point, linking to LU -- the closest Luo pairing around the wrist to LU7.

Q22 **B** **Which teeth does the LI channel connect to specifically?**
LI connects to the LOWER teeth/gums. Upper teeth/gums = ST channel -- a classic Dr. Zhang exam distinction.

Q23 **B** **LI4 (Hegu) is clinically notable for:**
LI4 Hegu is documented for near-immediate relief of lower-tooth pain -- one of the highest-yield clinical pearls for LI.

Q24 **C** **All of the following are true of LU EXCEPT:**
LU has NO named crossing points -- it is a terminal Yin channel, the classic paired trap alongside HT/PC.

Q25 **B** **Per the circuit-continuity rule, LU hands off Qi to LI at the:**
Hand Yin (LU) ends and Hand Yang (LI) begins at the fingers -- LU7's branch meets LI1 at the index finger.

Q26 **A** **LU and LI together open which circuit?**
LU -> LI is the FIRST leg of the Anterior/Outer Circuit (LU-LI-ST-SP), completed first in the course sequence.

Q27 **B** **Which statement about LI's crossing points is TRUE?**
LI has multiple crossing points (GV14, GV26, ST4, and an SI-area point) -- more than most channels covered early in the course.

Q28 **D** **Which point is LU's Jing-Well point, used for sore throat/fever/loss of consciousness?**
LU11 Shaoshang is LU's Jing-Well point -- classic first-aid/resuscitation point.

Q29 **A** **Which point is LI's Jing-Well point?**
LI1 Shangyang is LI's Jing-Well point -- sore throat, fever, loss of consciousness.

Q30 **B** **LI's last point, LI20 Yingxiang, is significant because:**
LI20 Yingxiang is where LI hands off to ST -- the Stomach channel's TRUE pathway origin, even though ST1 is ST's first NUMBERED point.

WEEK 3 -- ST / SP -- EARTH

Q1 **D** **Direction of Qi in the 3 foot-YANG meridians?**
Head to foot - foot yang meridians always flow from head downward to toes. Yang goes external/downward.

Q2 **C** **Which element do ST and SP both belong to?**
Both ST and SP = Earth element. They form the interior-exterior pair of the Earth phase in the Anterior Circuit.

Q3 **D** **The CONNECTING organ of the Stomach meridian is:**
ST connects with the Spleen (yin-yang interior-exterior pair). Pertaining = Stomach, Connecting = Spleen.

Q4 **B** **ST meridian BEGINS at which point?**
ST begins at LI20 Yingxiang (a crossing point of the LI channel). ST1 Chengqi is the first numbered ST point but the pathway originates at LI20.

Q5 **B** **Which statement is UNIQUE to the ST channel?**
Only the Stomach meridian passes through the nipple. Dr. Zhang: 'If patients have nipple pain, numbness - choose stomach meridian.'

Q6 **D** **How many crossing points does the ST meridian have?**
11 crossing points, mostly located in face/head. Dr. Zhang: 'Any facial symptom, always consider ST.'

Q7 **B** **ST36 (Zusanli) holds which special categories?**
ST36 = He-Sea + Command for Abdomen. Most important tonic point in TCM. Published in Nature for anti-inflammatory effects.

Q8 **C** **ST40 (Fenglong) is clinically known as:**
ST40 = #1 phlegm-resolving point in all of TCM. Resolves phlegm-dampness anywhere in the body. Luo-connecting point.

Q9 **C** **Peak Qi activity of the Stomach meridian is:**
ST peak = 7-9 AM. Eat largest meal in the morning when stomach Qi is strongest.

Q10 **C** **ST25 (Tianshu) is the Front-Mu of which organ?**
ST25 Tianshu = Front-Mu of the LARGE INTESTINE (not the stomach itself). CV12 Zhongwan = Front-Mu of Stomach.

Q11 **C** **Direction of Qi in the Spleen meridian?**
SP = foot yin meridian. Foot yin meridians all flow foot to chest/abdomen.

Q12 **C** **How many acupoints does the Spleen meridian have?**
SP has 21 points: SP1 (Yinbai) to SP21 (Dabao, Great Luo-Connecting point).

Q13 **B** **The SP distribution exception occurs at:**
8 cun above the medial malleolus - the ONLY exception to the three-yin distribution rule in all 12 meridians.

Q14 **C** **Above the 8-cun crossover, SP moves to which position relative to LR?**
relative to LR? Above 8 cun, SP crosses IN FRONT of LR, returning to its Taiyin (anterior) position.

Q15 **B** **Which is UNIQUE to the SP meridian pathway?**
Only SP spreads over the LOWER SURFACE of the tongue. Dr. Zhang: 'Numbness in lower tongue = always SP in clinic.'

Q16 **C** **SP's branch connects to which next meridian?**
SP's branch goes from stomach through diaphragm into the HEART, linking the Heart Meridian of Hand-Shaoyin (HT).

Q17 **B** **SP6 (Sanyinjiao) is which type of point?**
SP6 = crossing of 3 Yin meridians (SP, LR, KI). Governs all three yin channels. STRICTLY FORBIDDEN IN PREGNANCY.

Q18 **D** **Which SP point is the Sea of Blood?**
SP10 Xuehai = Sea of Blood. Cools and moves blood; used for skin disorders (urticaria, eczema) and irregular menstruation.

Q19 **C** **SP4 (Gongsun) opens which extraordinary vessel?**
SP4 opens the CHONG MAI (Penetrating Vessel). Paired with PC6 Neiguan in the confluent point system.

Q20 **B** **SP9 (Yinlingquan) He-Sea - primary action:**
SP9 Yinlingquan = master point for RESOLVING DAMPNESS. Edema, diarrhea, urinary disorders, knee pain, vaginal discharge.

Q21 **B** **UPPER teeth and gums = which channel?**
UPPER teeth/gums = ST (ST enters upper gum and curves around lips). LOWER = LI. Exam-critical distinction per Dr. Zhang.

Q22 **D** **How many total branches does the ST meridian have?**
6 branches: face/forehead, facial internal to ST+SP, straight portion through nipple to groin, stomach orifice to 2nd toe, tibial branch, foot branch to SP1.

Q23 **C** **The Front-Mu of the Stomach itself is:**
CV12 Zhongwan = Front-Mu of Stomach. ST25 Tianshu = Front-Mu of LI. Know both - they appear on the crossing points list.

Q24 **D** **Which CV crossing point of ST is at the mentolabial groove?**
CV24 Chengjiang (mentolabial groove) - ST curves around lips and descends to meet Ren Mai here before running across cheek to ST5.

Q25 **B** **ST34 (Liangqiu) location:**
ST34 = Xi-Cleft, 2 cun above the superolateral border of the patella. Used for ACUTE stomach pain and gastritis.

Q26 **C** **SP1 (Yinbai) is which type of point?**
SP1 = Jing-Well point. Located at the medial nail corner of the big toe. STARTING point of SP meridian.

Q27 **C** **SP21 Dabao - what is its category?**
SP21 Dabao = Great Luo-Connecting point of the Spleen (also called Major Collateral). Also the LAST point of SP.

Q28 **D** **Which SP crossing point is the Front-Mu of the Liver?**
LR14 Qimen = Front-Mu of Liver. SP crosses LR14, allowing one needle to treat SP, LR, and ST simultaneously.

Q29 **C** **Which of the following is FORBIDDEN IN PREGNANCY?**
SP6 (Sanyinjiao) - 3-Yin meeting point with strong descending/moving action. Also forbidden: LI4, BL60, BL67.

Q30 **B** **According to Dr. Zhang, ST36 has been shown in Nature studies to:**
studies to: Dr. Zhang: 'Studies published in Nature show ST36 can relieve inflammation immediately. It stimulates Qi and blood.' #1 tonic + immunity point.

Q31 **C** **The Stomach channel belongs to which of the six levels?**
ST is Foot-YANGMING. Yangming is the anterior yang level; on the trunk it runs most laterally.

Q32 **A** **Which point is the Xi-Cleft of the Stomach channel?**
ST34 Liangqiu, 2 cun above the superolateral border of the patella. Xi-Cleft = acute conditions.

Q33 **B** **ST12 Quepen is located at:**
ST12 Quepen sits in the center of the supraclavicular fossa, 4 cun from the midline.

Q34 **B** **The Back-Shu point of the Stomach is:**
BL21 Weishu is the Back-Shu of the Stomach. BL20 Pishu is the Back-Shu of the Spleen.

Q35 **B** **Which ST point marks the center of the nipple and is never needled?**
needled? ST17 Ruzhong is a landmark reference point only - it is not needled or moxed.

Q36 **A** **ST31 Biguan is located:**
ST31 Biguan lies directly below the anterior superior iliac spine, level with the perineum.

Q37 **A** **The Jing-River point of the Stomach channel is:**
ST41 Jiexi, at the center of the dorsal ankle crease. On a yang channel Jing-River = Fire.

Q38 **B** **Which ST point sits 8 cun below ST35?**
ST38 Tiaokou is 8 cun below ST35. ST37 is 6 cun and ST39 is 9 cun below ST35.

Q39 **C** **The Stomach channel's internal branch first reaches which Ren Mai point?**
Ren Mai point? CV12 Zhongwan - which is also the Stomach's own Front-Mu point, 4 cun above the navel.

Q40 **B** **On the lower leg the ST channel runs along which landmark?**
ST descends along the anterior border of the lateral tibia toward the dorsum of the foot.

Q41 **B** **The Yuan-Source point of the Spleen channel is:**
SP3 Taibai is both Shu-Stream and Yuan-Source. On yin channels these coincide.

Q42 **B** **Which SP point is the Xi-Cleft?**
SP8 Diji, 3 cun below SP9 on the posterior tibial border. Used for acute dysmenorrhea.

Q43 **B** **The Front-Mu point of the Spleen is:**
LR13 Zhangmen is the Front-Mu of the Spleen - note it sits on the LIVER channel.

Q44 **B** **SP2 Dadu is which Five-Shu point, and which element?**
SP2 Dadu is the Ying-Spring point. On a yin channel Ying-Spring = Fire.

Q45 B — Which SP point is level with the navel, 4 cun lateral to the midline?
midline? SP15 Daheng is level with the navel, 4 cun lateral. SP16 is 3 cun above it.

Q46 B — The Jing-River point of the Spleen channel is:
SP5 Shangqiu, anterior-inferior to the medial malleolus. On a yin channel Jing-River = Metal.

Q47 B — Which SP crossing point is the Front-Mu of the Gallbladder?
GB24 Riyue, 7th intercostal space, 4 cun lateral. One needle can treat SP, LR and GB.

Q48 D — The Spleen channel's surface pathway terminates at:
SP21 Dabao on the midaxillary line, 6th intercostal space - the Great Luo of the Spleen.

Q49 B — Which meridian receives Qi directly after the Spleen in the circadian cycle?
circadian cycle? SP (9-11 AM) hands off to HT (11 AM-1 PM), via SP's internal branch into the heart.

Q50 B — SP6 Sanyinjiao is the meeting point of which three channels?
SP6 unites the three leg YIN channels: Spleen, Liver and Kidney. Forbidden in pregnancy.

Q51 B — SP4 Gongsun is paired with which point in the confluent point system?
system? SP4 (Chong Mai) pairs with PC6 (Yin Wei Mai) - the classic chest/heart/stomach pairing.

Q52 B — Which ST point lies in the carotid region and influences blood pressure?
pressure? ST9 Renying, level with the laryngeal prominence. A Window of Heaven point - needle with care.

Q53 C — The ST channel crosses the Du Mai at which point on the philtrum?
philtrum? GV26 Shuigou, in the upper third of the philtrum. Emergency resuscitation point.

Q54 C — On a YIN channel, the Jing-Well point corresponds to which element?
element? Yin channels start at Wood; yang channels start at Metal. So SP1 = Wood, ST45 = Metal.

Q55 C — Which statement about the SP 8-cun crossover is correct?
Below 8 cun above the medial malleolus SP runs POSTERIOR to LR; above it SP crosses in front.

Q56 C — The Luo-Connecting point of the Stomach channel is:
ST40 Fenglong, 8 cun above ST41, 2 finger-breadths lateral to the tibia. The phlegm point.

Q57 C — Which ST point is the Lower He-Sea of the Small Intestine?
ST39 Xiajuxu, 9 cun below ST35, is the Lower He-Sea of SI. ST37 serves the LI.

Q58 C — A patient reports numbness on the underside of the tongue. Which channel?
Which channel? Only the SP channel spreads over the lower surface of the tongue. Dr. Zhang: always SP in clinic.

Q59 B — Counterflow Stomach Qi typically presents as:
ST Qi should descend - when it counterflows, vomiting results. SP Qi failing to ascend gives diarrhea.

Q60 B — Which sequence correctly completes the Anterior Circuit?
Chest to hand (LU), hand to head (LI), head to foot (ST), foot to chest (SP).

WEEK 4 -- HT / SI -- FIRE (ASSESSED VIA THE MIDTERM, NO STANDALONE QUIZ)

Q1 A — How many points does the HT channel have?
HT has 9 points (HT1-HT9) - the fewest of any primary channel.

Q2 C — How many points does the SI channel have?
SI has 19 points (SI1-SI19) - more than double HT's count.

Q3 B — What element do HT and SI both belong to?
HT and SI are the Primary Fire pair (not to be confused with PC/SJ, the Ministerial Fire pair).

Q4 A — HT is classified as which Yin/Yang type?
HT = Heart Meridian of Hand-Shaoyin - a Yin, Zang (organ) channel.

Q5 B — SI is classified as which Yin/Yang type?
SI = Small Intestine Meridian of Hand-Taiyang - a Yang, Fu (bowel) channel.

Q6 B — Peak Qi activity of the Heart meridian is:
HT peaks 11 AM-1 PM, immediately after SP (9-11 AM) and before SI (1-3 PM).

Q7 B — Peak Qi activity of the Small Intestine meridian is:
SI peaks 1-3 PM, immediately after HT.

Q8 C — The CONNECTING organ of the Heart meridian is:
Pertaining = Heart, Connecting = Small Intestine (interior-exterior pair).

Q9 B — HT's Back-Shu point is:
BL15 Xinshu is HT's Back-Shu point. (SI's is BL27 Xiaochangshu.)

Q10 C **SI's Front-Mu point is:**
CV4 Guanyuan is SI's Front-Mu point. (HT's is CV14 Juque.)

Q11 B **HT7 Shenmen holds which special point categories?**
HT7 is both the Shu-Stream and Yuan-Source point - the single most important point for calming Shen.

Q12 A **Which HT point is the He-Sea?**
HT3 Shaohai is the He-Sea point, at the elbow crease.

Q13 C **SI3 Houxi holds which special categories?**
SI3 is Shu-Stream and also a Confluent point opening the Du Mai.

Q14 B **SI3's Confluent action opens the Du Mai in combination with which point?**
SI3 (Houxi) pairs with BL62 (Shenmai) to open the Du Mai - one of the 8 Confluent point pairs.

Q15 A **HT9 Shaochong is which Five-Shu category?**
HT9 is the Jing-Well point - the last point of HT, on the radial side of the little finger.

Q16 C **SI's Lower He-Sea point is located on which channel?**
SI's Lower He-Sea is ST39 Xiajuxu - on the STOMACH channel, not SI. True for all six Fu organs.

Q17 B **Which point is SI's Xi-Cleft?**
SI6 Yanglao is the Xi-Cleft point, dorsal to the head of the ulna.

Q18 A **HT5 Tongli's special category is:**
HT5 Tongli is the Luo-Connecting point, linking HT to SI.

Q19 A **SI16 Tianchuang is classified as:**
SI16 is a Window of Heaven point, near the laryngeal prominence - needle with care (carotid region).

Q20 B **Per Dr. Zhang's lecture, which point is specifically noted for breast milk / lactation problems?**
Dr. Zhang highlighted SI1 (Shaoze) specifically for lactation problems.

Q21 A **How many crossing points does the HT channel have?**
HT is the only one of the 12 primary channels with ZERO crossing points anywhere on its pathway.

Q22 B **How many crossing points does SI have, and with which channels?**
SI crosses only twice: BL1 (Jingming) and GB14 (Yangbai), both on its facial branch.

Q23 B **SI's facial branch crosses BL1 Jingming en route to:**
BL1 sits at the inner canthus; SI's ascending branch crosses it heading toward the eye.

Q24 B **Which statement about HT is exam-critical and TRUE?**
HT's zero crossing points is one of the highest-yield unique-feature facts in the Weeks 1-4 scope.

Q25 C **Per Dr. Zhang's circuit-continuity trap, SI connects internally to which organ NEXT?**
SI connects to BLADDER next (not PC/SJ) via its facial branch to BL1 - a classic exam trap.

Q26 B **HT and SI together open which circuit?**
HT -> SI opens the Posterior Circuit (also called Inner Circuit on the revised Lecture 4 slide).

Q27 C **The Primary Fire pair (HT/SI) should not be confused with which other Fire pair?**
PC and SJ are Ministerial Fire, a separate pair with their own circuit taught in Week 6.

Q28 C **EXCEPT: all of the following are TRUE about SI EXCEPT:**
SI's Lower He-Sea is ST39, on the STOMACH channel - not on SI itself. The trap answer.

Q29 B **Which HT point is the emergency point for severe heart pain and revives consciousness?**
HT9 (Jing-Well) is HT's emergency point - severe heart pain, palpitations, revives consciousness.

Q30 B **HT6 Yinxi (Xi-Cleft) is clinically noted for:**
As HT's Xi-Cleft (acute) point, HT6 treats night sweats and acute heart pain.

WEEK 5 -- BL / KI -- WATER

Q1 D **Direction of Qi in the foot-YANG meridians (like BL)?**
Foot-yang meridians (like BL) always flow head to foot; yang moves externally/downward.

Q2 C **Which element do BL and KI both belong to?**
Both BL and KI = Water element, forming the Posterior Circuit's interior-exterior Water pair.

Q3 C **The CONNECTING organ of the Bladder meridian is:**
BL pertains to Bladder and connects to Kidney — its yin-yang interior-exterior partner.

Q4 B **BL meridian's first point is:**
BL1 Jingming, at the inner canthus, is the first point of the Bladder channel.

Q5 **B** **Which statement is true of BL's two parallel back lines?**
Confirmed in lecture Q&A: the two back lines run simultaneously, not as a sequential loop.

Q6 **D** **How many total cross-points does the BL meridian have?**
BL has 14 total cross-points, shared with the GV and GB channels, mostly around the head.

Q7 **B** **BL40 (Weizhong) holds which special categories?**
BL40 Weizhong is both the He-Sea point and the Command point for the back.

Q8 **B** **BL60 (Kunlun) is clinically known as:**
BL60 Kunlun is nicknamed the 'aspirin of acupuncture' for its broad pain-relief action.

Q9 **C** **Peak Qi activity of the Bladder meridian is:**
BL peak Qi time is 3-5 PM.

Q10 **A** **BL28 (Pangguangshu) is the Front-Mu of which organ?**
CV3 Zhongji is the Front-Mu of the Bladder, not a BL-numbered point itself.

Q11 **B** **How many points make up the BL Back-Shu series?**
BL13–BL28 form the full 12-point Back-Shu series, one for every zang-fu organ.

Q12 **C** **Which point corrects fetal malposition with moxibustion?**
BL67 Zhiyin corrects fetal malposition with moxibustion and assists labor induction.

Q13 **B** **BL's largest branch reconverges with the lumbar branch at:**
The lumbar branch (ending at BL40) and the largest posterior branch reconverge at BL40 in the popliteal fossa.

Q14 **A** **Which GB point does BL's branch cross in the gluteal region?**
BL's branch passes through GB30 Huantiao in the gluteal region en route down the thigh.

Q15 **B** **BL is described in lecture as functioning as a 'bridge' channel because:**
The Back-Shu series (BL13–BL28) lets BL treat every other organ system directly from the back.

Q16 **C** **Direction of Qi in the Kidney meridian?**
Foot-yin meridians (like KI) flow foot to chest.

Q17 **B** **How many acupoints does the Kidney meridian have?**
KI has 27 points, from KI1 Yongquan to KI27 Shufu.

Q18 **B** **KI's straight portion terminates at:**
KI's straight portion ascends through Liver/diaphragm/Lung and terminates at the root of the tongue.

Q19 **B** **Which point is BOTH Yuan-Source AND Shu-Stream on the KI channel?**
KI3 Taixi uniquely holds both the Shu-Stream and Yuan-Source designations.

Q20 **B** **KI's branch from the Lung links with which next channel?**
KI's branch from the Lung joins the Heart and links to the Pericardium channel, opening Week 6.

Q21 **C** **KI6 (Zhaohai) is the Confluent point opening which vessel?**
KI6 Zhaohai is the Confluent point opening the Yinqiao Mai (Yin Heel Vessel).

Q22 **B** **Per Dr. Zhang's explicit clinical teaching point, heel pain should make you think of:**
Dr. Zhang's explicit clinical teaching point: heel pain — think Kidney first.

Q23 **B** **KI intersects the Spleen channel at which point?**
KI crosses the Spleen channel at SP6 Sanyinjiao on the medial leg.

Q24 **B** **Which point is the Confluent point of BL, opening the Yang Qiao Mai?**
BL62 Shenmai is the Confluent point opening the Yang Qiao Mai.

Q25 **B** **KI's pathway curves behind which anatomical landmark?**
KI's pathway curves directly behind the medial malleolus before entering the heel.

Q26 **B** **Week 5 completes which course milestone?**
Week 5 (BL + KI) completes the Posterior Circuit, per Dr. Zhang's own closing framing. Week 5 Quiz -

Q27 **B** **Which four channels make up the Posterior/Inner Circuit?**
The Posterior/Inner Circuit = HT + SI (Week 4) + BL + KI (Week 5), four channels total.

Q28 **C** **KI27 (Shufu) is located at:**
KI27 Shufu, the final point, sits at the inferior border of the clavicle.

Q29 **D** **Which point tonifies Kidney Yang and treats night sweats (often paired with HT6)?**
KI7 Fuliu tonifies Kidney Yang and treats night sweats, often paired with HT6.

Q30 **B** **BL does NOT connect internally to which organ (common trap)?**
Trap note: BL does NOT connect to the Lung — its internal connection is Kidney only.

WEEK 6 -- PC / SJ / GB / LR -- MIDDLE CIRCUIT

Q1 **B** **What is the pertaining organ of the Pericardium meridian?**
PC's pertaining organ is directly named in the channel's own title -- Pericardium.

Q2 **A** **How many crossing points does the PC channel have?**
PC has ZERO crossing points -- the exam trap identical to HT; only these two primary channels have none.

Q3 **A** **Direction of Qi flow in the PC meridian?**
PC is a Hand-Yin channel; all three Hand-Yin channels (LU, HT, PC) flow chest to hand.

Q4 **C** **PC runs on the arm in which position relative to LU and HT?**
PC runs the MIDDLE line of the arm -- between LU (anterior) and HT (posterior). Exam-testable 'in-between' position.

Q5 **B** **Which PC point is BOTH Luo-Connecting and a Confluent point (opens Yin Wei Mai)?**
PC6 Neiguan is Luo-Connecting AND opens the Yin Wei Mai (paired with SP4).

Q6 **C** **PC's Yuan-Source point is:**
PC7 Daling is both Shu-Stream and Yuan-Source, at the midpoint of the wrist crease.

Q7 **B** **How many total points does the PC channel have?**
PC has 9 points (PC1-PC9) -- fewest of any Yin channel except HT.

Q8 **C** **What is the connecting organ of the San Jiao meridian?**
SJ (San Jiao) pairs with Pericardium as its Yin-Yang interior-exterior partner.

Q9 **B** **SJ5 Waiguan opens which Extraordinary Vessel?**
SJ5 is the confluent point opening the Yang Wei Mai, paired with GB41.

Q10 **C** **At the shoulder, how does the SJ channel relate to the GB channel?**
Per the transcript: GB runs in front of SJ to the shoulder, then turns back and crosses behind SJ -- the two Shaoyang channels cross each other twice in that region.

Q11 **B** **San Jiao's active hours are:**
SJ is active 9-11 PM (Hai) -- per the transcript, this is why we should be resting during this window, since San Jiao 'connects all organs.'

Q12 **C** **How many points does the SJ channel have?**
SJ has 23 points (SJ1-SJ23).

Q13 **A** **SJ's Front-Mu point is:**
SJ's Front-Mu is CV5 Shimen; its Back-Shu is BL22 Sanjiaoshu.

Q14 **B** **SJ17 Yifeng is a crossing point most associated with treating:**
SJ17 Yifeng, posterior to the earlobe, is a high-yield point for ear disorders -- tinnitus, deafness, TMJ, facial paralysis.

Q15 **C** **SJ's Lower He-Sea point (used for Fu-organ disorders, located on the leg) is:**
SJ's Lower He-Sea is BL39 Weiyang -- NOT on the SJ channel itself, the same trap structure as other Fu organs' lower he-sea points.

Q16 **B** **How many points does the GB channel have, and where does that rank it?**
GB has 44 points, the 3rd largest channel after BL (67) and ST (45). Week 6 Quiz -

Q17 **B** **GB's course on the head is uniquely described as:**
GB's head course is a distinctive zigzag ('Z-shape'), unique among the 12 primary channels -- exam-testable visual signature.

Q18 **B** **Which GB point is FORBIDDEN in pregnancy?**
GB21 Jianjing has a strong descending action that can induce labor -- forbidden in pregnancy, same trap category as LI4 and SP6.

Q19 **B** **GB34 Yanglingquan holds which dual special-point designation?**
GB34 is both the He-Sea point AND the Hui-Meeting point for Sinews/Tendons -- master point for tendon/ligament disorders.

Q20 **C** **GB41 Zulinqi is the confluent point opening which Extraordinary Vessel?**
GB41 opens the Dai Mai, paired with SJ5 -- the only channel whose confluent point connects to a vessel that encircles the waist.

Q21 **C** **Alternating fever/chills with a bitter taste in the mouth is the classic syndrome pattern for which channel?**
This is the classic Shaoyang syndrome, specifically associated with GB per the lecture's repeated emphasis.

Q22 **B** **The GB channel crossing-point count on the slide is:**
Content-integrity flag: the slide states '12 points / 6 meridians' but only 9 points are actually named. Confirm with Dr. Zhang before treating this as settled.

Q23 **A** **GB's Back-Shu and Front-Mu points are:**
GB's Back-Shu is BL19 Danshu; its Front-Mu is its own point, GB24 Riyue.

Q24 **A** **Which meridian crosses IN FRONT of the Liver meridian at a point 8 cun above the medial malleolus?**
The Spleen channel crosses in front of Liver at 8 cun above the medial malleolus -- the ONE exception to the usual medial-leg Yin channel order.

Q25 **B** **The Liver channel is the only primary channel that reaches:**
LR uniquely reaches the vertex and meets the Governing Vessel at GV20 Baihui -- vertex headache is a classic Liver-channel presentation.

Q26 **A** **LR3 pairs with which point to form the classic 'Four Gates' combination?**
LR3 Taichong + LI4 Hegu = the 'Four Gates,' a classic combination to move Qi and Blood, taught this week.

Q27 **B** **LR13 Zhangmen carries which double special-point designation?**
LR13 is the Front-Mu point of the SPLEEN (not Liver) AND the Hui-Meeting point for all 5 Zang organs -- a classic mix-up on exams.

Q28 **B** **How many points does the LR channel have?**
LR has 14 points (LR1-LR14) -- the smallest Yin channel of the foot.

Q29 **B** **LR's active hours, and what happens if a patient wakes during this window?**
LR is active 1-3 AM (Chou). Per the transcript, waking specifically in this window points to treating the Liver first; waking 3-5 AM points to the Lung instead.

Q30 **D** **Direction of Qi flow in the Liver meridian?**
LR is a Foot-Yin channel; all three Foot-Yin channels (SP, LR, KI) flow foot to chest/abdomen.

WEEK 7 -- EIGHT EXTRAORDINARY VESSELS

Q1 **B** **Which vessel is described as the "sea of the yang meridians"?**
Du Mai (GV) governs the qi of all yang meridians and is the sea of the yang meridians.

Q2 **A** **Which vessel is described as the "sea of the yin meridians"?**
Ren Mai (CV) receives and bears the qi of all yin meridians.

Q3 **D** **Chong Mai carries three "sea of..." titles. Which of the following is NOT one of them?**
Chong Mai's three titles are sea of the 12 meridians, sea of blood, and sea of the zang-fu organs -- "sea of the yang meridians" belongs to GV.

Q4 **B** **How many acupuncture points does the Governor Vessel have?**
GV runs GV1 Changqiang to GV28 Yinjiao -- 28 points total.

Q5 **C** **How many acupuncture points does the Conception Vessel have?**
CV runs CV1 Huiyin to CV24 Chengjiang -- 24 points total.

Q6 **B** **Which TWO vessels are the only ones with their own dedicated acupuncture points?**
Only Du Mai (GV) and Ren Mai (CV) have their own points; the other six share points with primary meridians (coalescent points).

Q7 **B** **What is the ONE structural feature all 8 Extraordinary Vessels share, distinguishing them from the 12 primary meridians?**
None of the 8 Extraordinary Vessels pertains to a zang/fu organ, and none has an interior-exterior paired relationship.

Q8 **B** **Which vessel is the ONLY one of the 8 that runs horizontally rather than vertically?**
Dai Mai (Belt Vessel) wraps horizontally around the waist -- structurally unique among the 8.

Q9 **B** **"One source, three branches" (Yi Yuan San Qi) refers to which three vessels?**
Du, Ren, and Chong Mai all arise from the lower abdomen and emerge together at the perineum before diverging.

Q10 **B** **Which vessel governs sleep/wake balance by keeping the body alert and active (as opposed to promoting rest)?**
Yang Qiao Mai keeps the body awake/active; Yin Qiao Mai promotes calm and restful sleep.

Q11 **A** **Which vessel dominates the EXTERIOR of the whole body and connects to all yang meridians?**
Yang Wei Mai connects to all yang meridians (esp. Du) and dominates the exterior of the body.

Q12 **B** **Which vessel dominates the INTERIOR of the whole body and connects to all yin meridians?**
Yin Wei Mai connects to all yin meridians (esp. Ren) and dominates the interior of the body.

WEEK 8 -- 15 COLLATERALS, DIVERGENT, SINEW & CUTANEOUS (NO QUIZ ADMINISTERED)

Q1 **C** **How many Luo-Connecting points ("15 Collaterals") are there in total?**
12 paired-meridian Luo points + CV's + GV's + the Spleen's Great Collateral = 15.

Q2 **B** **What acupoint gives rise to the Great (Major) Collateral of the Spleen?**
The Great/Major Collateral of the Spleen begins at Dabao, SP 21.

Q3 **B** **Why does the body need a 15th collateral beyond the 12 paired + CV + GV (14)?**
CV covers the front midline, GV covers the back midline, but neither covers the LATERAL chest -- the Spleen's Great Collateral fills that gap.

Q4 B **What is the Luo-Connecting point of the Lung meridian, and what Extraordinary Vessel confluent point does it double as?**
LU 7 Lieque is both the Lung's Luo point AND the confluent (opening) point of Ren Mai -- reviewed from Week 7.

Q5 B **Where do the Luo-Connecting points of the HAND meridians generally cluster?**
Per Dr. Zhang's rule of thumb, Hand-meridian Luo points cluster around the wrist.

Q6 C **Where do the Luo-Connecting points of the FOOT meridians generally cluster?**
Foot-meridian Luo points cluster around the malleolus (ankle).

Q7 B **What do the 12 Divergent Channels (Jing Bie) lack that the 12 primary meridians have?**
Divergent channels have NO acupuncture points of their own and no pertaining organ.

Q8 B **In the Li-He-Chu-merge framework for Divergent Channels, what does "He" refer to?**
Li = beginning, He = organs/systems involved, Chu = exiting, then it merges into its Yang partner.

Q9 B **All 6 Yin Divergent Channels eventually do what?**
Every Yin divergent channel merges into its paired Yang meridian -- none resurfaces as a separate Yin pathway.

Q10 B **Which Divergent Channel is the only one that crosses the Dai (Belt) Meridian along its course?**
The Kidney divergent channel crosses the Dai Meridian at the level of T7.

Q11 A **Which Divergent Channel runs THROUGH the heart on its way to the mouth and eye?**
The Stomach divergent channel passes through the heart en route to the mouth, nose, and eye.

Q12 B **What do the 12 Muscle (Sinew) Regions connect, that the primary meridians and divergent channels do not directly address?**
Muscle Regions nourish muscles and connect bones/joints -- they do NOT go inside the body or touch organs.

Q13 B **All 3 Yang Muscle Regions of the FOOT connect with which structure?**
All 3 Yang Muscle Regions of the Foot (BL, GB, ST) connect with the eyes.

Q14 C **All 3 Yin Muscle Regions of the HAND connect with which structure?**
All 3 Yin Muscle Regions of the Hand (LU, HT, PC) connect with the thoracic cavity.

Q15 B **What are the 12 Cutaneous Regions (Pi Bu)?**
Cutaneous Regions are the outermost layer -- where meridian qi is reflected on the skin.

Q16 B **Per Su Wen Chapter 56, what is the order of disease transmission from the surface inward?**
Skin -> Collaterals -> Meridians -> Fu organs -> Zang organs, progressing deeper each step.

WEEK 9 -- FIVE SHU MASTER REVIEW (NO NEW QUIZ -- 100% REVIEW PER DR. ZHANG)

Q1 A **Which Five Shu point category is located at the tips of the fingers and toes?**
Jing-Well points sit at the fingertips/toe-tips -- "where it emerges."

Q2 D **Which Five Shu point category treats disorders of the six Fu (hollow) organs?**
He-Sea points, near the elbow/knee, treat Fu-organ disorders and rebellious Qi.

Q3 A **What is the Shu-Stream point of the Lung meridian, and what special role does it also hold?**
For Yin meridians, the Shu-Stream point doubles as the Yuan-Source point (Taiyuan LU9 for Lung).

Q4 B **Which point is the Confluent (opening) point of the Chong Vessel?**
Gongsun SP4 opens the Chong Vessel; its master-couple partner is Neiguan PC6 (Yin Wei Vessel).

Q5 B **Houxi (SI3) and Shenmai (BL62) form a master couple that treats which shared body region?**
Houxi (Du Vessel) + Shenmai (Yang Qiao Vessel) share the inner canthus/ear/shoulder/neck region.

Q6 B **Which meridian's Luo-Connecting point is Guangming GB37?**
Guangming GB37 is the Gallbladder's Luo point, connecting to the Liver meridian.

Q7 C **Which of the 15 Collaterals is NOT tied to a paired organ meridian?**
The Major Collateral of the Spleen, plus the CV and GV collaterals, are the 3 'extra' collaterals -- not paired-organ Luo points.

Q8 B **What is the originating point of the Governor Vessel's collateral?**
The GV collateral arises from Changqiang GV1 in the perineum.

Q9 B **Why do Cutaneous Regions form only 6 groups instead of 12?**
Cutaneous Regions are the exception that connects Hand+Foot meridians of the same name into one continuous region.

Q10 C **Per the diagnostic color rule from Su Wen Ch. 56, what does blue-colored skin signify?**
Blue skin = local pain; dark = qi/blood blockage; yellow-red = heat; white = cold.

Q11 A **What is the pertaining organ and first point of the Kidney meridian?**
Kidney meridian pertains to the Kidney and begins at Yongquan KI1 on the sole of the foot.

Q12 C **Which meridian is the ONLY one that connects to both the inner AND outer canthus of the eye?**
Small Intestine sends a branch to the outer canthus and another below the eye to the inner canthus.

Q13 **C** **What is the direction of Qi flow for the Yang meridians of the foot?**
Yang meridians of the foot descend head -> foot, closing with the Yin meridians of the foot.

Q14 **B** **Which meridian has the highest total point count, and why?**
Bladder has 67 points across 4 branches -- the largest meridian in the body.

Q15 **B** **Per Dr. Zhang's PCOS/PMOS protocol, what was the reported change in HOMA-IR (insulin resistance)?**
HOMA-IR improved from 5.26 to 2.89 ($p<0.05$) after the acupuncture protocol.

Q16 **B** **In the JAMA 2017 urinary incontinence RCT, which points were used for electroacupuncture?**
Bilateral Zhongliao (BL33) and Huiyang (BL35), lumbosacral electroacupuncture, per Liu Z et al., JAMA 2017.
