FINAL

1–9

PRACTICE FINAL EXAM -- SET 2

Channel Theory through Cutaneous Regions -- Cumulative

20 questions · MC / True-False / EXCEPT format · Weeks 1-9 · Modeled on Dr. Zhang's Final

FORMAT
Multiple choice
True/False + EXCEPT

COVERAGE
All 9 weeks
Cumulative, per Dr. Zhang

ANSWER KEY
Full explanations
for all 20 questions

How to use this

Close the book. No notes, no app - simulate real final-exam conditions.
Take all 20 in one sitting. Dr. Zhang's real final is 30 questions, cumulative, closed book.
Score yourself, then re-drill ONLY the categories you missed using the Final Study Guide + Cram Sheet.
Dr. Zhang has confirmed the real final reuses questions from EVERY quiz you've taken (Quiz 1-6) -- re-open each week's Quiz Kit as part of your review, not just this practice set.

Q1. Hand Yin and Hand Yang channels hand off Qi to each other at the:

A. Face
B. Fingers
C. Toes
D. Chest

Q2. Which meridian receives Qi directly after the Spleen (9-11 AM) in the 24-hour clock, and what does this hand-off complete?

A. Heart (11 AM-1 PM); completes the Outer Circuit and opens the Inner Circuit
B. Small Intestine (1-3 PM); completes the Middle Circuit
C. Stomach (7-9 AM); reopens the Outer Circuit
D. Bladder (3-5 PM); completes the Inner Circuit

Q3. How many acupoints does the Lung channel have, compared to its paired Large Intestine channel?

A. LU 11 vs. LI 20
B. LU 9 vs. LI 20
C. LU 11 vs. LI 14
D. LU 20 vs. LI 11

Q4. [EXCEPT] All of the following statements about LU and LI are true EXCEPT:

A. Both belong to the Metal element
B. LU flows from chest to hand
C. LI flows from hand to head
D. LI has fewer total acupoints than LU

Q5. Which is the Front-Mu point of Stomach, and which is the Front-Mu point of Large Intestine -- a commonly confused pair?

A. CV12 = Stomach; ST25 = Large Intestine
B. ST25 = Stomach; CV12 = Large Intestine
C. CV12 = Stomach; CV4 = Large Intestine
D. ST36 = Stomach; ST25 = Large Intestine

Q6. [T/F] True or False: SP4 (Gongsun) is SP's Luo-Connecting point and also the Confluent point opening the Chong Mai, classically paired with PC6.

A. True
B. False

Q7. What is the ONLY channel that spreads over the LOWER surface of the tongue?

A. Kidney
B. Spleen
C. Heart
D. Liver

Q8. How many acupoints does the Heart channel have -- and what is notable about this number?

A. 9 -- the fewest of any primary channel
B. 19 -- tied with Small Intestine
C. 11 -- same as Lung
D. 20 -- the most of any Yin channel

Q9. [EXCEPT] All of the following are true of the Posterior/Inner Circuit EXCEPT:

A. It includes HT, SI, BL, and KI
B. HT and SI belong to the Fire element within this circuit
C. Peak Qi times for HT/SI/BL/KI run consecutively from 11 AM through 7 PM
D. PC and SJ are also part of this circuit

Q10. The Bladder channel's Back-Shu series (BL13-BL28) serves what overall function?

A. Treats only bladder and kidney disorders
B. Provides organ transport points for ALL 12 zang-fu organs, reached from the back
C. Only treats spinal pain
D. Opens the Du Mai

Q11. KI3 (Taixi) and KI7 (Fuliu) sit close together near the medial malleolus/Achilles tendon. What distinguishes them?

A. KI3 is Jing-River; KI7 is Shu-Stream + Yuan-Source
B. KI3 is Shu-Stream + Yuan-Source (dual role); KI7 is Jing-River only, 2 cun proximal
C. They are functionally identical
D. KI3 is the Confluent point; KI7 is the Xi-Cleft

Q12. [T/F] True or False: The Bladder channel is the largest meridian in the body, with 67 points across 5 branches.

A. True
B. False

Q13. Which point pairing opens the Yang Wei Mai, and to which channels do the two points belong?

A. SJ5 Waiguan (SJ) + GB41 Zulinqi (GB)
B. PC6 Neiguan (PC) + SP4 Gongsun (SP)
C. LU7 Lieque (LU) + KI6 Zhaohai (KI)
D. SI3 Houxi (SI) + BL62 Shenmai (BL)

Q14. What is unique about the Liver channel's crossing points, compared to most other primary channels?

A. It has none
B. Its 6 crossing points are shared with CV (2) and SP (1) around the genital/abdomen region
C. It has the most of any channel, 12 total
D. They are all located on the head

Q15. Which vessel is structurally unique for running HORIZONTALLY rather than along the body's long axis?

A. Chong Mai
B. Dai Mai (Girdle/Belt Vessel)
C. Yang Wei Mai
D. Du Mai

Q16. The Chong Mai is classically described as the "Sea of" what?

A. The Yang Meridians
B. The Yin Meridians
C. The 12 Meridians / Sea of Blood
D. The Zang Organs only

Q17. [T/F] True or False: GV (Governor Vessel) is the Sea of the Yin Meridians, and CV (Conception Vessel) is the Sea of the Yang Meridians.

A. True
B. False

Q18. Per the Five Shu (Transport) Point system, where are Jing-Well points located and what is their primary clinical application?

A. Near the elbow/knee; disorders of the six Fu organs
B. Tips of fingers and toes; first aid, clearing heat, resuscitation
C. Forearms/lower legs; externally-contracted disease
D. Before the MCP/MTP joints; feverish disease

Q19. On a YIN meridian, which Five Shu point doubles as the Yuan-Source point?

A. Jing-Well
B. Ying-Spring
C. Shu-Stream
D. He-Sea

Q20. Per Dr. Zhang's own statement, how many questions are on the comprehensive final exam, and what is their source?

A. 30 questions; entirely new material not covered before
B. 30 questions; drawn from material "concerns from each quiz, not new question"
C. 50 questions; new plus quiz material mixed evenly
D. 20 questions; only from the Week 9 review slides

SCORING GUIDE

18-20 correct	Exam ready. Do a final pass on the Five Shu master table and Exam Traps page.
15-17 correct	Solid. Re-drill the specific weeks you missed (see the Answer Key's week labels).
11-14 correct	Re-read the Final Cram Sheet and Study Guide before the exam.
Below 11	Full re-study needed - work back through each week's Study Guide in order.

Note: Dr. Zhang confirmed the real final reuses quiz questions directly -- re-drill every weekly Quiz Kit (1-6) once more, not just this practice set.

ANSWER KEY — FULL EXPLANATIONS

Score yourself first, then read explanations only for questions you missed or guessed on.

FOUNDATIONS & THE THREE CIRCUITS (Week 1)

Q1 B **Hand Yin and Hand Yang channels hand off Qi to each other at the:**
Hand Yin ends and Hand Yang begins at the fingers (e.g. LU7's branch meets LI1 at the index finger). Hand Yang meets Foot Yang at the face; Foot Yang meets Foot Yin at the toes; Foot Yin meets Hand Yin internally at the chest.

Q2 A **Which meridian receives Qi directly after the Spleen (9-11 AM) in the 24-hour clock, and what does this hand-off complete?**
SP's internal branch passes through the diaphragm into the Heart at 11 AM, ending the Outer/Anterior Circuit (LU-LI-ST-SP) and beginning the Inner/Posterior Circuit (HT-SI-BL-KI).

LU / LI -- METAL (Week 2)

Q3 A **How many acupoints does the Lung channel have, compared to its paired Large Intestine channel?**
LU has 11 points (LU1-LU11), LI has 20 (LI1-LI20) -- nearly double, consistent with the pattern that Yang/Fu partners usually have more points than their Yin/Zang pair.

Q4 D **All of the following statements about LU and LI are true EXCEPT:**
Reversed -- LI actually has MORE points than LU (20 vs. 11).

ST / SP -- EARTH (Week 3)

Q5 A **Which is the Front-Mu point of Stomach, and which is the Front-Mu point of Large Intestine -- a commonly confused pair?**
CV12 Zhongwan is the Front-Mu of STOMACH. ST25 Tianshu is the Front-Mu of LARGE INTESTINE, even though ST25 sits on the Stomach channel -- classic exam trap.

Q6 A **True or False: SP4 (Gongsun) is SP's Luo-Connecting point and also the Confluent point opening the Chong Mai, classically paired with PC6.**
Correct -- SP4 carries both roles, pairing with PC6 (Neiguan) to treat chest, heart, and stomach disorders together.

Q7 B **What is the ONLY channel that spreads over the LOWER surface of the tongue?**
Spleen. (Kidney terminates at the ROOT of the tongue -- a related but distinct fact often confused with this one.)

HT / SI -- FIRE (Week 4)

Q8 A **How many acupoints does the Heart channel have -- and what is notable about this number?**
HT has only 9 points (HT1-HT9), the fewest of any primary channel. Its paired SI channel has 19, more than double.

Q9 D **All of the following are true of the Posterior/Inner Circuit EXCEPT:**
PC and SJ form their own Ministerial Fire pairing within the MIDDLE Circuit, distinct from the Posterior/Inner Circuit of HT-SI-BL-KI.

BL / KI -- WATER (Week 5)

Q10 B **The Bladder channel's Back-Shu series (BL13-BL28) serves what overall function?**
BL13-BL28 are the Back-Shu (transport) points for every zang-fu organ (e.g. BL13 Lung, BL15 Heart, BL18 Liver, BL20 Spleen, BL21 Stomach, BL23 Kidney, BL25 LI, BL27 SI, BL28 itself).

Q11 B **KI3 (Taixi) and KI7 (Fuliu) sit close together near the medial malleolus/Achilles tendon. What distinguishes them?**
KI3 Taixi sits in the depression between the malleolus tip and Achilles tendon and carries the dual Shu-Stream/Yuan-Source role. KI7 Fuliu is 2 cun proximal, Jing-River only.

Q12 A **True or False: The Bladder channel is the largest meridian in the body, with 67 points across 5 branches.**
Correct -- BL is the largest primary channel: 67 points, 5 branches, more than any other meridian.

PC / SJ / GB / LR -- MIDDLE CIRCUIT (Week 6)

Q13 A **Which point pairing opens the Yang Wei Mai, and to which channels do the two points belong?**
SJ5 Waiguan is the confluent point opening the Yang Wei Mai, paired with GB41 Zulinqi (which opens the Dai Mai) -- both channels belong to the Middle Circuit.

Q14 B **What is unique about the Liver channel's crossing points, compared to most other primary channels?**
LR has 6 crossing points, concentrated with CV and SP around the genital/abdominal region -- consistent with LR's role in reproductive and lower-abdomen pathology.

EIGHT EXTRAORDINARY VESSELS (Week 7)

Q15 B **Which vessel is structurally unique for running HORIZONTALLY rather than along the body's long axis?**
The Dai Mai is the only Extraordinary Vessel that encircles the waist horizontally, like a belt -- binding/controlling all the longitudinally-running meridians.

Q16 C **The Chong Mai is classically described as the "Sea of" what?**
Chong Mai = Sea of the 12 Meridians and Sea of Blood -- it runs parallel to the Kidney meridian and regulates menstruation and Qi-Blood distribution to all 12 primary channels.

Q17 B **True or False: GV (Governor Vessel) is the Sea of the Yin Meridians, and CV (Conception Vessel) is the Sea of the Yang Meridians.**
Reversed -- GV is the Sea of the YANG Meridians; CV is the Sea of the YIN Meridians.

FIVE SHU POINTS & CONFLUENT POINTS (Week 9)

Q18 B **Per the Five Shu (Transport) Point system, where are Jing-Well points located and what is their primary clinical application?**
Jing-Well points sit at the very tips of the fingers/toes -- classically used for first aid, resuscitation, and clearing heat/consciousness disorders.

Q19 C **On a YIN meridian, which Five Shu point doubles as the Yuan-Source point?**
On Yin channels, the Shu-Stream point IS the Yuan-Source point (e.g. LU9 Taiyuan, HT7 Shenmen, SP3 Taibai, KI3 Taixi, PC7 Daling, LR3 Taichong).

CUMULATIVE / CROSS-WEEK (Weeks 1-9)

Q20 B **Per Dr. Zhang's own statement, how many questions are on the comprehensive final exam, and what is their source?**
Dr. Zhang confirmed 30 questions verbally, and separately stated the final "mentions all the questions, including in the final examination, concerns from each quiz, not new question" -- review every quiz you've taken, not just lecture notes.
