

MIDTERM

1-4

PRACTICE MIDTERM

Channel Theory + LU · LI · ST · SP · HT · SI

28 questions · MC / True-False / EXCEPT format · Weeks 1-4 · Quiz Ready

FORMAT

Multiple choice
True/False + EXCEPT

COVERAGE

Theory + 6 channels
125 points cumulative

ANSWER KEY

Full explanations
for all 28 questions

How to use this

Close the book. No notes, no app - simulate real exam conditions.
Take all 28 in one sitting (Dr. Zhang's format: ~20-30 questions, timed).
Score yourself, then re-drill ONLY the categories you missed.
Several questions below are adapted directly from verified Quiz 1-3 material —
Dr. Zhang has said the midterm reuses a number of quiz questions.

CHANNEL THEORY & CIRCADIAN CLOCK

Week 1

Q1. [EXCEPT] The three-part naming convention for a primary meridian includes all of the following EXCEPT:

- A. Hand/Foot (location)
- B. Yin/Yang (medial/lateral surface, nature)
- C. Zang/Fu (pertaining organ)
- D. Element (Five-Phase assignment)

Q2. [T/F] True or False: Foot Yang meridians circulate Qi from the head down to the foot.

- A. True
- B. False

Q3. Hand Yin and Hand Yang channels hand off Qi to each other at the:

- A. Face
- B. Fingers
- C. Toes
- D. Chest

Q4. How many total primary (regular) meridians are there in the body?

- A. 10
- B. 12
- C. 14
- D. 15

Q5. Which of the following is the correct Zang-Fu (interior-exterior) pairing?

- A. LU - ST
- B. LU - LI
- C. LU - SP
- D. LU - HT

LUNG & LARGE INTESTINE

Week 2

Q6. The Lung channel's full classification is:

- A. Hand Taiyin
- B. Hand Yangming
- C. Foot Taiyin
- D. Foot Yangming

Q7. How many acupoints does the Lung channel have?

- A. 9
- B. 11
- C. 20
- D. 21

Q8. LU7 (Lieque) is significant for holding which combination of special categories?

- A. He-Sea + Xi-Cleft
- B. Luo-Connecting + Confluent (opens Ren Mai) + Command Point (head/neck)
- C. Jing-Well + Yuan-Source
- D. Shu-Stream + Back-Shu

Q9. LI4 (Hegu) is best described as:

- A. The He-Sea point of LI, safe throughout pregnancy
- B. The Yuan-Source point of LI, FORBIDDEN in pregnancy
- C. The Jing-Well point of LI, used only for fever
- D. The Xi-Cleft point of LI, used only for acute pain

Q10. [T/F] True or False: The Large Intestine channel begins at the tip of the index finger.

- A. True
- B. False

Q11. [EXCEPT] All of the following statements about LU and LI are true EXCEPT:

- A. Both belong to the Metal element
- B. LU flows from chest to hand
- C. LI flows from hand to head
- D. LI has fewer total acupoints than LU

STOMACH & SPLEEN

Week 3

Q12. What is the direction of Qi flow in all three foot-YANG meridians, including Stomach?

- A. Foot to chest
- B. Chest to hand
- C. Hand to head
- D. Head to foot

Q13. ST and SP both belong to which Five-Phase element?

- A. Water
- B. Fire
- C. Earth
- D. Metal

Q14. ST36 (Zusanli) is significant for holding which special-point categories?

- A. Yuan-Source + Xi-Cleft
- B. He-Sea + Command Point (abdomen)
- C. Luo-Connecting + Confluent
- D. Jing-Well + Luo-Connecting

Q15. SP6 (Sanyinjiao) is significant because it is:

- A. The Front-Mu of Spleen, safe in pregnancy
- B. The crossing point of the 3 leg-Yin channels (SP/LR/KI), FORBIDDEN in pregnancy
- C. The He-Sea point of SP, used only for edema
- D. The Yuan-Source of SP, used only for digestion

Q16. [T/F] True or False: SP4 (Gongsun) opens the Chong Mai and is paired with PC6 in the confluent point system.

- A. True
- B. False

Q17. [EXCEPT] All of the following are true of the Stomach channel EXCEPT:

- A. It has 45 acupoints
- B. Its peak Qi time is 7-9 AM
- C. It has 11 crossing points, the most of any primary channel
- D. It begins at ST1 (Chengqi)

HEART & SMALL INTESTINE

Week 4

Q18. The Heart channel's full classification is:

- A. Hand Shaoyin
- B. Hand Taiyang
- C. Foot Shaoyin
- D. Foot Taiyang

Q19. How many acupoints does the Heart channel have?

- A. 9
- B. 11
- C. 19
- D. 20

Q20. HT7 (Shenmen) is significant for holding which special categories?

- A. He-Sea + Luo-Connecting
- B. Shu-Stream + Yuan-Source
- C. Jing-Well + Xi-Cleft
- D. Front-Mu + Back-Shu

Q21. SI3 (Houxi) is best described as:

- A. The Yuan-Source point of SI, opening the Ren Mai
- B. The Shu-Stream point of SI, also a Confluent point opening the Du Mai
- C. The He-Sea point of SI, opening the Chong Mai
- D. The Jing-Well point of SI, opening the Yin Wei Mai

Q22. [T/F] True or False: The Small Intestine channel has more total acupoints than the Heart channel.

- A. True
- B. False

Q23. [EXCEPT] All of the following statements about the Posterior Circuit (also called Inner Circuit) are true EXCEPT:

- A. It includes HT, SI, BL, and KI
- B. HT and SI belong to the Fire element within this circuit
- C. Peak Qi times for HT/SI/BL/KI run consecutively from 11 AM through 7 PM
- D. PC and SJ are also part of this circuit

CUMULATIVE / CROSS-CHANNEL

Weeks 1-4

Q24. Which Back-Shu point on the Bladder channel corresponds to the Spleen?

- A. BL18
- B. BL20
- C. BL21
- D. BL25

Q25. Which point below is FORBIDDEN in pregnancy?

- A. LI4 (Hegu)
- B. ST36 (Zusanli)
- C. HT7 (Shenmen)
- D. SI3 (Houxi)

Q26. [T/F] True or False: The Anterior Circuit runs LU -> LI -> ST -> SP, in that order.

- A. True
- B. False

Q27. Following the 24-hour circadian Qi cycle, which channel receives Qi directly after the Spleen (9-11 AM)?

- A. Heart (11 AM-1 PM)
- B. Small Intestine (1-3 PM)
- C. Stomach (7-9 AM)
- D. Large Intestine (5-7 AM)

Q28. [EXCEPT] All of the following are Yuan-Source points EXCEPT:

- A. LU9 (Taiyuan)
- B. LI4 (Hegu)
- C. SP3 (Taibai)
- D. ST36 (Zusanli)

SCORING GUIDE

25-28 correct

Exam ready. Do a final pass on the Special Points Decoder for each channel.

21-24 correct

Solid. Re-drill the specific sections you missed (see section headers above).

16-20 correct

Re-read the Cumulative Cram Sheet and Study Guide before the midterm.

Below 16

Full re-study needed - work back through each week's Study Guide in order.

Note: several ST/SP questions above are adapted from your verified Week 3 Quiz Kit, since Dr. Zhang confirmed the midterm reuses a number of quiz questions - review that kit's Set A/B once more too.

ANSWER KEY – FULL EXPLANATIONS

Score yourself first, then read explanations only for questions you missed or guessed on.

CHANNEL THEORY & CIRCADIAN CLOCK (Week 1)

- Q1 D The three-part naming convention for a primary meridian includes all of the following EXCEPT:**
The naming convention has exactly 3 parts: Hand/Foot + Yin/Yang + Zang/Fu (e.g. "Hand Taiyin Lung"). Element (Metal, Earth, Fire...) is a separate Five-Phase classification, not part of the channel's formal name.
- Q2 A True or False: Foot Yang meridians circulate Qi from the head down to the foot.**
Correct direction rule: Hand Yin chest->hand, Hand Yang hand->head, Foot Yang head->foot, Foot Yin foot->chest/abdomen.
- Q3 B Hand Yin and Hand Yang channels hand off Qi to each other at the:**
Hand Yin ends and Hand Yang begins at the fingers (e.g. LU7's branch meets LI1 at the index finger). Hand Yang meets Foot Yang at the face; Foot Yang meets Foot Yin at the toes; Foot Yin meets Hand Yin at the chest.
- Q4 B How many total primary (regular) meridians are there in the body?**
3 Hand Yin + 3 Hand Yang + 3 Foot Yin + 3 Foot Yang = 12 Primary Meridians. (The 8 Extraordinary Vessels and 15 Luo-Connecting channels are separate categories, covered later in the course.)
- Q5 B Which of the following is the correct Zang-Fu (interior-exterior) pairing?**
LU (Yin/Zang) pairs with LI (Yang/Fu) - both Metal element, both Hand channels. Interior-exterior pairs always share the same element and the same Hand/Foot classification.

LUNG & LARGE INTESTINE (Week 2)

- Q6 A The Lung channel's full classification is:**
LU = Hand Taiyin, Metal, Yin, peak 3-5 AM. Its paired channel LI = Hand Yangming, Metal, Yang, peak 5-7 AM.
- Q7 B How many acupoints does the Lung channel have?**
LU has 11 points, LU1 (Zhongfu) to LU11 (Shaoshang). Its paired LI channel has 20 - nearly double.
- Q8 B LU7 (Lieque) is significant for holding which combination of special categories?**
LU7 is unusually loaded: Luo-Connecting point of LU, a Confluent point opening the Ren Mai, and a Command Point for the head/neck region.
- Q9 B LI4 (Hegu) is best described as:**
LI4 Hegu is LI's Yuan-Source point and a Command Point for the face/mouth. Its strong descending, Qi/Blood-moving action makes it FORBIDDEN in pregnancy - one of only two pregnancy-forbidden points in the Weeks 1-4 scope (the other is SP6).
- Q10 A True or False: The Large Intestine channel begins at the tip of the index finger.**
LI1 (Shangyang) begins at the radial side of the tip of the index finger, at the nail corner - the same finger where the LU channel's branch terminates.
- Q11 D All of the following statements about LU and LI are true EXCEPT:**
This is reversed - LI actually has MORE points than LU (20 vs. 11), even though LI is the Yang/Fu partner. Point count doesn't track Yin/Yang status consistently across pairs.

STOMACH & SPLEEN (Week 3)

- Q12 D What is the direction of Qi flow in all three foot-YANG meridians, including Stomach?**
Foot Yang meridians all flow downward, head to foot. ST is a foot-Yang channel, so it follows this rule.
- Q13 C ST and SP both belong to which Five-Phase element?**
ST and SP form the Earth-element interior-exterior pair, active mid-morning (ST 7-9 AM, SP 9-11 AM).
- Q14 B ST36 (Zusanli) is significant for holding which special-point categories?**
ST36 is the He-Sea point of ST and a Command Point for the abdomen. Dr. Zhang cited Nature-published studies showing ST36 can relieve inflammation and tonify Qi/Blood almost immediately - the #1 tonic point in TCM.
- Q15 B SP6 (Sanyinjiao) is significant because it is:**
SP6 unites SP, LR, and KI - the three leg-Yin channels. Its strong descending/moving action on Blood makes it FORBIDDEN in pregnancy, alongside LI4.

Q16 A True or False: SP4 (Gongsun) opens the Chong Mai and is paired with PC6 in the confluent point system.

SP4 is SP's Luo-Connecting point and also a Confluent point opening the Chong Mai. It classically pairs with PC6 (Neiguan) - together treating chest, heart, and stomach disorders.

Q17 D All of the following are true of the Stomach channel EXCEPT:

The ST pathway actually originates at LI20 (Yingxiang), a crossing point of the LI channel on the face - ST1 is simply the first numbered point along that pathway, not the true starting point.

HEART & SMALL INTESTINE (Week 4)

Q18 A The Heart channel's full classification is:

HT = Hand Shaoyin, Fire, Yin, peak 11 AM-1 PM. Its paired channel SI = Hand Taiyang, Fire, Yang, peak 1-3 PM. Together HT/SI form the Fire pair opening the Posterior Circuit (also called Inner Circuit).

Q19 A How many acupoints does the Heart channel have?

HT has only 9 points (HT1 Jiquan to HT9 Shaochong) - the fewest of any primary channel. Its paired SI channel has 19, more than double.

Q20 B HT7 (Shenmen) is significant for holding which special categories?

HT7 is both the Shu-Stream and Yuan-Source point of HT - on Yin channels these two categories always coincide at the same point. HT7 calms the Shen and is a primary point for anxiety and insomnia.

Q21 B SI3 (Houxi) is best described as:

SI3 is SI's Shu-Stream point and doubles as a Confluent point opening the Du Mai - useful for spine, neck, and febrile conditions.

Q22 A True or False: The Small Intestine channel has more total acupoints than the Heart channel.

SI has 19 points vs. HT's 9 - SI has more than double the points of its paired Yin channel, the same pattern seen with LU (11) / LI (20).

Q23 D All of the following statements about the Posterior Circuit (also called Inner Circuit) are true EXCEPT:

PC (Pericardium) and SJ (San Jiao) form their own Ministerial Fire pairing and circuit, distinct from the Posterior/Inner Circuit of HT-SI-BL-KI. HT/SI are primary Fire; PC/SJ are Ministerial Fire - different circuits.

CUMULATIVE / CROSS-CHANNEL (Weeks 1-4)

Q24 B Which Back-Shu point on the Bladder channel corresponds to the Spleen?

BL20 (Pishu) = Back-Shu of Spleen. Don't confuse it with BL21 (Weishu) = Back-Shu of Stomach - these sit right next to each other on the back and are commonly mixed up on exams.

Q25 A Which point below is FORBIDDEN in pregnancy?

Within the Weeks 1-4 scope, only two points carry a pregnancy-forbidden flag: LI4 (Hegu) and SP6 (Sanyinjiao). Both have strong Qi/Blood-moving, descending actions.

Q26 A True or False: The Anterior Circuit runs LU -> LI -> ST -> SP, in that order.

Correct Anterior Circuit sequence: chest to hand (LU), hand to head (LI), head to foot (ST), foot to chest (SP) - each channel handing Qi to the next.

Q27 A Following the 24-hour circadian Qi cycle, which channel receives Qi directly after the Spleen (9-11 AM)?

SP's internal branch travels through the diaphragm into the Heart, handing Qi off to HT at 11 AM - the start of the Posterior/Inner Circuit.

Q28 D All of the following are Yuan-Source points EXCEPT:

ST36 is the He-Sea point and a Command Point for the abdomen - NOT the Yuan-Source of Stomach. ST's actual Yuan-Source point is ST42 (Chongyang). Don't let ST36's fame as the '#1 tonic point' cause you to misassign it as Yuan-Source.
