

WEEK 4

CRAM SHEET

Heart & Small Intestine Channels

HT (9 pts) + SI (19 pts) = 28 Points

Quiz 4 Ready | HT & SI Channels

Special Points

HT7, SI3, SI4
and all categories

Five-Shu Tables

Both HT and SI
Well to Sea sequences

Crossing Points

HT 0, SI 2
zero vs. facial branch

+ Dr. Zhang's Clinical Pearls + HT & SI Crossing Points + Posterior Circuit Begins

AC300/AC375 | Acupuncture Channels & Points I | VUIM Summer 2026

Dr. Vivian Zhang, Ph.D. | Jon Centeno | D.AcHM Candidate | VUIM

HEART - Hand Shaoyin

9 points | Yin | Fire | 11 AM-1 PM | Chest to Hand

Channel ID Card

Full name	Heart Meridian of Hand-Shaoyin
Points / Clock	9 pts 11 AM-1 PM
Element / Polarity	Fire Yin
Direction	Chest -> Hand (interior/medial)
Pertains / Connects	Heart / Small Intestine
Back-Shu / Front-Mu	BL15 Xinshu / CV14 Jueque
Yuan-Source	HT7 Shenmen
Luo-Connecting	HT5 Tongli
Xi-Cleft	HT6 Yinxi
He-Sea	HT3 Shaohai
Crossing points	0 - the ONLY channel with none
First / Last	HT1 Jiquan / HT9 Shaochong

Pathway in 8 Beats

1. Originates in the Heart, emerges from the system of blood vessels surrounding the Heart
2. Descends through the diaphragm to connect with the SMALL INTESTINE (interior-exterior pairing)
3. A branch ascends alongside the oesophagus, crosses the face and cheek, connects with the tissues surrounding the eye (the 'eye system')
4. The main external pathway emerges from the axilla at HT1 Jiquan
5. Descends along the postero-medial aspect of the arm (posterior to LU and PC channels) to the elbow at HT3 Shaohai
6. Continues along the medial/ulnar aspect of the forearm to the wrist at HT7 Shenmen (pisiform bone)
7. Travels through the palm along the radial side of the little finger
8. Ends at HT9 Shaochong, radial tip of the little finger nail - hands off to SMALL INTESTINE

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Wood	HT9 Shaochong
Ying-Spring	Fire	HT8 Shaofu
Shu-Stream	Earth	HT7 Shenmen
Jing-River	Metal	HT4 Lingdao
He-Sea	Water	HT3 Shaohai

HT has ZERO Crossing Points

This is a genuinely unique, exam-critical fact: HT is the only one of the 12 primary channels with no crossing (jiaohui) points anywhere on its external pathway.

Because of this, every HT symptom traces directly back to the Heart itself or its own pathway - there is no 'borrowed' symptom picture from another channel to confuse it with.

Highest-Yield Points

Pt	Category	Use
HT7	Shu-Stream + Yuan-Source	Calms Shen; #1 point for anxiety, insomnia, palpitations
HT3	He-Sea	Clears heart fire; fear, arm pain along the channel
HT6	Xi-Cleft	Night sweats, acute heart pain
HT9	Jing-Well	Emergency point: severe heart pain, palpitations, revives consciousness
HT5	Luo-Connecting	Links to SI; treats disorders of both channels
HT1	First point	Landmark for axilla; rarely needled directly in modern practice

SMALL INTESTINE - Hand Taiyang

19 points | Yang | Fire | 1-3 PM | Hand to Head

Channel ID Card

Full name	Small Intestine Meridian of Hand-Taiyang
Points / Clock	19 pts 1-3 PM
Element / Polarity	Fire Yang
Direction	Hand -> Head (posterolateral)
Pertains / Connects	Small Intestine / Heart
Back-Shu / Front-Mu	BL27 Xiaochangshu / CV4 Guanyuan
Yuan-Source	SI4 Wangu
Luo-Connecting	SI7 Zhizheng
Xi-Cleft	SI6 Yanglao
He-Sea	SI8 Xiaohai
Confluent	SI3 - opens Du Mai (w/ BL62)
Crossing points	2 - BL1, GB14 (facial branch)
First / Last	SI1 Shaoze / SI19 Tinggong

Pathway in 8 Beats

1. Begins at SI1 Shaoze, ulnar side of the little finger tip - where HT's branch terminates
2. Runs along the ulnar/dorsal aspect of the hand and forearm, through SI3 Houxi and SI5 Yanggu
3. Crosses the elbow at SI8 Xiaohai (He-Sea), ascends the posterior aspect of the upper arm
4. Circles the shoulder joint (SI9-SI10), zigzags across the scapula (SI11-SI13)
5. Crosses GV14 Dazhui at the top of the shoulder, enters the supraclavicular fossa
6. Descends internally to the HEART, through the diaphragm, reaches the Stomach, PERTAINS Small Intestine
7. BRANCH: from the neck, ascends the cheek to the outer canthus, enters the ear at SI19 Tinggong
8. SECOND BRANCH: from the cheek, ascends to the inner canthus (crosses BL1 Jingming), then to the cheekbone (crosses GB14 Yangbai)

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Metal	SI1 Shaoze
Ying-Spring	Water	SI2 Qianggu
Shu-Stream	Wood	SI3 Houxi
Jing-River	Fire	SI5 Yanggu
He-Sea	Earth	SI8 Xiaohai

The 2 Crossing Points

Pt	Pinyin	Why it matters
BL1	Jingming	inner canthus of eye; all eye disorders
GB14	Yangbai	forehead; frontal headache, eyebrow pain

Highest-Yield Points

Pt	Category	Use
SI3	Shu-Stream + Confluent	Opens Du Mai (pairs with BL62); spine, neck, febrile disease
SI4	Yuan-Source	Wrist/finger pain, febrile disease
SI8	He-Sea	Elbow/arm disorders, mental-emotional Fire patterns
SI19	Last point	Tinnitus, deafness, ear disorders
SI1	Jing-Well	Excess breast milk / lactation problems - specifically noted by Dr. Zhang
SI16	Window of Heaven	Throat/voice disorders; needle with care (carotid region)

Rapid Recall - HT & SI

Read this one last, on the way in

The "ONLY" List - guaranteed points

Fact	Answer
ONLY channel with ZERO crossing points	HT
Fewest points of any primary channel (9)	HT
ONLY Confluent point this week (opens Du Mai)	SI3
SI's Lower He-Sea sits on a DIFFERENT channel	ST39
Emergency point: revives consciousness, severe heart pain	HT9
Point specifically noted for lactation problems	SI1

Limb Distribution Rule

Position	Yin	Yang
Anterior	Taiyin (yin)	Yangming (yang)
Middle	Jueyin (yin)	Shaoyang (yang)
Posterior	Shaoyin (yin) <- HT/SI	Taiyang (yang) <- HT/SI

Forbidden in Pregnancy (cumulative reference)

SP6 Sanyinjiao - strong descending/moving action on the uterus

LI4 Hegu - moves Qi and Blood downward

BL60 Kunlun - promotes labor

BL67 Zhiyin - used for malposition/moxa, contraindicated by needle

Meridian Clock - full 24 hours

Ch	Peak
LU	3-5 AM
LI	5-7 AM
ST	7-9 AM
SP	9-11 AM
HT	11 AM-1 PM
SI	1-3 PM
BL	3-5 PM
KI	5-7 PM
PC	7-9 PM
SJ	9-11 PM
GB	11 PM-1 AM
LR	1-3 AM

Last 60 Seconds

HT = 9 pts, 11 AM-1 PM, Yin Fire, ZERO crossings, Back-Shu BL15, Front-Mu CV14.

SI = 19 pts, 1-3 PM, Yang Fire, 2 crossings (BL1, GB14), Back-Shu BL27, Front-Mu CV4.

HT7 Shenmen = Shu-Stream + Yuan, calms Shen. SI3 Houxi = Shu-Stream + Confluent, opens Du Mai (pairs BL62).

SI's Lower He-Sea = ST39 - not on SI itself. True for all six Fu organs.

Posterior Circuit (also called Inner Circuit) begins: HT -> SI, continues next week BL -> KI.

Commonly Confused - know both sides

Pair	The distinction
HT3 vs SI8	Both He-Sea. HT3 Shaohai (Heart, elbow) vs SI8 Xiaohai (Small Intestine, elbow) - similar names, different channels.
HT7 vs SI4	Both Yuan-Source. HT7 Shenmen (wrist, calms Shen) vs SI4 Wangu (ulnar wrist).
HT5 vs SI7	Both Luo-Connecting. HT5 Tongli vs SI7 Zhizheng - each links its own pair partner.
HT6 vs SI6	Both Xi-Cleft. HT6 Yinxi (acute heart pain) vs SI6 Yanglao (acute eye/vision issues).
HT9 vs SI1	Adjacent fingertip Jing-Wells. HT9 Shaochong = RADIAL side of little finger (HT ends). SI1 Shaoze = ULNAR side (SI begins).
SI3 vs BL62	SI3 Houxi opens the Du Mai; BL62 Shenmai is its Confluent PAIR point, not the same channel.
Window of Heaven	SI16 Tianchuang is a Window of Heaven point. HT has none - zero crossings, zero WoH points.
Circuit hand-offs	SP->HT (internal, via diaphragm). HT->SI (external, at HT9/SI1). SI->BL (external, facial branch to BL1).
