NOMENCLATURE & CORE RULES

Nomenclature (3 parts)

Hand/Foot (location) + Yin/Yang (medial/lateral, nature) + Zang/Fu (pertaining organ, function).

Qi circulation direction

Hand Yin: chest -> hand | Hand Yang: hand -> head | Foot Yang: head -> foot | Foot Yin: foot -> abdomen/chest

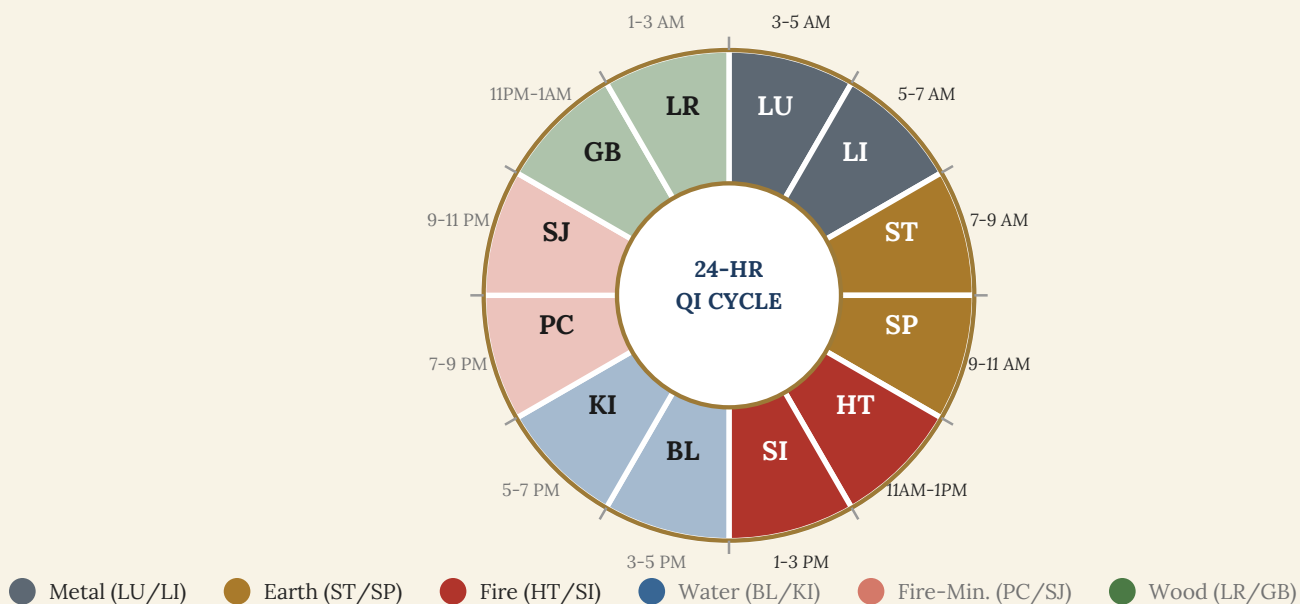

Zang-Fu pairing logic

Each Yin (zang) channel pairs with one Yang (fu) channel; paired channels treat each other's organ symptoms (e.g. LU constipation -> use LI points).

The Three Circuits

Anterior = Yangming (LI/ST), Middle = Shaoyang (SJ/GB, weeks 7-9), Posterior = Taiyang (SI/BL, week 5) -- also called the Inner Circuit on earlier slide versions.

CIRCADIAN CLOCK – 24-HOUR QI CYCLE

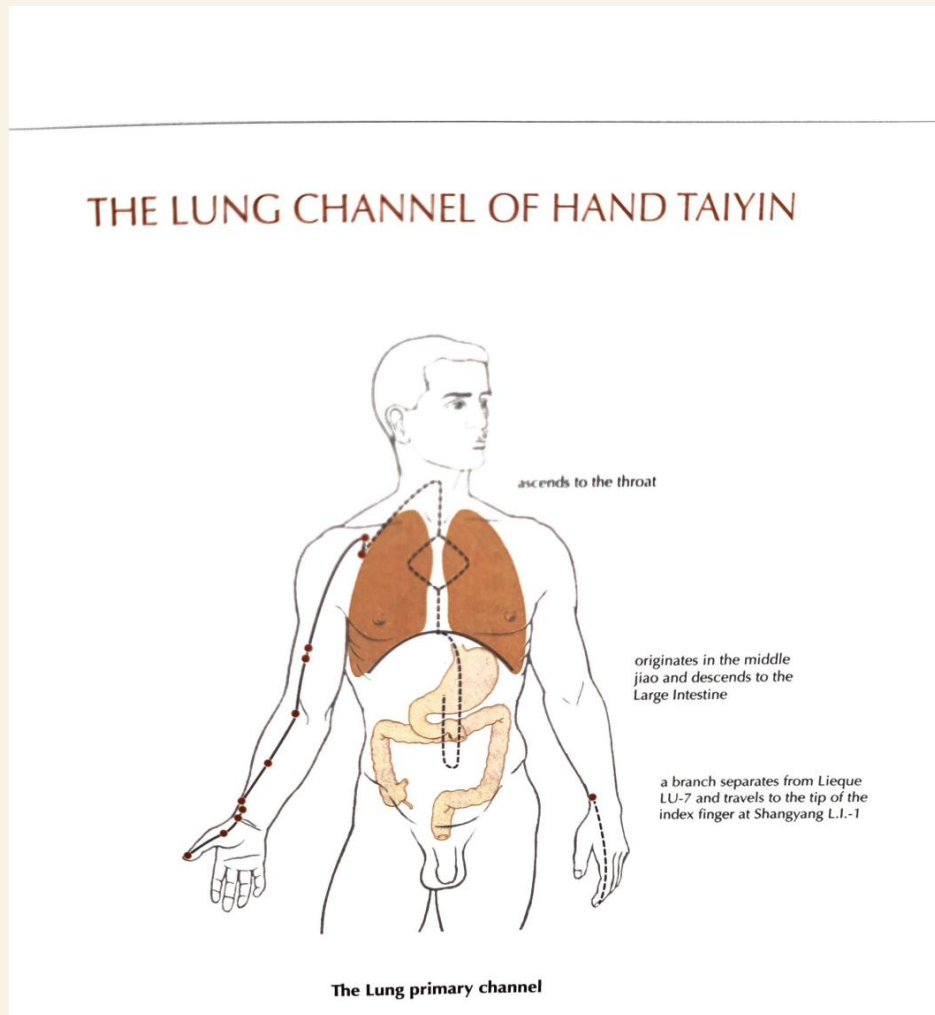

Paired organs sit in adjacent clock slots (LU/LI, ST/SP, HT/SI) — the Qi circulation chain flows straight from one into the next around the full 24-hour cycle. Muted wedges (BL/KI/PC/SJ/GB/LR) are covered in later weeks.

Clinical use: a patient waking at a specific hour night after night may point to dysfunction in that hour's organ — diagnostic, not a treatment rule.

LU – Lung

Hand Taiyin · Yin · Metal · Peak 3-5AM · Paired: LI · 11 pts

MOA (Deadman 3rd Ed.), p.76

EXTERIOR COURSE (has acupuncture points)

The exterior course carries all 11 acupuncture points. It begins at LU1, on the chest just below the clavicle, then runs down the anterior-lateral aspect of the arm, crossing the elbow at LU5, the wrist at LU9, and ending at the thumb tip at LU11.

INTERIOR BRANCH (no acupuncture points)

The interior branch has no points on it. It connects the Lung (the pertaining organ) to the Large Intestine (the connecting organ) — this is why LU and LI can treat each other's organ-level symptoms.

Pertains: Lung · Connects: Large Intestine

THE THREE INTERIOR-EXTERIOR PAIRS

Each Yin (Zang, solid organ) channel pairs with one Yang (Fu, hollow organ) channel. They share an element, sit in adjacent circadian-clock slots, and their special points cross-reference each other (paired organ's Front-Mu/Back-Shu, Luo-connecting points).

LU – LI (Metal)

Zang (Yin):	Lung (LU) · 11 pts · 3-5 AM
Fu (Yang):	Large Intestine (LI) · 20 pts · 5-7 AM
Shared function:	Both regulate descending/clearing of Qi and fluids; LU governs Qi + skin, LI governs transmission/excretion.
Cross-reference:	LU1 = Front-Mu of LU itself; ST25 = Front-Mu of LI; BL13/BL25 = Back-Shu pair on Bladder channel.

ST – SP (Earth)

Zang (Yin):	Spleen (SP) · 21 pts · 9-11 AM
Fu (Yang):	Stomach (ST) · 45 pts · 7-9 AM
Shared function:	Both govern digestion/transformation of food and fluids; ST 'rots and ripens', SP transforms and transports.
Cross-reference:	LR13 = Front-Mu of SP (not ST's own channel); CV12 = Front-Mu of ST; BL20/BL21 = Back-Shu pair.

HT – SI (Fire)

Zang (Yin):	Heart (HT) · 9 pts · 11 AM-1 PM
Fu (Yang):	Small Intestine (SI) · 19 pts · 1-3 PM
Shared function:	HT governs Shen (mind) and blood; SI 'separates the pure from the turbid' in digestion.
Cross-reference:	CV14 = Front-Mu of HT; CV4 = Front-Mu of SI; BL15/BL27 = Back-Shu pair.
