

WEEK 6

reMarkable Edition

Week 6 Quiz Kit

Pericardium, San Jiao, Gallbladder & Liver Channels

Standalone practice quiz -- pairs with the Week 6 Study Guide

This Kit Covers:

- 30-Question MCQ Quiz -- 7 PC, 8 SJ, 8 GB, 7 LR
- Covers pathway branches, crossing points, special points, and exam traps
- Includes the Middle Circuit milestone (PC+SJ+GB+LR complete all 3 circuits)
- Full Answer Key with explanations for every question

QUIZ 5 (next class) covers: PC, SJ, GB & LR channels.

Study first from the Week 6 Study Guide, then self-test here before class.

Answer key begins after the final question block -- no peeking until you've answered!

Week 6 Practice Quiz - Questions 1-9 (of 30)

Covers PC & SJ

1 What is the pertaining organ of the Pericardium meridian?

- A. Heart
- B. Pericardium
- C. San Jiao
- D. Small Intestine

2 How many crossing points does the PC channel have?

- A. 0
- B. 2
- C. 9
- D. 14

3 Direction of Qi flow in the PC meridian?

- A. Chest to hand
- B. Hand to head
- C. Head to foot
- D. Foot to chest

4 PC runs on the arm in which position relative to LU and HT?

- A. Anterior to both
- B. Posterior to both
- C. Between LU (anterior) and HT (posterior)
- D. Between HT (anterior) and LU (posterior)

5 Which PC point is BOTH Luo-Connecting and a Confluent point (opens Yin Wei Mai)?

- A. PC3
- B. PC6
- C. PC7
- D. PC8

6 PC's Yuan-Source point is:

- A. PC3 Quze
- B. PC6 Neiguan
- C. PC7 Daling
- D. PC9 Zhongchong

7 How many total points does the PC channel have?

- A. 6
- B. 9
- C. 12
- D. 19

8 What is the connecting organ of the San Jiao meridian?

- A. Gallbladder
- B. Liver
- C. Pericardium
- D. Bladder

9 SJ5 Waiguan opens which Extraordinary Vessel?

- A. Dai Mai
- B. Yang Wei Mai
- C. Yin Wei Mai
- D. Chong Mai

Week 6 Practice Quiz - Questions 10-18 (of 30)

Covers SJ & GB

10

At the shoulder, how does the SJ channel relate to the GB channel?

- A. SJ never crosses GB
- B. SJ crosses GB once, in front only
- C. They cross TWICE -- GB in front, then SJ crosses back behind
- D. SJ and GB run parallel, never touching

11

San Jiao's active hours are:

- A. 7-9 PM
- B. 9-11 PM
- C. 11 PM-1 AM
- D. 1-3 AM

12

How many points does the SJ channel have?

- A. 9
- B. 14
- C. 23
- D. 44

13

SJ's Front-Mu point is:

- A. CV5 Shimen
- B. CV17 Danzhong
- C. GB24 Riyue
- D. BL22 Sanjiaoshu

14

SJ17 Yifeng is a crossing point most associated with treating:

- A. Vertex headache
- B. Tinnitus, deafness, facial paralysis
- C. Forbidden in pregnancy
- D. Nausea and vomiting

15

SJ's Lower He-Sea point (used for Fu-organ disorders, located on the leg) is:

- A. SJ10 Tianjing
- B. GB34 Yanglingquan
- C. BL39 Weiyang
- D. ST36 Zusanli

16

How many points does the GB channel have, and where does that rank it?

- A. 23 -- 4th largest
- B. 44 -- 3rd largest after BL and ST
- C. 67 -- largest of all
- D. 14 -- smallest Yang channel

17

GB's course on the head is uniquely described as:

- A. A straight line
- B. A zigzag / 'Z-shape'
- C. A circle around the ear only
- D. It doesn't reach the head

18

Which GB point is FORBIDDEN in pregnancy?

- A. GB20
- B. GB21
- C. GB34
- D. GB40

Week 6 Practice Quiz - Questions 19-27 (of 30)

Covers GB

- 19** GB34 Yanglingquan holds which dual special-point designation?
- A. Yuan-Source + Luo-Connecting
 - B. He-Sea + Hui-Meeting of Sinews/Tendons
 - C. Xi-Cleft + Confluent
 - D. Jing-Well + Back-Shu
- 20** GB41 Zulinqi is the confluent point opening which Extraordinary Vessel?
- A. Yang Wei Mai
 - B. Yin Qiao Mai
 - C. Dai Mai (Girdle Vessel)
 - D. Ren Mai
- 21** Alternating fever/chills with a bitter taste in the mouth is the classic syndrome pattern for which channel?
- A. PC
 - B. SJ
 - C. GB (Shaoyang syndrome)
 - D. LR
- 22** The GB channel crossing-point count on the slide is:
- A. Fully resolved at 9 points
 - B. Listed as 12, but only 9 are actually named -- unresolved
 - C. 0 -- GB has no crossing points
 - D. 44, matching its total point count
- 23** GB's Back-Shu and Front-Mu points are:
- A. BL19 Danshu / GB24 Riyue
 - B. BL18 Ganshu / LR14 Qimen
 - C. BL22 Sanjiaoshu / CV5 Shimen
 - D. BL14 Jueyinshu / CV17 Danzhong
- 24** Which meridian crosses IN FRONT of the Liver meridian at a point 8 cun above the medial malleolus?
- A. The Spleen meridian
 - B. The Kidney meridian
 - C. The Stomach meridian
 - D. The Gallbladder meridian
- 25** The Liver channel is the only primary channel that reaches:
- A. The ear
 - B. The vertex (GV20)
 - C. The nipple
 - D. The heel
- 26** LR3 pairs with which point to form the classic 'Four Gates' combination?
- A. LI4
 - B. ST36
 - C. SP6
 - D. HT7
- 27** LR13 Zhangmen carries which double special-point designation?
- A. Yuan-Source + Luo-Connecting
 - B. Front-Mu of Spleen + Hui-Meeting of all 5 Zang
 - C. He-Sea + Xi-Cleft
 - D. Jing-Well + Back-Shu

Week 6 Practice Quiz - Questions 28-30 (of 30)

Covers LR

28 How many points does the LR channel have?

- A. 9
- B. 14
- C. 23
- D. 44

29 LR's active hours, and what happens if a patient wakes during this window?

- A. 7-9 PM -- treat Pericardium
- B. 1-3 AM -- treat Liver function first
- C. 3-5 AM -- treat Lung function first
- D. 11 PM-1 AM -- treat Gallbladder

30 Direction of Qi flow in the Liver meridian?

- A. Chest to hand
- B. Hand to head
- C. Head to foot
- D. Foot to chest

Week 6 Quiz - Answer Key (All 30 Questions)

- 1 **B** **What is the pertaining organ of the Pericardium meridian?**
PC's pertaining organ is directly named in the channel's own title -- Pericardium.
- 2 **A** **How many crossing points does the PC channel have?**
PC has ZERO crossing points -- the exam trap identical to HT; only these two primary channels have none.
- 3 **A** **Direction of Qi flow in the PC meridian?**
PC is a Hand-Yin channel; all three Hand-Yin channels (LU, HT, PC) flow chest to hand.
- 4 **C** **PC runs on the arm in which position relative to LU and HT?**
PC runs the MIDDLE line of the arm -- between LU (anterior) and HT (posterior). Exam-testable 'in-between' position.
- 5 **B** **Which PC point is BOTH Luo-Connecting and a Confluent point (opens Yin Wei Mai)?**
PC6 Neiguan is Luo-Connecting AND opens the Yin Wei Mai (paired with SP4).
- 6 **C** **PC's Yuan-Source point is:**
PC7 Daling is both Shu-Stream and Yuan-Source, at the midpoint of the wrist crease.
- 7 **B** **How many total points does the PC channel have?**
PC has 9 points (PC1-PC9) -- fewest of any Yin channel except HT.
- 8 **C** **What is the connecting organ of the San Jiao meridian?**
SJ (San Jiao) pairs with Pericardium as its Yin-Yang interior-exterior partner.
- 9 **B** **SJ5 Waiguan opens which Extraordinary Vessel?**
SJ5 is the confluent point opening the Yang Wei Mai, paired with GB41.
- 10 **C** **At the shoulder, how does the SJ channel relate to the GB channel?**
Per the transcript: GB runs in front of SJ to the shoulder, then turns back and crosses behind SJ -- the two Shaoyang channels cross each other twice in that region.
- 11 **B** **San Jiao's active hours are:**
SJ is active 9-11 PM (Hai) -- per the transcript, this is why we should be resting during this window, since San Jiao 'connects all organs.'
- 12 **C** **How many points does the SJ channel have?**
SJ has 23 points (SJ1-SJ23).
- 13 **A** **SJ's Front-Mu point is:**
SJ's Front-Mu is CV5 Shimen; its Back-Shu is BL22 Sanjiaoshu.
- 14 **B** **SJ17 Yifeng is a crossing point most associated with treating:**
SJ17 Yifeng, posterior to the earlobe, is a high-yield point for ear disorders -- tinnitus, deafness, TMJ, facial paralysis.
- 15 **C** **SJ's Lower He-Sea point (used for Fu-organ disorders, located on the leg) is:**
SJ's Lower He-Sea is BL39 Weiyang -- NOT on the SJ channel itself, the same trap structure as other Fu organs' lower he-sea points.
- 16 **B** **How many points does the GB channel have, and where does that rank it?**
GB has 44 points, the 3rd largest channel after BL (67) and ST (45).

Week 6 Quiz - Answer Key (All 30 Questions) (continued)

- 17 B GB's course on the head is uniquely described as:**
GB's head course is a distinctive zigzag ('Z-shape'), unique among the 12 primary channels -- exam-testable visual signature.
- 18 B Which GB point is FORBIDDEN in pregnancy?**
GB21 Jianjing has a strong descending action that can induce labor -- forbidden in pregnancy, same trap category as LI4 and SP6.
- 19 B GB34 Yanglingquan holds which dual special-point designation?**
GB34 is both the He-Sea point AND the Hui-Meeting point for Sinews/Tendons -- master point for tendon/ligament disorders.
- 20 C GB41 Zulinqi is the confluent point opening which Extraordinary Vessel?**
GB41 opens the Dai Mai, paired with SJ5 -- the only channel whose confluent point connects to a vessel that encircles the waist.
- 21 C Alternating fever/chills with a bitter taste in the mouth is the classic syndrome pattern for which channel?**
This is the classic Shaoyang syndrome, specifically associated with GB per the lecture's repeated emphasis.
- 22 B The GB channel crossing-point count on the slide is:**
Content-integrity flag: the slide states '12 points / 6 meridians' but only 9 points are actually named. Confirm with Dr. Zhang before treating this as settled.
- 23 A GB's Back-Shu and Front-Mu points are:**
GB's Back-Shu is BL19 Danshu; its Front-Mu is its own point, GB24 Riyue.
- 24 A Which meridian crosses IN FRONT of the Liver meridian at a point 8 cun above the medial malleolus?**
The Spleen channel crosses in front of Liver at 8 cun above the medial malleolus -- the ONE exception to the usual medial-leg Yin channel order.
- 25 B The Liver channel is the only primary channel that reaches:**
LR uniquely reaches the vertex and meets the Governing Vessel at GV20 Baihui -- vertex headache is a classic Liver-channel presentation.
- 26 A LR3 pairs with which point to form the classic 'Four Gates' combination?**
LR3 Taichong + LI4 Hegu = the 'Four Gates,' a classic combination to move Qi and Blood, taught this week.
- 27 B LR13 Zhangmen carries which double special-point designation?**
LR13 is the Front-Mu point of the SPLEEN (not Liver) AND the Hui-Meeting point for all 5 Zang organs -- a classic mix-up on exams.
- 28 B How many points does the LR channel have?**
LR has 14 points (LR1-LR14) -- the smallest Yin channel of the foot.
- 29 B LR's active hours, and what happens if a patient wakes during this window?**
LR is active 1-3 AM (Chou). Per the transcript, waking specifically in this window points to treating the Liver first; waking 3-5 AM points to the Lung instead.
- 30 D Direction of Qi flow in the Liver meridian?**
LR is a Foot-Yin channel; all three Foot-Yin channels (SP, LR, KI) flow foot to chest/abdomen.
