CIRCULATION & QI-FLOW RULES

- 3 Yin meridians of the hand run chest -> hand, converging with the 3 Yang meridians of the hand (exterior-interior pairs) at the fingertips.
- 3 Yang meridians of the hand ascend from the fingertips to the head, where they connect with the 3 Yang meridians of the foot.
- 3 Yang meridians of the foot descend from the head to the toes, where they join the 3 Yin meridians of the foot.
- 3 Yin meridians of the foot ascend from the toes to the abdomen and chest, meeting the 3 Yin meridians of the hand -- closing the full circuit.

NEXT WEEK: FINAL EXAM

CONFIRMED via both the live transcript and the 2026 slide deck's own final slide: NEXT WEEK IS THE COMPREHENSIVE FINAL EXAM (material from Weeks 1-9, 30 questions per Dr. Zhang's verbal answer in class). No new quiz or homework was assigned this week -- Dr. Zhang stated in lecture that Homework 5 (from Week 7/8) was still outstanding for some students and reminded the class to submit it before the final, since grades close after the exam. This Quiz Kit and Cram Sheet are self-test review material for that comprehensive final, not a stand-in for a new graded quiz.
