Next week: comprehensive Final Exam (material from Weeks 1-9).

The Five Shu (Transport) Points

This week's star category

The term ‘Five Shu Points’ (Wu Shu Xue) collectively refers to a specific group of five acupoints on each of the twelve main Meridians, situated distal to the elbows and knees. They are individually named Jing-Well (Jing), Ying-Spring (Ying), Shu-Stream (Shu), Jing-River (Jing), and He-Sea (He).

CATEGORY	MEANING	LOCATION	CLINICAL APPLICATION
Jing-Well	“Where it emerges is the Jing-Well”	Tips of fingers and toes	First aid, clearing heat, consciousness disorders
Ying-Spring	“Where it flows is the Ying-Spring”	Before the MCP/MTP joints	Feverish diseases, heat-related disorders
Shu-Stream	“Where it pours is the Shu-Stream”	After the MCP/MTP joints	Heaviness in the body, pain/stiffness in joints
Jing-River	“Where it travels is the Jing-River”	Forearms or lower legs	Externally contracted diseases (colds, flu), meridian regulation
He-Sea	“Where it enters is the He-Sea”	Near the elbow or knee joints	Disorders of the six Fu (hollow) organs

Classic of Difficult Questions, Ch. 68: “The well points govern fullness below the heart, the spring points govern fever, the stream points govern heaviness of the body and joint pain, the river points govern asthma, cough, chills, and fever, and the sea points govern rebellious qi and diarrhea.”

Yin meridians have no separate Yuan-Source point -- the Shu-Stream point IS the Yuan point (e.g., Taiyuan LU9 is both Shu-Stream and Yuan for the Lung). Yang meridians have a 6th, separate Yuan-Source point beyond the 5 Shu points (e.g., Chongyang ST42 for the Stomach).

The Eight Confluent Points

[Full detail](#)

Confluent points are special acupuncture points that connect the Eight Extraordinary Vessels with the Twelve Regular Meridians. Function: helping to regulate the body's energy, connect related meridians, and treat specific patterns.

Houxi (SI 3)

Du Vessel · pairs w/ Shenmai (BL 62)

On the ulnar side of the hand, proximal to the 5th metacarpophalangeal joint, at the border of the red and white skin.

Benefits the spine and neck; clears heat; treats febrile disease and back pain.

Lieque (LU 7)

Ren Vessel · pairs w/ Zhaohai (KI 6)

On the radial forearm, 1.5 cun proximal to the wrist crease, superior to the styloid process of the radius.

Releases the exterior, benefits the throat and lungs, and regulates the Ren Vessel.

Gongsun (SP 4)

Chong Vessel · pairs w/ Neiguan (PC 6)

On the medial foot, distal and inferior to the base of the 1st metatarsal bone.

Harmonizes the middle jiao, regulates the Chong Vessel, and treats abdominal or menstrual disorders.

Zulinqi (GB 41)

Dai Vessel · pairs w/ Waiguan (SJ 5)

On the dorsum of the foot, distal to the junction of the 4th and 5th metatarsal bones.

Spreads Liver qi, regulates the Dai Vessel, benefits the breasts, and treats pelvic or lateral-body pain.

Zhaohai (KI 6)

Yin Qiao Vessel · pairs w/ Lieque (LU 7)

In the depression directly below the medial malleolus.

Nourishes yin, benefits the throat, regulates sleep; governs movement.

Shenmai (BL 62)

Yang Qiao Vessel · pairs w/ Houxi (SI 3)

In the depression directly below the lateral malleolus.

Regulates the Yang Qiao Vessel, benefits the eyes, calms the spirit, and governs motor function.

Neiguan (PC 6)

Yin Wei Vessel · pairs w/ Gongsun (SP 4)

2 cun proximal to the wrist crease, between the tendons of palmaris longus and flexor carpi radialis.

Opens the chest, regulates the Heart, calms the spirit, harmonizes the Stomach, and relieves nausea.

Waiguan (SJ 5)

Yang Wei Vessel · pairs w/ Zulinqi (GB 41)

2 cun proximal to the dorsal wrist crease, between the radius and ulna.

Releases the exterior, clears heat, benefits the head and ears, and relieves pain along the yang channels.

The 8 points form 4 master couples (each couple treats a shared body region): Houxi+Shenmai (inner canthus, ear, shoulder, neck -- Yang); Lieque+Zhaohai (lung, throat, chest -- Yin); Gongsun+Neiguan (heart, chest, stomach -- Yin); Zulinqi+Waiguan (outer canthus, ear, cheek, neck, shoulder -- Yang).

Meeting (Crossing) Points

Where more than one channel's pathway crosses

“Meeting Points of the Channels” -- a point is a Crossing/Meeting Point when more than one channel's pathway passes through it. This full appendix table (Lecture_9Meeting_Points_List_.pdf, pp.52-55, MOA-style) is reproduced as source images below rather than re-typed, to preserve exact accuracy across all ~90 listed points and 17 channel/vessel columns.

High-Yield Highlights:

GB20 (Fengchi)	Gallbladder, Sanjiao, Yang Linking Vessel, Yang Motility Vessel -- 4-way meeting point; resolves the previously flagged “GB crossing-point” discrepancy from Week 6 for this specific point.
GB1 (Tongziliao)	Small Intestine + Sanjiao + Gallbladder -- outer canthus, where 3 Yang channels of the head converge.
BL1 (Jingming)	Stomach, Small Intestine, Bladder, Sanjiao, Gallbladder, Yang Linking, Yang Motility, Yin Motility -- the single busiest meeting point in the whole table (8 channels/vessels).
ST12 (Quepen)	Lung, Large Intestine, Bladder, Sanjiao, Gallbladder -- supraclavicular fossa, a major confluence point for channels descending into the chest.
SP6 (Sanyinjiao)	Spleen, Liver, Kidney -- the classic “3 Yin meeting” point of the leg, the origin of its name (San Yin Jiao = “Three Yin Intersection”).
CV3/CV4 (Zhongji/Guanyuan)	Conception Vessel + Spleen/Liver/Kidney (the 3 leg Yin meridians) -- lower abdomen, reproductive/urinary point cluster.
