

WEEK 1 QUIZ KIT

Print Edition

Channel Theory: Concept, Nomenclature, Flow of Qi – closed book

12 PRIMARY MERIDIANS

3 Circuits | 6 Zang + 6 Fu | Hand/Foot x Yin/Yang

Foundational theory – no individual points yet

THE FULL SYSTEM

15 Collaterals | 12 Divergent | 12 Sinew | 12 Cutaneous

8 Extraordinary Vessels

Coverage

10 easier recall questions (counts, direction rules, clock times)	Q1-Q10
10 applied questions (naming convention, circuits, meeting points)	Q11-Q20
10 trap/nuance questions (exceptions, EXCEPT format, exact terminology)	Q21-Q30
10 NEW: history, classical citations, classification tree, master diagram	Q31-Q40
Full answer key with explanations for all 40	at the back

How to use this

- Close the book. No notes, no app.
- Take it in one sitting, ~20 min.
- Mark every guess, even correct ones.
- Score, then re-drill ONLY the misses.
- Green = easy, gold = applied, red = trap.

Scoring guide

27-30	Exam ready. This is the foundation – move to Week 2 drilling.
23-26	Solid. Re-drill circuits and meeting points.
18-22	Re-read the Study Guide's direction/circuit pages.
Below 18	Full re-study before building on Week 2 content.

40 questions, 30 core + 10 new (history/citations/classification) – covers Week 1 comprehensively.

Cross-checked against the Week 1 Study Guide's verified content – nothing invented.

Dr. Vivian Zhang, Ph.D. | Jon Centeno, D.AcHM Candidate | VUIM

Questions 1-15

Channel Theory | no notes

- 1 How many Primary Meridians (Jing) does the body have?
A. 8
B. 12
C. 14
D. 15
- 2 How many Collaterals (Luo) does the body have?
A. 8
B. 12
C. 15
D. 20
- 3 How many Zang (Yin) organs pair with primary meridians?
A. 4
B. 5
C. 6
D. 8
- 4 How many Fu (Yang) organs pair with primary meridians?
A. 4
B. 5
C. 6
D. 8
- 5 'Channels' (Jing-Luo) as a term refers to:
A. The 12 Primary Meridians only
B. Meridians AND Collaterals together
C. Only the Extraordinary Vessels
D. Only the Divergent Meridians
- 6 Yin meridians of the HAND flow in which direction?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest
- 7 Yang meridians of the HAND flow in which direction?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest
- 8 Yang meridians of the FOOT flow in which direction?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest
- 9 Yin meridians of the FOOT flow in which direction?
A. Chest -> Hand
B. Hand -> Head
C. Head -> Foot
D. Foot -> Chest/Abdomen

Questions 1-15 (continued)

Channel Theory | no notes

- 10 The Lung (LU) meridian's peak two-hour period on the meridian clock is:
A. 1-3 AM
B. 3-5 AM
C. 5-7 AM
D. 7-9 AM
- 11 A meridian's full 3-part name is built from which three features?
A. Hand/Foot + Yin/Yang + Zang/Fu
B. Element + Season + Organ
C. Anterior/Posterior + Zang/Fu + Number
D. Yin/Yang + Element + Direction
- 12 Which sequence correctly lists the Outer/Anterior Circuit?
A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. SP -> ST -> LI -> LU
- 13 Which sequence correctly lists the Inner/Posterior Circuit?
A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. KI -> BL -> SI -> HT
- 14 Which sequence correctly lists the Middle Circuit?
A. LU -> LI -> ST -> SP
B. HT -> SI -> BL -> KI
C. PC -> SJ -> GB -> LR
D. GB -> LR -> PC -> SJ
- 15 The three Yin naming terms (by location on the limb) are:
A. Taiyin, Shaoyin, Jueyin
B. Yangming, Taiyang, Shaoyang
C. Taiyin, Yangming, Shaoyang
D. Jueyin, Taiyang, Shaoyin

Questions 16-30

Channel Theory | no notes

- 16 The three Yang naming terms (by location on the limb) are:
 A. Taiyin, Shaoyin, Jueyin
 B. Yangming, Taiyang, Shaoyang
 C. Taiyin, Yangming, Shaoyang
 D. Jueyin, Taiyang, Shaoyin
- 17 Hand Yin meridians meet Hand Yang meridians where on the body?
 A. The fingers
 B. The face
 C. The toes
 D. The chest
- 18 Hand Yang meridians meet Foot Yang meridians where on the body?
 A. The fingers
 B. The face
 C. The toes
 D. The chest
- 19 Foot Yang meridians meet Foot Yin meridians where on the body?
 A. The fingers
 B. The face
 C. The toes
 D. The chest
- 20 Foot Yin meridians meet Hand Yin meridians where on the body, completing the full loop?
 A. The fingers
 B. The face
 C. The toes
 D. The chest
- 21 Beyond the 12 Luo points on the primary meridians, which THREE additional collaterals bring the total to 15?
 A. Du Mai Luo, Ren Mai Luo, Spleen's Great Luo (Dabao)
 B. LU Luo, SP Luo, HT Luo (duplicated)
 C. 3 unnamed 'extra' meridian branches
 D. The 3 Yang divergent channels
- 22 Per Dr. Zhang's direct clarification in lecture, if an exam question says 'channels' rather than 'meridians,' you should assume it means:
 A. Only the 12 Primary Meridians
 B. Meridians AND Collaterals together - the whole system
 C. Only the Extraordinary Vessels
 D. It is interchangeable with 'points'
- 23 How many Divergent Meridians branch from the 12 Primary Meridians?
 A. 8
 B. 12
 C. 15
 D. 24
- 24 How many Muscle (Sinew) Regions and how many Cutaneous Regions exist?
 A. 8 and 8
 B. 12 and 12
 C. 15 and 15
 D. 12 and 15

Questions 16-30 (continued)

Channel Theory | no notes

- 25 How many Extraordinary Vessels are there, and which organ are they most closely tied to?
- A. 6 vessels, tied to the Liver
B. 8 vessels, tied to the Kidney
C. 8 vessels, tied to the Spleen
D. 12 vessels, tied to the Heart
- 26 Which of the following is TRUE about same-named channels on opposite limbs (e.g. Hand Taiyin LU and Foot Taiyin SP)?
- A. They have no functional relationship
B. They communicate with one another; a problem in one can sometimes be addressed via the other
C. They are identical pathways duplicated on the leg
D. They only relate to each other during extraordinary vessel activity
- 27 Dr. Zhang's Week 1 homework assignment specifically required drawing:
- A. All 12 meridians at once, in one sitting
B. The circulation, direction, and distribution of the Lung Meridian of Hand-Taiyin specifically
C. The 8 Extraordinary Vessels
D. The Five Shu points of every channel
- 28 Which of the following is NOT one of the three core functions of the meridians?
- A. Transporting Qi and Blood to nourish tissues
B. Resisting (defending against disease, reflecting symptoms)
C. Treatment (transmitting needling sensation, regulating deficiency/excess)
D. Synthesizing new Qi from food and air
- 29 EXCEPT question: All of the following are TRUE about the channel system EXCEPT:
- A. Meridians run deep; collaterals branch more superficially
B. There are 12 Primary Meridians and 15 Collaterals
C. The Extraordinary Vessels are each directly paired with one Zang-Fu organ, exactly like the 12 Primary Meridians
D. Meridians and Collaterals together form the channel system's core network
- 30 Which statement correctly distinguishes 'meridians' from 'collaterals' as Dr. Zhang described them?
- A. Meridians are superficial branches; collaterals run deep like a river
B. Meridians run deep like a river; collaterals are more superficial branches spreading from Luo-connecting points
C. There is no functional distinction - the terms are interchangeable in all contexts
D. Collaterals outnumber meridians 20 to 12

Questions 31-40 — New: History, Citations, Classification

Channel Theory | no notes

- 31 Per the Mawangdui Silk Manuscripts (excavated from a Western Han Dynasty tomb), which was discovered/recorded first?
- A. The acupuncture points
B. The channel pathways
C. Both simultaneously
D. Neither - they appear only in the Huangdi Neijing
- 32 Which classical text formally established the Meridian System as composed primarily of the 12 Primary Meridians?
- A. The Shang Han Lun
B. The Huangdi Neijing (Yellow Emperor's Inner Canon)
C. The Ben Cao Gang Mu
D. The Nan Jing alone
- 33 Per Ling Shu Chapter 71 (cited directly on Dr. Zhang's slide), pathogenic Qi that invades via the SPLEEN tends to linger where?
- A. Both elbows
B. Both axillae (armpits)
C. Both groins
D. Both popliteal fossae (backs of knees)
- 34 Which classical citation supports the meridians' 'Transporting' function (Function A)?
- A. Ling Shu, Chapter 47
B. Ling Shu, Chapter 71
C. Ling Shu, Chapter 5
D. Ling Shu, Chapter 9
- 35 On Dr. Zhang's classification tree (Slide 21), the 12 Primary Meridians branch outward into which set of structures (among others)?
- A. Only the 8 Extraordinary Vessels
B. The 15 Collaterals, 12 Divergent Meridians, 12 Muscle Regions, and 12 Cutaneous Regions
C. Only acupuncture points
D. Only the Zang-Fu organs directly
- 36 On the 'Meridians vs. Collaterals' comparison table, which column is described as 'Leading - the pathways through which Qi and Blood circulate'?
- A. Collaterals (Luomai)
B. Meridians (Jingmai)
C. Both equally
D. Neither - that describes the Extraordinary Vessels
- 37 On the Three Main Circuits master diagram (Slide 37), what is the complete circulation loop shown across all three circuits?
- A. Chest -> Hands/Fingers -> Face/Head -> Foot/Toes -> Chest
B. Head -> Chest -> Hands -> Foot -> Head
C. Hands -> Chest -> Head -> Chest -> Foot
D. Foot -> Head -> Hands -> Chest -> Foot
- 38 Modern research reframes meridians as a combination of which structures/processes, per lecture?
- A. Only nerve pathways
B. Peripheral nerve pathways, arterial pathways, and myofascial referred-pain patterns
C. Only blood vessels
D. Only fascial planes

Questions 31-40 (continued)

Channel Theory | no notes

39

Which historical TCM figure is mentioned in lecture as having mapped the meridians in old maps?

- A. Sun Simiao
- C. Li Shizhen

- B. Zhang Zhongjing
- D. Hua Tuo

40

Per Ling Shu Chapter 9 (cited on Dr. Zhang's slide as supporting the Treatment function), what must acupuncture treatment aim at regulating?

- A. The pulse
- C. Body temperature

- B. The flow of Qi
- D. Muscle tension

Answer Key - All 40 Questions

score, then re-drill only the misses

- 1 B How many Primary Meridians (Jing) does the body have?
12 Primary Meridians - the main 'rivers' of the channel system.
- 2 C How many Collaterals (Luo) does the body have?
15 Collaterals: one Luo-connecting point per primary meridian (12) plus the Luo of Du Mai, Ren Mai, and the Spleen's Great Luo (Dabao).
- 3 C How many Zang (Yin) organs pair with primary meridians?
6 Zang organs: Lung, Spleen, Heart, Liver, Kidney, Pericardium.
- 4 C How many Fu (Yang) organs pair with primary meridians?
6 Fu organs: Large Intestine, Stomach, Small Intestine, Bladder, Gallbladder, San Jiao.
- 5 B 'Channels' (Jing-Luo) as a term refers to:
Dr. Zhang directly clarified this in lecture: 'channels' is the bigger, umbrella term - Meridians (Jing) plus Collaterals (Luo).
- 6 A Yin meridians of the HAND flow in which direction?
Yin meridians of the hand (LU, HT, PC) all flow chest -> hand.
- 7 B Yang meridians of the HAND flow in which direction?
Yang meridians of the hand (LI, SI, SJ) all flow hand -> head.
- 8 C Yang meridians of the FOOT flow in which direction?
Yang meridians of the foot (ST, BL, GB) all flow head -> foot.
- 9 D Yin meridians of the FOOT flow in which direction?
Yin meridians of the foot (SP, KI, LR) all flow foot -> chest/abdomen, completing the loop.
- 10 B The Lung (LU) meridian's peak two-hour period on the meridian clock is:
LU peaks 3-5 AM, the very start of the 12-meridian clock cycle.
- 11 A A meridian's full 3-part name is built from which three features?
Every meridian name states its location (Hand or Foot), its nature (Yin or Yang), and its pertaining organ (Zang or Fu).
- 12 A Which sequence correctly lists the Outer/Anterior Circuit?
Outer/Anterior Circuit (Taiyin/Yangming): LU -> LI -> ST -> SP.
- 13 B Which sequence correctly lists the Inner/Posterior Circuit?
Inner/Posterior Circuit (Shaoyin/Taiyang): HT -> SI -> BL -> KI. 'Posterior' and 'Inner' name the same circuit across different slide versions.
- 14 C Which sequence correctly lists the Middle Circuit?
Middle Circuit (Jueyin/Shaoyang): PC -> SJ -> GB -> LR.
- 15 A The three Yin naming terms (by location on the limb) are:
Taiyin (Anterior), Shaoyin (Posterior), Jueyin (Middle) - the three Yin position names.
- 16 B The three Yang naming terms (by location on the limb) are:
Yangming (Anterior), Taiyang (Posterior), Shaoyang (Middle) - the three Yang position names.
- 17 A Hand Yin meridians meet Hand Yang meridians where on the body?
Hand Yin meets Hand Yang at the fingers (e.g. LU's branch meets LI1 at the index finger).
- 18 B Hand Yang meridians meet Foot Yang meridians where on the body?
Hand Yang meets Foot Yang at the face (e.g. LI ends at LI20, ST begins there).
- 19 C Foot Yang meridians meet Foot Yin meridians where on the body?
Foot Yang meets Foot Yin at the toes (e.g. ST ends at ST45, SP begins at SP1).
- 20 D Foot Yin meridians meet Hand Yin meridians where on the body, completing the full loop?
Foot Yin meets Hand Yin at the chest - this closes the loop and hands off into the next circuit.
- 21 A Beyond the 12 Luo points on the primary meridians, which THREE additional collaterals bring the total to 15?
15 = 12 primary Luo points + the Luo of Du Mai + the Luo of Ren Mai + the Spleen's Great Luo (Dabao).

Answer Key (continued)

score, then re-drill only the misses

22 B Per Dr. Zhang's direct clarification in lecture, if an exam question says 'channels' rather than 'meridians,' you should assume it means:

A student asked this directly; Dr. Zhang confirmed 'meridians' = the 12 Primary only, while 'channels' is the whole system.

23 B How many Divergent Meridians branch from the 12 Primary Meridians?

12 Divergent Meridians - one per primary meridian, distributing on chest/abdomen/head and deepening the Zang-Fu relationship (full detail covered later in the course).

24 B How many Muscle (Sinew) Regions and how many Cutaneous Regions exist?

12 Muscle/Sinew Regions and 12 Cutaneous Regions - one of each per primary meridian.

25 B How many Extraordinary Vessels are there, and which organ are they most closely tied to?

8 Extraordinary Vessels (Du, Ren, Chong, Dai, Yinwei, Yangwei, Yinqiao, Yangqiao), acting as reservoirs of Qi and Blood closely connected to the Kidney.

26 B Which of the following is TRUE about same-named channels on opposite limbs (e.g. Hand Taiyin LU and Foot Taiyin SP)?

Per lecture: arm and leg channels of the same name communicate with one another - a clinically useful relationship.

27 B Dr. Zhang's Week 1 homework assignment specifically required drawing:

The Week 1 homework was to draw the circulation, direction, and distribution of the LU meridian specifically - the same drawing standard applies to every meridian going forward.

28 D Which of the following is NOT one of the three core functions of the meridians?

The three functions are Transporting, Resisting, and Treatment. 'Synthesizing Qi from food and air' is a distractor - that role belongs to Spleen/Stomach digestive theory, not the meridian system itself.

29 C EXCEPT question: All of the following are TRUE about the channel system EXCEPT:

Trap: the Extraordinary Vessels are NOT organ-paired like the 12 Primary Meridians - they act as reservoirs, closely tied to the Kidney but not owned by any single Zang-Fu organ.

30 B Which statement correctly distinguishes 'meridians' from 'collaterals' as Dr. Zhang described them?

Dr. Zhang's river/branch metaphor: meridians (Jing) run deep like a river; collaterals (Luo) are the more superficial branches, spreading from each meridian's Luo-connecting point.

31 B Per the Mawangdui Silk Manuscripts (excavated from a Western Han Dynasty tomb), which was discovered/recorded first?

The silk manuscripts describe channel pathways without yet referencing specific points - channels came first, then points.

32 B Which classical text formally established the Meridian System as composed primarily of the 12 Primary Meridians?

The Huangdi Neijing (read as Su Wen + Ling Shu) marks the formation of acupuncture theory and establishes the 12 Primary Meridian system.

33 C Per Ling Shu Chapter 71 (cited directly on Dr. Zhang's slide), pathogenic Qi that invades via the SPLEEN tends to linger where?

Ling Shu Ch. 71: lung/heart invasion lingers in both elbows; liver in both axillae; SPLEEN in both groins; kidney in both popliteal fossae.

34 A Which classical citation supports the meridians' 'Transporting' function (Function A)?

Ling Shu Ch. 47: meridians/collaterals transport blood and Qi to adjust Yin-Yang and nourish tendons and bones - the Transporting function.

35 B On Dr. Zhang's classification tree (Slide 21), the 12 Primary Meridians branch outward into which set of structures (among others)?

The full classification tree branches the 12 Primary Meridians into Collaterals, Divergent Meridians, Muscle/Sinew Regions, and Cutaneous Regions, with the 8 Extraordinary Vessels as a separate reservoir system.

Answer Key (continued)*score, then re-drill only the misses*

36 B On the 'Meridians vs. Collaterals' comparison table, which column is described as 'Leading - the pathways through which Qi and Blood circulate'?

Meridians (Jingmai) are the 'leading' pathway - deep, trunk-like, few in number, through which Qi and Blood actually circulate. Collaterals are the shallower, branching network.

37 A On the Three Main Circuits master diagram (Slide 37), what is the complete circulation loop shown across all three circuits?

The master diagram shows one continuous loop: Chest -> Hands/Fingers -> Face/Head -> Foot/Toes -> back to Chest, repeating across all three circuits.

38 B Modern research reframes meridians as a combination of which structures/processes, per lecture?

The modern reframe: meridians can be understood as a combination of peripheral nerve pathways, arterial pathways, and myofascial referred-pain patterns - favorable access points to the nervous system found empirically.

39 A Which historical TCM figure is mentioned in lecture as having mapped the meridians in old maps?

Dr. Zhang names Sun Simiao among famous TCM doctors who mapped the meridians historically.

40 B Per Ling Shu Chapter 9 (cited on Dr. Zhang's slide as supporting the Treatment function), what must acupuncture treatment aim at regulating?

Ling Shu Ch. 9: "Acupuncture treatment must aim at regulating the flow of Qi." - the classical citation for the meridians' Treatment function.
