

CRAM SHEET

Heart & Small Intestine Channels

HT (9 pts) + SI (19 pts) = 28 Points · Quiz 4 Ready

SPECIAL PTS

HT7, SI3
and all categories

FIVE-SHU

Both channels
Well to Sea sequences

CROSSING PTS

HT: 0 (unique)
SI: BL1, GB14

How to use this

Read once the night before. Skim once more the morning of the quiz.

The Channel ID Cards (next pages) have everything the exam tests.

'Exam Traps' at the end of each channel section are Dr. Zhang's own warnings.

Jonathan Centeno · D.AcHM Candidate · Sourced from Dr. Zhang's lectures, CAM 4th Ed., MOA (Deadman 3rd)

HEART — Hand Shaoyin

9 points · Yin · Fire · 11 AM-1 PM · Chest to Hand (posterior medial)

Channel ID Card

Full name	Heart Meridian of Hand-Shaoyin
Points / Clock	9 pts 11 AM-1 PM
Element / Polarity	Fire Yin
Direction	Chest -> Hand (posterior medial)
Pertains / Connects	Heart / Small Intestine
Back-Shu / Front-Mu	BL15 Xinshu / CV14 Jique
Yuan-Source	HT7 Shenmen (also Shu-Stream)
Luo-Connecting	HT5 Tongli
Xi-Cleft	HT6 Yinxi
He-Sea	HT3 Shaohai
Crossing points	ZERO — the only primary channel with none
First / Last	HT1 Jiquan / HT9 Shaochong

Pathway in 8 Beats

1. Originates in the HEART, spreads to the 'Heart system' (linking vessels of heart to other organs)
2. Internal branch descends through diaphragm, connects with SMALL INTESTINE (pertaining organ)
3. Another internal branch ascends alongside the esophagus, connects to the 'eye system' (brain connection)
4. Main external pathway emerges from the heart, spreads to the Lung, then turns down to the axilla (HT1 Jiquan)
5. Descends along the postero-medial aspect of the upper arm, posterior to LU and PC channels
6. Crosses the elbow at HT3 Shaohai (He-Sea), continues down the forearm's ulnar/medial border
7. Enters the wrist at HT7 Shenmen (Shu-Stream + Yuan-Source) - calms the Shen
8. Continues along the palm, ends at the radial side of the little finger tip, HT9 Shaochong — hands off to SMALL INTESTINE

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Wood	HT9
Ying-Spring	Fire	HT8
Shu-Stream	Earth	HT7
Jing-River	Metal	HT4
He-Sea	Water	HT3

Crossing Points (0)

(none) — HT is the only primary channel with ZERO crossing points — confirmed unique feature, high-yield exam fact.

Highest-Yield Points

HT7	Shu-Stream + Yuan-Source	Calms Shen; #1 point for anxiety, insomnia, palpitations
HT3	He-Sea	Clears heart fire; fear, arm pain along the channel
HT6	Xi-Cleft	Night sweats, acute heart pain
HT9	Jing-Well	Emergency point: severe heart pain, palpitations, revives consciousness
HT5	Luo-Connecting	Links to SI; treats disorders of both channels

Exam Traps — read these last

HT has only 9 points — the FEWEST of any primary channel.
 HT7 doubles as Shu-Stream AND Yuan-Source — true for every Yin channel.
 HT has ZERO crossing points — do not confuse with SI, which crosses BL1 and GB14.
 HT and SI are primary Fire; do NOT lump them with PC/SJ (Ministerial Fire) — different circuits.
 HT connects to SI, completing the Fire pair that opens the Posterior/Inner Circuit.

SMALL INTESTINE — Hand Taiyang

19 points · Yang · Fire · 1-3 PM · Hand to Head (posterior lateral)

Channel ID Card

Full name	Small Intestine Meridian of Hand-Taiyang
Points / Clock	19 pts 1-3 PM
Element / Polarity	Fire Yang
Direction	Hand -> Head (posterior lateral)
Pertains / Connects	Small Intestine / Heart
Back-Shu / Front-Mu	BL27 Xiaochangshu / CV4 Guanyuan
Yuan-Source	SI4 Wangu
Luo-Connecting	SI7 Zhizheng
Xi-Cleft	SI6 Yanglao
Shu-Stream + Confluent	SI3 Houxi — opens Du Mai
Lower He-Sea (of SI)	ST39 Xiajuxu — on the ST channel, not SI itself
First / Last	SI1 Shaoze / SI19 Tinggong

Pathway in 8 Beats

1. Begins at the ulnar side of the tip of the little finger, SI1 Shaoze — where HT's branch terminates
2. Runs along the ulnar/posterior border of the hand and forearm, through SI3 Houxi (Shu-Stream + Confluent, opens Du Mai)
3. Crosses the elbow (SI8 Xiaohai, He-Sea), up the posterior aspect of the upper arm
4. Circles around the shoulder, zigzags across the scapula, crosses GV14 Dazhui
5. Enters supraclavicular fossa, descends internally to the HEART, through diaphragm, PERTAINS Small Intestine
6. BRANCH: from the neck, ascends the cheek, crosses cheekbone, reaches the outer canthus, enters the ear at SI19 Tinggong
7. Second BRANCH: from the cheek, ascends to the inner canthus of the eye (crosses BL1), then to the cheekbone (crosses GB14)
8. SI19 near the ear is the pathway's endpoint; the eye-branch connects toward the BLADDER channel

Five-Shu (Antique) Points

Shu Point	Element	Pt
Jing-Well	Metal	SI1
Ying-Spring	Water	SI2
Shu-Stream	Wood	SI3
Jing-River	Fire	SI5
He-Sea	Earth	SI8

Crossing Points (2)

BL1 Jingming — inner canthus of eye — SI's branch crosses here en route to BL

GB14 Yangbai — forehead — second facial crossing point on SI's ascending branch

Highest-Yield Points

SI3	Shu-Stream + Confluent	Opens Du Mai (pairs with BL62); spine, neck, febrile disease
SI4	Yuan-Source	Wrist/finger pain, febrile disease
SI8	He-Sea	Elbow/arm disorders, mental-emotional Fire patterns
SI19	Last point (near ear)	Tinnitus, deafness, ear disorders
SI1	Jing-Well	Excess breast milk / lactation problems — specifically noted by Dr. Zhang

Exam Traps — read these last

SI has MORE than double HT's points (19 vs. 9) — same pattern as LU (11) / LI (20).

SI's Lower He-Sea is ST39 — located on the STOMACH channel, not on SI itself. Lower He-Sea points for Fu organs all sit on leg-yang channels.

SI crosses BL1 and GB14 — do not confuse with HT, which has zero crossing points.

SI3 opens the Du Mai (pairs with BL62) — not the Ren Mai and not the Chong Mai.

SI connects to HT, completing the hand-off that opened this week's Fire pair.

Rapid Recall — HT & SI

Read this one last, on the way in

The “ONLY” List — guaranteed points

ONLY primary channel with ZERO crossing points
 Fewest total points of any primary channel
 SI's Lower He-Sea sits on which channel?
 SI3 opens which Extraordinary Vessel?
 HT7 doubles as which two categories?

HT

HT — 9 pts

ST (ST39 Xiajuxu)

Du Mai (pairs w/ BL62)

Shu-Stream + Yuan-Source

Forbidden in Pregnancy (cumulative)

(No new forbidden points introduced in HT/SI — cumulative list remains LI4 and SP6 from Weeks 2-3.)

Limb Distribution Rule

Anterior: Taiyin (yin) / Yangming (yang)
 Middle: Jueyin (yin) / Shaoyang (yang)
 Posterior: Shaoyin (yin) / Taiyang (yang)

Meridian Clock — full 24 hours

LU: 3-5 AM

LI: 5-7 AM

ST: 7-9 AM

SP: 9-11 AM

HT: 11-1 PM

SI: 1-3 PM

BL: 3-5 PM

KI: 5-7 PM

PC: 7-9 PM

SJ: 9-11 PM

GB: 11-1 AM

LR: 1-3 AM

Last 60 Seconds

HT = 9 pts, 11 AM-1 PM, Yin Fire, chest to hand, ZERO crossing points, HT7 calms Shen.

SI = 19 pts, 1-3 PM, Yang Fire, hand to head, crosses BL1 + GB14, Lower He-Sea is ST39.

HT and SI are PRIMARY Fire — do not confuse with PC/SJ's Ministerial Fire circuit.

Posterior/Inner Circuit begins here: HT -> SI -> (BL -> KI next week).

SI3 opens Du Mai. HT has no confluent point at all.

Commonly Confused — know both sides

HT vs SI point count HT = 9 (fewest of any channel). SI = 19 (more than double its Yin partner).

HT crossing vs SI crossing HT = ZERO crossing points. SI crosses BL1 and GB14.

Primary Fire vs Ministerial Fire HT/SI = primary Fire circuit. PC/SJ = Ministerial Fire, a separate circuit (Week 6).

SI3 vs LI4 SI3 = Confluent, opens Du Mai (spine). LI4 = Command of face/mouth.
